Mutual Assurance with Moderate Premiums.

Scottish Provident Institution.

Established 1837. Incorporated 1848.

HEAD OFFICE: 6, ST. ANDREW SQUARE, EDINBURGH.

THE PREMIUMS are so moderate that at usual ages for Assurance **£1200** or thereby may generally be secured from the first for the yearly payment which would elsewhere assure (with profits) **£1000** only—the difference being equivalent to an immediate and certain Bonus.

THE WHOLE SURPLUS goes to the Policyholders, on a system at once safe and equitable,—no share being given to those by whose early death there is a *loss* to the common fund.

Examples of Premiums for £100 at Death with Profits.

Age next Birthday.	25	30	35	40	45	50
During Life	£1 17 5	£2 2 4	£2 8 6	£2 16 6	£3 8 2	£4 3 2
25 Payments	2 9 8	2 13 11	2 19 3	3 5 11	3 15 11	4 8 8

PROVISION FOR THE YOUNG—A Savings Fund Policy.

Examples of Benefits Secured by an Annual Premium of £10, for Assurance commencing at age 21—with Profits.

Medical Examination is dispensed with under this Table. All Premiums returnable in event of the child's death before age 21, and 75 per cent. and upwards in event of Surrender.

Age next Birthday.	Whole Life Assurance with right to Bonus.			Endowment Assurance at death or age 50, with Bonus.		Cash on Surrender at age 21, under Whole Life or Endowment.	Age next Birthday.
	Sum Assured for Whole Life Premium of £10.	Sum Assured for 30 payments in all of £10.	Paid-up Policy (with Profits) at 21.	Sum Assured Premium of £10 ceasing before 50.	Paid-up Policy at 21.		
	(1)	(2)	(3)	(4)	(5)	(6)	
1	£1,276	£909	£694	£730	£440	£262	1
7	1,021	755	442	570	280	169	7
15	747	578	173	396	106	65	15

Assurances effected for Whole of Life, as in column (1), may, on the anniversary of the Policy before age 21, be transferred to any of the other classes for amount stated.

ACCUMULATED FUNDS, £14,000,000.

ENDOWMENT ASSURANCES WITH PROFITS—SPECIAL CLASS.

Prospectus with full information on application.

Branch Offices in Glasgow, Aberdeen, Dundee, Birmingham, Bristol, Cardiff, Leeds, Liverpool, Manchester, Newcastle, Norwich, Nottingham, Southampton, Belfast, and Dublin.

31, GREAT PORTLAND ST., W. (19th year) Wholesale, Retail, and Exp

Description of some of my Standard Goods. Detailed Catalogues on application

IRISH FRIEZES (strong, rough TWEEDS). These are *par excellence* the Cloths for **Count**
Suits, for Travellers, for Sportsmen, and for **Cold Climates,** being substantial, wa
pliable, hard-wearing, and almost weather-proof; made in various mixtures; dark and light, plain
plaids. Make also most useful and comfortable Ulsters. Price 3s. and 3s. 6d. yard, 28 inches wi
IRISH HOMESPUNS.—These, like the FRIEZES, are admirable for Gentlemen's Country Su
Fishing, Shooting Golfing, &c.; but lighter in weight, and more loosely woven. 28 in., 3s. yd. upwa
Very stout **IRISH TWEEDS** for rough country wear at home or abroad. 2s. 9d. to 3s.
yard. Splendid for Farmers, Gamekeepers, Mechanics, and Settlers in cold climates.
Extra thick **FRIEZES,** plain, plaid, and napped, for heavy travelling, driving, and motor
Ulsters, double width, from 6s. 9d. to 12s. 6d. yard; also the warm, soft, and woolly Duffle Frie
Useful and substantial **TWEEDS** for ordinary wear, town or country, 2s. 9d. to 4s. yard
inches. (For youths' wear many of these are excellent, being hard twisted and closely woven.)
"SAXONY" and **WORSTED TWEEDS** for professional or business wear, made from, or mi
with, fine colonial wools. 56 in., 6s. 9d. to 12s. 6d. yard, according to weight and degree of finen
Thin Hand Loom and **Power Loom TWEEDS** make capital suits for warm climate
for home summer wear, being light, woolly, and cool. Single width from 2s. 3d., and do
width 4s. 6d. yard. Some of these are also admirably suited for Ladies' Gowns, Cloaks,
Ulsters, others for Cycling, and still others for small boys' suits.
DONEGAL HOMESPUNS, hand-spun and hand-woven by the peasantry, 2s. to 3s. 6d. y
according to weight and merit, 27 to 30 inches wide. The thin ones are perfect for trop
climates, the medium and heavy for summer and winter lounge wear.
CONNEMARA, TIPPERARY, ANTRIM, CORK, KERRY and **MAYO Peasa**
made HOMESPUNS, 2/6 yd. upwards.
A great variety of the famous **HARRIS, LEWIS, SHETLAND,** and **ST. KILDA** HOMESP
NATURAL WHITE, BROWN, and **GREY HOMESPUNS,** light, medium, and heavy.
DYED HOMESPUNS, beautiful and artistic colourings; exclusive.
IRISH HOMESPUN TWEEDS for a serviceable suit, and boys' wear, 28 in., 2s. 6d. to 3s
Special **TWEEDS** for Mourning and Clerical wear, 2s. 6d. to 3s. 6d. yard, 28 in. wide.
NAVY SERGES of superior manufacture and hard wear, comprising the recognised yac
qualities, those for ordinary wear, and the rough, strong Royal Navy and Police **SERGES**
according to quality and weight. Also Black and Grey **SERGES.**
OVERCOATINGS, BLACK and **GREY COATINGS, WHIP-CORDS** or **RIDING TWE**
and **TROUSERINGS,** all of sterling value, and fixed, closest prices.
SUPERFINE FLANNELS & TWEEDS, also **CASHMERES;** for thinnest **TROPICAL SU**
SHIRTINGS. TRAVELLING RUGS, 10/- to 35/-. PUTTEES. CAPS, &c.
HAND-KNITTED HOSIERY, made by the Irish peasantry. Socks, 1s., 1s6d., and 2s.
Stockings, plain ribbed, 2s.9d. to 3s.9d. pair; Fancy, 3s.6d. to 5s.6d. pair. Gloves, 15d. to 2/6
FLANNEL TWEEDS for thin tropical suits, made of selected home wools, including n
browns and useful mixtures; well spun and woven on hand-looms. They wear extremely we
wash without shrinking. Highly recommended for Indian, African, Australian, and Arge
wear. Also for travellers and explorers. 1s. 9d. to 3s. yard.

Patterns of any of above by request. Applicants must be explicit in stating their wants as to qual
purpose, also fancy as regards pattern, and whether for Town or Country wear. A promise should also b
that they will be returned carefully within a week, anywhere in the United Kingdom (those living in Lon
expected to call and view the stock for themselves)—abroad, by next mail after two weeks' time for exami
With few exceptions I allow a discount of 10 % off above prices for orders aggregating over 100 yards at s
7½ % ditto over 50 yards; and 5 % over 25 yards—an inducement to circulate the patterns amongst friends, es
when sent to distant countries; the higher discounts are great concessions.
Parties abroad, not caring to wait for Patterns to be sent to order from, may depend upon my exercising d
and fidelity in selecting for them, if they give a clear indication of their wants and enclose a remittance (as
by experience the kind of cloths best suited to every climate and country). Any surplus will be at their dis
Arrangements have been made with tailoring firms of repute to make up these cloths if desired by Cu
Although we do not make the extravagant promises of some advertisers, we shall endeavour to main
reputation in this department also. To share in this arrangement, send usual measurements, or old suit, o
Average quantities for man's SUIT, 7 yds. 28 in., or 3½ yds. 56 in.; ditto for OVERCOAT, 5 to 7 yd
or 2½ to 3½ yds. 56 in. Weight varies from about 3 lbs. for a thin Homespun or Flannel to 8 lbs. for a thic
When parcels are to be sent by post add cost to remittance; if by rail or sea, charges will be booked forwar

ROWLAND'S
MACASSAR OIL
FOR THE HAIR

UNSURPASSED. **UNEQUALLED.**

Use it for your own and your children's hair and you will find it Preserves. Nourishes, Enriches and Restores it more effectually than anything else. Golden Colour for fair or grey hair.

It closely resembles the NATURAL OIL in the hair which Nature provides for its preservation, the loss of which causes the hair to become DRY, THIN, and WEAK, and ultimately fall off. No other preparation for the hair has this REMARKABLE PROPERTY.

Sold in 3/6, 7/-, and 10/6 Bottles, by Stores, Chemists, Hairdressers, and Rowland's, 67, Hatton Garden, London. Avoid spurious imitations and ask for ROWLAND'S MACASSAR OIL.

Pears STANDS FOR HEALTH AS WELL AS FOR BEAUTY.

By the beneficent operation of Nature's laws, whatever conduces to health also conduces to beauty. PEARS, being absolutely pure, and possessing those exquisite emollient properties, acts hygienically upon the skin.

THIS MEANS **HEALTH.**

By this healthy influence, PEARS softens, refines, and freshens the surface of the skin, rendering it clear, smooth, soft, and fine; and when this condition is realised there follows as a natural result the priceless boon of a perfect complexion.

THIS MEANS **BEAUTY.**

PEARS is of the highest quality in every particle, being neither cheapened by the addition of water nor by the introduction of impure ingredients, and, by virtue of its splendid lasting qualities, is

THE MOST ECONOMICAL TOILET SOAP
AND
MATCHLESS FOR THE COMPLEXION.

NOTE.—WHITAKER'S ALMANACK is supplied to the Trade on the distinct understanding that it will not be sold to the Public at less than the published price.

PREFACE TO THE XLIST ANNUAL VOLUME.

(1909.)

THE forty-first annual issue of WHITAKER'S ALMANACK has been subjected to the double process of rearrangement and augmentation; but those devoted subscribers who know the contents of every page and the accustomed position of every section will readily perceive that the change in method is the necessary corollary of the increase in matter. In order to minimise the inconveniences of the change special care has been taken in the compilation of the Index, which now extends to thirty-six columns containing more than six thousand references; and although certain minor subsections may still lack a separate entry, it is possible to trace every item by direct reference or by implication.

Many additions have been made to the statistical tables either by extending their scope, or by the introduction of subjects not formerly considered. It is particularly noticeable that in the section devoted to the British Empire (pages 448–595), there is now provided a veritable storehouse of ready help and immediate information concerning every point on which reference is likely to be made.

New articles deal with the Land and Sea Forces of the Crown, the Navigation of the Air, the Radio-Telegraphic Convention, the new Patent Law, and the Old Age Pension Regulations, while the financial result of the new Death Duties and a comparison with those obtaining in other countries will be found under the heading of Public and Private Wealth. The state of the Drama is again considered, the names of the successful competitors at the Olympic Games are duly published, and the progress of the Motor industry in the British Isles is briefly chronicled.

During the year the number of letters from friends and subscribers in all quarters of the globe has exceeded the customary allowance, the recent reduction in the rates of postage having no doubt contributed to the welcome increase. While thanking the writers at home and abroad for their appreciation and kindness, the Editor begs to be allowed to state that no effort will be spared in endeavouring to merit their approbation and to secure a continuance of their good will. Once again, however, he permits himself to remind his correspondents that letters should be dispatched at such dates as will secure their *delivery* in London *not later than* the last day of *October*.

DURATION OF LIGHT AND DARKNESS.

The second column of the first page of Calendar for every month contains a small diagram showing the amount of Darkness, or of Sun or Moonlight. These small figures represent the twelve hours from 6 P.M. to 6 A.M., and have four divisions, each representing three hours. From the 2nd to the 9th of January there is moonlight from 6 P.M. till 6 A.M., but from the 18th to the 23rd it will be seen that there is no moonlight. In the summer months the Sun comes to our aid.

THE DIAGRAMS USED ARE—

WHITAKER'S ALMANACK, 1909.

BEING THE FIRST YEAR AFTER BISSEXTILE, AND 8 AND 9 OF KING EDWARD VII.

Common Notes for the Year, 1909.

Golden Number	X.	*Rogation Sunday*...	May 16

Eclipses, Occultations, and other Celestial Phenomena.

January 1. Day breaks at *6h. 2m. morn.*, and Twilight ends at *6h. 4m. aft.*, the length of the Day being *7h. 52m.*

Jan. 2. Occultation of B.A.C. 1206; magnitude 6·0. The disappearance takes place at *10h. 27m. aft.*, 47° from the vertex; the reappearance at *11h. 41m. aft.*, 223° from the vertex.

Jan. 5. Mean time of Sun's semidiameter passing the meridian, *1m. 10·78.*

Jan. 10. Ceres in conjunction with Venus, *9h. aft.* ♀ 0° 2′ S.

Jan. 11. Jupiter in conjunction with the Moon, *7h. 9m. morn.* ☽ 4° 11′ S.

Jan. 12. Occultation of *ν* Virginis; magnitude 4·2. The disappearance takes place at *2h. 23m. morn.*, 174° from the vertex; the reappearance at *3h. 32m. morn.*, 280° from the vertex.

Jan. 16. Occultation of B.D. −12° 4134; magnitude 6·0. The disappearance takes place at *4h. 1m. morn.*, 91° from the vertex; the reappearance at *4h. 41m. morn.*, 20° from the vertex.

Jan. 19. Occultation of *c* Ophiuchi; magnitude 4·9. At disappearance the star will be below the horizon at Greenwich; the reappearance takes place at *6h. 4m. morn.*, 252° from the vertex.

Jan. 20. Venus in conjunction with the Moon, *5h. 3m. morn.* ☽ 1° 17′ N.

Jan. 20. Mean time of Sun's semidiameter passing the meridian, *1m. 9·48.*

Jan. 25. Occultation of 30 Piscium; magnitude 4·7. The disappearance takes place at *5h. 59m. aft.*, 28° from the vertex; the reappearance at *7h. 2m. aft.*, 217° from the vertex. 33 Piscium magnitude 4·6. The disappearance takes place at *7h. 44m. aft.*, 52° from the vertex: the reappearance at *8h. 37m. aft.*, 182° from the vertex.

Jan. 27. Mercury at greatest elongation (18° 25′) East, *4h. morn.*

Jan. 31. Occultation of *γ* Tauri; magnitude 5·2. The disappearance takes place at *5h. 1m. aft.*, 92° from the vertex; the reappearance at *6h. 7m. aft.*, 308° from the vertex.

In this month the Mornings increase *25m.*, and the Afternoon *44m.*

MORNING AND EVENING STARS

☿ MERCURY is an evening star, setting S.W. by W. In conjunction with the Moon on the 23rd, at *4h. 45m. morn.* ☿ 3° 36′ N.

♀ VENUS is a morning star, rising S.E. by E.

♂ MARS is a morning star, rising S.E. by E., three or four hours before the Sun.

♃ JUPITER in Leo, near to the star χ Leonis. At end of month rises, about *7h. 30m. aft.*, E. by N.

♄ SATURN in Pisces. In conjunction with the Moon on the 26th, at *5h. 47m. morn.* ♄ 3° 1′ N.

In the early part of the month the constellations Camelopardus, Lynx, Gemini, Monoceros, and Canis Major are on the meridian about midnight. In Gemini there is a fine compressed cluster of small stars, crowded together, and hardly distinguishable from a nebula, nearly midway between γ and ζ Geminorum. It can be best observed on the nights immediately before and after the 21st. There is a very fine cluster in Canis Major, in R.A. *6h. 43m.* and Decl. 20° 39′ S., 4° South of Sirius. With a very small astronomical telescope the individual stars can be easily distinguished; and with a low-power eye-piece, on the larger instruments, the field appears full of stars of various magnitudes. Neptune can be well observed in this month. See p. 94.

MONTHLY NOTES.

Feb. 1. Partridge and pheasant shooting ends. Copies of Registers of Voters to be sent to Secretary of State within three weeks.

2. Candlemas, Scottish Quarter Day.

11. Scottish general salmon-fishing begins.

19. Notice of Election of Borough Auditor to be published. Nominations must be delivered by the 20th.

27. Hare-hunting ends.

RAIN FELL IN FEBRUARY, 1908,

on 14 days; total fall, 1·45 inches; *below* average, 1841–90, by ·03 inch.

* The Meteorological Observations throughout the Almanack are those recorded at the Royal Observatory, Greenwich. They include the highest and lowest readings of the *Thermometer*, with the average for 65 years; the mean of *Barometer* at a height of 159 feet above the mean level of the sea; the daily *Rainfall*, the daily *Sunshine*, and the daily general direction and maximum force of the *Wind*.

The Moon.

Mean Longitude of Moon's Ascending Node, February 1, 83° 26′ 11″.

Eclipses, Occultations, and other Celestial Phenomena.

February 1. Day breaks at 5*h.* 42*m. morn.*, and Twilight ends at 6*h.* 46*m. aft.*, the length of the Day being 9*h.* 6*m.*

Feb. 2. Mercury stationary, 2*h. morn.*

Feb. 3. Occultation of B.D. + 23° − 1744; magnitude 6·0. The disappearance takes place at 6*h.* 1*m. morn.*, 145° from the vertex; the reappearance at 6*h.* 8*m. morn.*, 161° from the vertex.

Feb. 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 7·6*s.*

Feb. 7. Jupiter in conjunction with the Moon, 10*h.* 12*m. morn.*, ♃ 3° 53′ S.

Feb. 11. Mercury in inferior conjunction with the Sun, 2*h. aft.*

Feb. 15. Mars in conjunction with the Moon, 8*h.* 43*m. aft.*, ♂ 0° 1′ N.

Feb. 16. Ceres in conjunction with the Moon, 8*h. aft.* Ceres 0° 59′ N.

Feb. 19. Venus in conjunction with the Moon, 4*h.* 11*m. morn.*, ♀ 3° 3′ N.

Feb. 19. Mercury in conjunction with the Moon, 5*h.* 38*m. morn.*, ☿ 7° 12′ N.

Feb. 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 6·0*s.*

Feb. 22. Saturn in conjunction with the Moon, 7*h.* 29*m. aft.*, ♄ 2° 52′ N.

Feb. 23. Mercury stationary, 3*h. aft.*

Feb. 27. Occultation of 105 Tauri, magnitude 5·8. The disappearance takes place at 6*h.* 47*m. aft.*, 1° from the vertex; the reappearance at 7*h.* 31*m. aft.*, 184° from the vertex.

Feb. 28. Occultation of *n* Tauri, magnitude 5·2. The disappearance takes place at 0*h.* 42*m. morn.*, 1° from the vertex; the reappearance at 1*h.* 31*m. morn.*, 201° from the vertex.

Feb. 28. Jupiter in opposition to the Sun, 7*h. aft.*

In this month the Mornings increase 50*m.*, and the Afternoons 48*m.*

* The days thus indicated throughout the Almanack are those on which High Tides may be expected. Strong northerly winds in the North Sea and a low barometer with heavy rains in the counties drained by the Thames will probably cause a higher rise of the river, and the low-lying riverside districts to be flooded.

Rising, Southing, and Setting of the Principal Planets at intervals of Seven Days.

Morning and Evening Stars.

☿ Mercury is an evening star in the beginning of the month, setting W.S.W. ; a morning star in the latter half of the month, rising E.S.E.

♀ Venus is a morning star, rising S.E. by E.

♂ Mars is a morning star, rising S.E.

♃ Jupiter is in the constellation Leo, nearly in same position as last month ; rises in the evening E. by N.

♄ Saturn is an evening star towards the end of the month, setting nearly due W.

In the early part of this month the constellations Ursa Major, Lynx, Cancer, and a part of Hydra are on the meridian about midnight. In Cancer there is a very beautiful cluster of stars, preceding *a* Canceri about 8*m*. in R.A. and nearly same declination, consisting of some 200 stars from the 8th to 13th magnitudes. The fine group of stars in Cancer, called "Præsepe," can be best observed in this month on the nights immediately preceding and following the 19th. It does not consist of a very great number of stars, but the components are, as compared with those of other clusters, of considerable magnitude. It is situated in R.A. 8*h*. 34*m*. and Decl. 20° 20′ N., about 1° to the west of a line joining the stars δ and γ Canceri.

The triple star ζ in Cancer may be examined in this month : it will be found in R.A. 8*h*. 6*m*. 50*s*. and Decl. 17° 55′ N. Neptune can be observed in this month. See p. 94.

Eclipses, Occultations, and other Celestial Phenomena

March 1. Day breaks at 4*h.* 55*m. morn.*, and Twilight ends at 7*h.* 31*m. aft.*, the length of the Day being 10*h.* 48*m.*

Mar. 1. Occultation of ω Geminorum; magnitude 5·3. The disappearance takes place at 8*h.* 57*m. aft.*, 24° from the vertex; the reappearance at 9*h.* 38*m. aft.*, 3° from the vertex.

Mar. 3. Occultation of γ Cancri; magnitude 4·8. The disappearance takes place at 5*h.* 32*m. aft.*, 9° from the vertex; the reappearance at 6*h.* 27*m. aft.*, 358° from the vertex.

Mar. 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 5·0*s.*

Mar. 9. Mercury at greatest elongation (27° 26′) West, 7*h. aft.*

Mar. 11. Occultation of κ Virginis; magnitude 4·3. The disappearance takes place at 0*h.* 44*m. morn.*, 190° from the vertex; the reappearance at 1*h.* 37*m. morn.*, 270° from the vertex.

Mar. 16. Mars in conjunction with the Moon, 3*h.* 3*m. aft.* 1° 26′ N.

Mar. 16. Ceres in conjunction with the Moon, 8*h. aft.* Ceres 0° 58′ N.

Mar. 19. Mercury in conjunction with the Moon, 11*h.* 35*m. aft.* ☿ 3° 5′ N.

Mar. 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 4·3*s.*

Mar. 21. Venus in conjunction with the Moon, 1*h. 0m. morn.* 3° 52′ N.

Mar. 21. Sun enters sign Aries, Spring commences, 6*h.* 13*m. morn.*

Mar. 22. Saturn in conjunction with the Moon, 11*h.* 46*m. morn.* ♄ 2° 41′ N.

Mar. 25. Occultation of B.A. 1240; magnitude 5·7. The disappearance takes place at 10*h.* 43*m. aft.*, 71° from the vertex; the reappearance at 11*h.* 27*m. aft.*, 1° from the vertex. The star is setting at the reappearance.

Mar. 26. Mars and Uranus in conjunction, 8*h.* 54*m. aft.* 0° 18′ S.

In this month the Morning increase 1*h.* 9*m.*, and the Afternoons 51*m.*

Morning and Evening Stars.

☿ Mercury is a morning star, rising E.S.E. in the first half of the month, and later on E. by S. At greatest distance from the Sun on the 16th, at 8*h. morn.*

♀ Venus is a morning star till near the end of the month, when it will be too near the Sun for easy observation. Rises E. by S.

♂ Mars is a morning star, rising S.E. by E.

♃ Jupiter rises in the early afternoon E. by N., and a little to the East of ρ Leonis.

♄ Saturn is an evening star, setting a very little North of West.

At midnight, in the beginning of March, the constellations Ursa Major, Leo, Crater, and Hydra are on the meridian. In Ursa Major is a large planetary Nebula, appearing as a mass of attenuated light, from 3½′ to 4′ in diameter; it lies 2½° S.E. of β Ursa Majoris.

Virgo comes to the meridian about midnight towards the end of this month. Between Virgo and Coma Berenices is a large Nebula, one of the class known as "Spiral Nebulæ," situated in R.A. 12*h.* 14*m.* and Decl. 15° 0′ N. With a large telescope of 8 inches aperture it appears to be resolvable in the centre into two bright star-like points. This constellation is thickly strewed with nebulæ, which may be best observed on the evenings immediately before and after the 21st of the month.

Mean Longitude of Moon's Ascending Node, April 1, 80° 18′ 11.

Eclipses, Occultations, and other Celestial Phenomena.

April 1. Day breaks at 3*h.* 37*m. morn.*, and Twilight ends at 8*h.* 31*m. aft.*, the length of the Day being 12*h.* 52*m.*

Apr. 2. Jupiter in conjunction with the Moon, 9*h.* 48*m. morn.*, ☽ 3° 45′ S.

Apr. 3. Occultation of *ν* Virginis; magnitude 4·2. The disappearance takes place at 9*h.* 55*m. aft.*, 107° from the vertex; the reappearance at 11*h.* 5*m. aft.*, 331° from the vertex.

Apr. 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 4·4*s.*

Apr. 8. Occultation of *μ* Librae; magnitude 5·4. The disappearance takes place at 2*h.* 14*m. morn.*, 127° from the vertex; the reappearance at 3*h.* 30*m. morn.*, 264° from the vertex.

Apr. 9. Venus and Saturn in conjunction, 4*h.* 25*m. aft.* ♀ 0° 58′ S.

Apr. 11. Occultation of *b* Ophiuchi; magnitude 4·3. The disappearance takes place at 3*h.* 52*m. morn.*, 43° from the vertex; the reappearance at 4*h.* 32*m. morn.*, 337° from the vertex.

Apr. 13. Ceres in conjunction with the Moon, 3*h. aft.* Ceres 0° 31′ N.

Apr. 13. Mercury and Saturn in conjunction, 9*h.* 32*m. aft.* ☿ 0° 39′ N.

Apr. 14. Mars in conjunction with the Moon, 6*h.* 52*m. morn.* ♂ 2° 29′ N.

Apr. 19. Saturn in conjunction with the Moon, 4*h.* 12*m. morn.* ♄ 2° 33′ N.

Apr. 19. Mercury in conjunction with the Moon, 10*h.* 45*m. aft.* ☿ 3° 28′ N.

Apr. 19. Venus in conjunction with the Moon, 10*h.* 59*m. aft.* ♀ 3° 7′ N.

Apr. 20. Mercury and Venus in conjunction, 2*h.* 37*m. morn.* ☿ 0° 22′ N.

Apr. 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 5·0*s.*

Apr. 29. Jupiter in conjunction with the Moon, 1*h.* 46*m. aft.* ♃ 3° 59′ S.

In this month the Morning increase 1*h.* 2*m.*, and the Afternoons 48*m.*

MORNING AND EVENING STARS.

☿ MERCURY is an evening star at the end of the month, setting W.N.W. In superior conjunction with the Sun on the 22nd, at *0h. morn.*

♀ VENUS rises very nearly with the Sun throughout the month, and cannot easily be observed. In superior conjunction with the Sun on the 28th, at *5h. aft.*

♂ MARS is a morning star, rising S.E. by E.

♃ JUPITER in the constellation Leo, near to *ρ* Leonis.

♄ SATURN is a morning star towards the end of the month, rising a little N. of E.

ARENT RIGHT ASCENSION AND LINATION OF THE POLE STAR.

R.A.			Decl. N.		
H.	M.	S.	°	′	″
1	25	19·5	88	49	17

1	25	19·6	88	49	11
1	25	22·5	88	49	9

At the latter part of April the constellations aco, Bootes, and Libra will be on the meridian out midnight. An irresolvable double Nebula in nes Venatici, about 4° S.W. of *η* Ursæ Majoris, n be observed in this month. The Southern ebula is surrounded by a faint ring of nebulous ht, and was called by Herschel, in his Catalogue, the Halo Nebula." Later observations placed among the "Spiral" Nebulæ. That this is not true incandescent Nebula is shown by the absence of bright lines in its spectrum. In R.A. 15*h.* 14*m.*, Decl. 2° 28′ N., is a very fine cluster of stars, condensed into great brilliancy towards the centre. Sir W. Herschel was able to distinguish over 200 stars in this group in the field of his 40-ft. reflector, but found the middle portion so condensed that the individual stars could not be separated. The stars range from the 12th to 15th mag. The evenings about the 15th are the best for observing these objects,

Mean Longitude of Moon's Ascending Node, May 1, 70° 43′ ♊.

Eclipses, Occultations, and other Celestial Phenomena.

May 1. Day breaks at 2*h.* 3*m. morn.*, and Twilight ends at 9*h.* 51*m. aft.*, the length of the Day being 14*h.* 46*m.*

May 2. Jupiter stationary, 0*h. morn.*

May 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 6·1*s.*

May 11. Ceres in conjunction with the Moon, 4*h. morn.* Ceres 0° 38′ S.

May 12. Mars in conjunction with the Moon, 8*h.* 28*m. aft.* ♂ 2° 56′ N.

May 16. Saturn in conjunction with the Moon, 6*h.* 40*m. aft.* ♄ 2° 25′ N.

May 19. Venus in conjunction with the Moon, 11*h.* 34*m. aft.* ♀ 1° 6′ N.

May 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 7·3*s.*

May 20. Mercury at greatest elongation (22° 22′) East, 4*h. aft.*

May 21. Mercury in conjunction with the Moon, 6*h.* 35*m. morn.* ☿ 1° 40′ N.

May 22. Occultation of ω Geminorum; magnitude 5·3. The disappearance takes place at 9*h.* 12*m. aft.*, 74° from the vertex; the reappearance at 10*h.* 2*m. aft.*, 222° from the vertex.

May 26. Occultation of *i* Leonis; magnitude 5·7. The disappearance takes place at 9*h.* 42*m. aft.*, 28° from the vertex; the reappearance at 10*h.* 22*m. aft.*, 309° from the vertex.

May 26. Jupiter in conjunction with the Moon, 11*h.* 5*m. aft.* ♃ 4° 13′ S.

May 31. Occultation of κ Virginis; magnitude 4·3. The disappearance takes place at 8*h.* 44*m. aft.*, 128° from the vertex; the reappearance at 10*h.* 4*m. aft.*, 301° from the vertex.

In this month the Mornings increase 43*m.*, and the Afternoons 43*m.*

MORNING AND EVENING STARS.

☿ MERCURY is an evening star, setting N.W.

♀ VENUS is an evening star, setting W.N.W. ; in latter part of month, N.W. by W.

♂ MARS is a morning star, rising E.S.E.

♃ JUPITER in the constellation Leo ; souths in the early evening. Stationary on the 1st.

♄ SATURN is a morning star, rising E. by N.

Towards the end of May we shall find the
onstellations Draco, Hercules, Ophiuchus, and
corpio on the meridian about midnight.

Hercules contains a very splendid cluster
stars situated in R.A. 16*h.* 38*m.* and Decl.
° 41′ N. This, like most of the star-clusters, is
ndensed in the centre, and may be easily re-
olved with moderate telescopic aid ; and a few
ays about the 19th, when the Moon is absent, it
ay, if the opportunity is taken of a very clear
night, be seen with the naked eye plainly be-
tween the stars ζ and η Herculis, rather nearer to
η. This cluster, discovered by Halley in 1714, is
one of the most beautiful examples of these bodies
to be seen in the heavens. With the great Re-
fractor of the Lick Observatory the nebulous globe
at the centre has been resolved into separate
points.

Vesta may be observed early in this month.
See p. 94.

Mean Longitude of Moon's Ascending Node, June 1, 77° 4′ ☊.

Eclipses, Occultations, and other Celestial Phenomena.

June 1. There is no real night in this month, but either daylight or twilight, the length of the Day being 16*h.* 14*m.*

June 4. A Total Eclipse of the Moon, partly visible at Greenwich. See p. 83.

June 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 8·48*s.*

June 7. Mercury and Venus in conjunction, 3*h.* 12*m. aft.* ☿ 2° 11′ S.

June 10. Mars in conjunction with the Moon, 7*h.* 53*m. morn.* ♂ 2° 33′ N.

June 12. Mercury at greatest distance from the Sun, 7*h. morn.*

June 13. Saturn in conjunction with the Moon, 6*h.* 9*m. morn.* ♄ 2′ 13′ N.

June 14. Occultation of 64 Ceti; magnitude 5·7. The disappearance takes place at 2*h.* 4*m. morn.*, 33° from the vertex; reappearance at 2*h.* 22*m. morn.*, 354° from the vertex.

June 15. Mercury in inferior conjunction with the Sun, 0*h. morn.*

June 17. Mercury in conjunction with the Moon, 4*h.* 14*m. aft.* ☿ 4° 29′ S.

June 17. An Annular Eclipse of the Sun, invisible at Greenwich. See p. 83.

June 19. Venus in conjunction with the Moon, 1*h.* 59*m. morn.* ♀ 1° 8′ S.

June 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 8·78*s.*

June 22. Sun enters the sign Cancer. Summer commences, 2*h.* 6*m. morn.*

June 23. Venus and Neptune in conjunction, 5*h.* 46*m. morn.* ♀ 1° 52′ N.

June 23. Jupiter in conjunction with the Moon, 0*h.* 57*m. aft.* ♃ 4° 21′ S.

June 24. Occultation of ν Virginis; magnitude 4·2. The disappearance takes place at 9*h.* 15*m. aft.*, 37° from the vertex; the reappearance at 9*h.* 59*m. aft.*, 307° from the vertex.

June 25. Venus at least distance from the Sun, 4*h. morn.*

June 26. Mercury stationary, 6*h. aft.*

In this month the Mornings increase 3*m.*; the Afternoons 13 *m.*

MORNING AND EVENING STARS.

☿ MERCURY is an evening star early in the month, setting N.W. by W.; a morning star at end of month, rising N.E. by E. In inferior conjunction with the Sun on the 15th, at *0h. morn.*

♀ VENUS is an evening star, setting N.W. At least distance from the Sun on the 25th, at *4h. morn.*

♂ MARS is a morning star, rising E. by S.

♃ JUPITER is an evening star, setting W. by N.

♄ SATURN is a morning star, rising E. by N.

In the last week of June the constellations Draco, Lyra, a portion of Hercules, Scutum Sobieski, and a part of Sagittarius will south about midnight.

In Sagittarius there is a notable and very extensive Nebula, somewhat like a horseshoe in shape. It will be found in R.A. *18h. 15m.*, and Decl. 16° 25′ S. The spectroscope shows this Nebula to consist of a mass of incandescent gas. Professor Holden says that one arm of the Nebula has changed its position since Herschel's time. In good weather can be well seen with a small telescope.

In Sagittarius, a little West and North of λ, is a globular cluster of very minute stars, densely crowded, to be seen only with difficulty in small telescopes. Owing to its great southern declination there is but little chance of seeing it except when southing. Uranus, Ceres, Pallas, and Vesta may be well observed in this month. See p. 94.

Mean Longitude of Moon's Ascending Node, July 1, 75° 29′ ♊.

Eclipses, Occultations, and other Celestial Phenomena.

July 1. In this month there is no real night till after the 20th, the length of the day being 16*h*. 30*m*.

July 1. Occultation of 39 Ophiuchi; magnitude 6·0. The disappearance takes place at 2*h*. 29*m*. *aft*., 147° from the vertex; the reappearance at 9*h*. 40*m*. *aft*., 274° from the vertex.

July 4. Uranus in conjunction with the Moon, 2*h*. 30*m*. *morn*. Uranus 2° 22 N.

July 4. Earth at greatest distance from the Sun, 4*h*. *morn*.

July 5. Mean time of Sun's semidiameter passing the meridian, 1*m*. 8·4*s*.

July 5. Occultation of 33 Capricorni: magnitude 5·6. The disappearance takes place at 10*h*. 48*m*. *aft*., 79° from the vertex; the reappearance at 11*h*. 49*m*. *aft*., 306° from the vertex.

July 8. Mercury at greatest elongation (21° 11′) West. 5*h*. *morn*.

July 8. Mars in conjunction with the Moon, 3*h*. 46*m*. *aft*. ♂ 1° 21′ N.

July 8. Occultation of B.A.C. 17; magnitude 5·9. At disappearance the star will be below the horizon at Greenwich; reappearance takes place at 11*h*. 59*m*. *aft*., 333° from the vertex.

July 10. Saturn in conjunction with the Moon, 2*h*. 46*m*. *aft*. ♄ 1° 54′ N.

July 14. Occultation of B.D. + 20° 785; magnitude 5·8. At disappearance the star will be below the horizon at Greenwich; the reappearance takes place at 1*h*. 18*m*. *morn*., 310° from the vertex.

July 15. Mercury in conjunction with the Moon, 8*h*. 37*m*. *aft*. ☿ 2° 48′ S.

July 19. Venus in conjunction with the Moon, 5*h*. 50*m*. *morn*. ♀ 3° 5′ S.

July 20. Mean time of Sun's semidiameter passing the meridian 1*m*. 7·4*s*.

July 21. Jupiter in conjunction with the Moon, 5*h*. 39*m*. *morn*. ♃ 4° 22′ S.

July 26. Mercury at least distance from the Sun, 7*h*. *morn*.

In this month the Mornings decrease 35*m*., and the Afternoons 29*m*.

MORNING AND EVENING STARS.

☿ MERCURY is a morning star, rising N.E. by E. In conjunction with Neptune on the 23rd, at 5*h.* 17*m. aft.* ☿ 1° 6′ N.

♀ VENUS is an evening star, setting WNW.

♂ MARS rises between 10*h.* and 11*h. aft.*, in the middle of the month, E. by S.

♃ JUPITER is an evening star, setting W. by N.

♄ SATURN is a morning star at the beginning of the month, rising E. by N. Nearly stationary in the constellation Pisces.

In the middle of July the constellations Cygnus, Vulpecula, Aquila, and Sagittarius will be on the meridian about midnight.

The Annular Nebula in Lyra, situated between β and γ, is the best example of the Annular Nebulæ; the heavens containing, as far as is at present known, comparatively few examples of this class. It requires a rather good telescope to see it well: it is in R.A. 18*h.* 50*m.* and Decl. 32° 54′ N. It exhibits a spectrum as if composed of an incandescent gas. There is also a globular cluster in Lyra, as nearly as possible midway between γ Lyræ and β Cygni. It is in R.A. 19*h.* 13*m.*, Decl. 30° 1′ N. The best nights for the observation of these objects are those just before and after the 16th.

Uranus, Ceres, and Pallas may be well observed in this month. See p. 94.

Mean Longitude of Moon's Ascending Node, August 1, 73° 50′ II.

Eclipses, Occultations and other Celestial Phenomena.

August 1. Day breaks at 1*h.* 31*m. morn.*, and Twilight ends at 10*h.* 41*m. aft.*, the length of the Day being 15*h.* 24*m.*

Aug. 4. Mercury in superior conjunction with the Sun, 11*h. morn.*

Aug 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 6·1*s.*

Aug. 5. Occultation of 30 Piscium; magnitude 4·7. The disappearance takes place at 3*h.* 18*m. morn.*, 58° from the vertex: the reappearance at 4*h.* 27*m. morn.*, 219° from the vertex.

Aug. 5. Mars in conjunction with the Moon, 4*h.* 15*m. aft.* ♂ 0° 13′ S.

Aug. 6. Saturn in conjunction with the Moon, 9*h.* 45*m. aft.* ♄ 1° 32′ N.

Aug. 6. Occultation of *ν* Piscium; magnitude 4·7. The disappearance takes place at 11*h.* 35*m. aft.*, 64° from the vertex; the reappearance at 0*h.* 23*m. morn.*, on the 7th, 315° from the vertex.

Aug. 12. Venus and Jupiter in conjunction, 7*h.* 2*m. morn.* ♀ 0° 12′ N.

Aug. 16. Mercury in conjunction with the Moon, 10*h.* 56*m. aft.* ☿ 3° 53′ S.

Aug. 17. Jupiter in conjunction with the Moon, 11*h.* 36*m. aft.* ♃ 4° 17′ S.

Aug. 18. Venus in conjunction with the Moon, 0*h.* 13*m. aft.* ♀ 4° 15′ S.

Aug. 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 4·9*s.*

Aug. 23. Mars stationary, 3*h. aft.*

Aug. 24. Vesta in conjunction with the Moon, 5*h. aft.* Vesta 0° 44′ N.

Aug. 25. Mercury and Jupiter in conjunction, 0*h. 0m. aft.* ☿ 0° 40′ S.

Aug. 27. Uranus in conjunction with the Moon, 6*h.* 38*m. aft.* Uranus 2° 22′ N.

Aug. 29. Occultation of 37 Capricorni; magnitude 5·9. The disappearance takes place at 10*h.* 50*m. aft.*, 55° from the vertex; the reappearance at 11*h.* 59*m. aft.*, 251° from the vertex.

In this month the Mornings decrease 47*m.*, and the Afternoons 59*m.*

28	1 27 9·6	88 49 9

Morning and Evening Stars.

☿ Mercury is an evening star, setting N.W. by W. in the early days of the month, and W. by N. towards the end.

♀ Venus is an evening star, setting W. by N. till the last week in the month, when it sets nearly due W.

♂ Mars nearly stationary in Pisces; rises in the late evening nearly due E. At least distance from the Sun on the 13th, at *8h. aft.*

♃ Jupiter is an evening star, setting W. by N.

♄ Saturn rises in the late evening E. by N. Stationary on the 6th, at *11h. morn.*

At the beginning of August, Cepheus, Cygnus, Vulpecula, Delphinus, and Capricornus south at midnight.

In Vulpecula, 3½° due north of γ Sagittæ, is the "Dumb-bell" Nebula, generally considered irresolvable, although under the higher powers of Lord Rosse's telescope there seemed some trace of resolvability shown. It is situated in R.A. *19h. 55m.* and Decl. 22° 26′ N., and gives a spectrum of bright lines.

There is a little bright globular cluster, 4° due south of ε Delphini, consisting of a mass of very small stars, not easy for small telescopes; ε Delphini is situated in R.A. *20h. 28m. 49s.* and Decl. 11° 0′ N.—a tiny star, 9th mag. precedes it. This though a small is yet a bright cluster, and may be observed easily on the evenings immediately before and after the 15th of this month. Uranus may be observed at the beginning of the month. See p. 94.

RAIN FELL IN SEPTEMBER, 1908,
on 13 days; total fall, 1·21 inches; *below* the average, 1841-90, by 1·04 inches.

MONTHLY NOTES.

September 1. Declarations as to misdescription or other error in County or Burgess Lists to be delivered to the Town Clerks and Clerks of the Peace.—Lists of Jurors to be affixed to church doors for the first three Sundays. Salmon close-time begins. Partridge shooting begins.

3. First day on which Revising Barristers may hold Revision Courts.

21. Edinburgh Autumn Holiday.

24. Sheriffs of City of London to be sworn in.

30. Accounts of Overseers to be made up to this date for past half-year.

Mean Longitude of Moon's Ascending Node, September 1. 72° 12′ ♊.

Eclipses, Occultations, and other Celestial Phenomena.

September 1. Day breaks at 3*h.* 7*m. morn.*, and Twilight ends at 8*h.* 53*m. aft.*, the length of the Day being 13*h.* 33*m.*

Sept. 2. Mars in conjunction with the Moon, 3*h.* 39*m. morn.*, ♂ 1° 4′ S.

Sept. 3. Saturn in conjunction with the Moon, 4*h.* 33*m. morn.*, ♄ 1° 14′ N.

Sept. 3. Occultation of 64 Ceti; magnitude 5·7. The disappearance not visible at Greenwich; the reappearance takes place at 8*h.* 58*m. aft.*, 235° from the vertex, of Ceti; magnitude 4·5. The disappearance takes place at 9*h.* 21*m. aft.*, 130° from the vertex; the reappearance at 9*h.* 50*m. aft.*, 255° from the vertex.

Sept. 4. Occultation of ε Arietis; magnitude 5·5. The disappearance takes place at 3*h.* 22*m. morn.*, 68° from the vertex; the reappearance at 4*h.* 33*m. morn.*, 219° from the vertex.

Sept. 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 4·0*s.*

Sept. 5. Occultation of ω Tauri; magnitude 5·8. The disappearance takes place at 11*h.* 51*m. aft.*, 37° from the vertex; the reappearance at 0*h.* 9*m. morn.*, on the 6th, 1° from the vertex.

Sept. 17. Mercury at greatest elongation (26° 34′) East, 10*h. morn.*

Sept. 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 3·8*s.*

Sept. 21. Vesta in conjunction with the Moon, 7*h. aft.* Vesta 0° 34′ N.

Sept. 23. Occultation of σ Sagittarii; magnitude 2·1. The disappearance takes place at 3*h.* 39*m. aft.*, 109° from the vertex; the reappearance at 4*h.* 53*m. aft.*, 303° from the vertex.

Sept. 28. Occultation of 30 Piscium; magnitude 4·7. The disappearance takes place at 11*h.* 7*m. aft.*, 84° from the vertex; the reappearance at 0*h.* 9*m. morn.*, on the 29th, at 206° from the vertex.

Sept. 29. Mars in conjunction with the Moon, 3*h. morn.*, ♂ 0° 9′ N.

In this month the Morning decrease 46*m.*, and the Afternoon 5*m.*

19	1	27	23·5	88	49 16
28	1	27	27·2	88	49 19

Morning and Evening Stars.

☿ Mercury is an evening star, setting W. by S. in first half of month, and W.S.W. in the latter half. At greatest distance from the Sun on the 8th, at *6h. morn.*

♀ Venus is an evening star, setting at first W. by S., and afterwards W.S.W.

♂ Mars rises in the evening, a little S. of E., shortly after sunset.

♃ Jupiter is an evening star, rather too near the Sun for observation; in conjunction on the 18th.

♄ Saturn rises in the evening E. by N.

On the 1st of September, Cepheus, Pegasus, Aquarius, and Piscis Australis will be on the meridian at midnight.

In Pegasus is a fine globular cluster of very small stars, 3½′ in diameter, 4½° north-west of ε Pegasi, much condensed towards the centre, where the stars cannot be resolved; there are many telescopic and several rather bright stars in the field. Aquarius contains a fine cluster of stars, condensed in the centre, and presenting a true globular form, consisting of very small stars very much compressed. It is situated in R.A. *21h. 28m.* and Decl. 1° 20′ S.

In the early evening at the beginning of the month, the bright cluster in Capricornus, situated in R.A. *21h. 35m.* and Decl. 23° 40′ S., can be observed. The best evenings for observation are those immediately before and after the 14th.

PHASES OF THE MOON.

☾ Last Quarter 6*d.* 6*h.* 44*m.* Morning.
● New Moon 14 8 13 Morning.
☽ First Quarter 22 7 4 Morning.
○ Full Moon 28 10 7 Afternoon.
Apogee 13*d.* 0*h.* A. 252,700.
Perigee 28*d.* 5*h.* M. 222,300.

RAIN FELL IN OCTOBER, 1903, on 18 days; total fall, 1·98 inches; *below* the average, 1841–90, by 0·83 inch.

MONTHLY NOTES.

October 1. Revising Barristers must complete revision of all lists of voters by 12th.—Pheasant shooting begins.—Common Lodging-houses to be whitewashed in the first week.

5. Dividends due. 9. Various Licences expire.
14. Fire Insurances must be paid.
18. Quarter Sessions begin.
23. Borough Councillors to be nominated.

Mean Longitude of Moon's Ascending Node, October 1, 70° 37′ 11″.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA

October 1. Day breaks at 4*h.* *morn.*, and Twilight ends at 7*h.* 3 *aft.*, the length of the Day be 11*h.* 38*m.*

Oct. 1. Occultation of 38 Arie magnitude 5·2. The disappeara takes place at 8*h.* 25*m.* *aft.*, from the vertex; the reappeara at 9*h.* 20*m.* *aft.*, 273° from vertex.

Oct. 5. Mean time of Sun's se diameter passing the meri 1*m.* 4·3*s.*

Oct. 6. Occultation of κ Ge norum; magnitude 3·7. The appearance takes place at 59*m.* *aft.*, 76° from the vertex; reappearance at 0*h.* 34*m.* *mo* on the 7th, at 2° from the verte

Oct. 18. Venus in conjunct with the Moon, 4*h.* 4·0*m.* *m* ♀ 2° 17′ S.

Oct. 20. Mean time of Sun's se diameter passing the merid 1*m.* 5·4*s.*

Oct. 27. Saturn in conjunct with the Moon, 7*h.* 48*m.* *aft.*, 1° 17′ N.

Oct. 28. Mercury at grea elongation (18° 31′) West, 7*h.* *m*

Oct. 29. Occultation of ξ Arie magnitude 5·5. The disapp ance takes place at 0*h.* 22*m.* *m* 123° from the vertex; the appearance at 0*h.* 46*m.* *morn.*, from the vertex. 31 Arietis; n nitude 5·6. The disappeara takes place at 6*h.* 32*m.* *morn.*, from the vertex; the reappear at 6*h.* 57*m.* *morn.*, 274° from vertex.

Oct. 30. Occultation of ω¹ Ta magnitude 5·8. The disappear takes place at 5*h.* 51*m.* *aft.*, from the vertex; the reappear at 6*h.* 40*m.* *aft.*, 292° from vertex. ω² Tauri; magnitude The disappearance takes plac 9*h.* 31*m.* *aft.*, 43° from the ver the reappearance at 9*h.* 57*m.* 351° from the vertex.

Oct 31. Occultation of B. 20° 751; magnitude 5·9. The appearance takes place at 0*h.* *morn.*, 82° from the vertex reappearance at 1*h.* 28*m.* *m* 269° from the vertex.

In this month the Mo decrease 52*m.*, and the Aftern 1*h.* 4*m.*

MORNING AND EVENING STARS.

☿ MERCURY is a morning star in the latter half of the month, rising E. by S. In inferior conjunction with the Sun on the 12th, at *4h. aft.*

♀ VENUS is an evening star, setting S.W. At greatest distance from the Sun on the 15th, at *11h. morn.*

♂ MARS rises in the evening about sunset. E. by S. Stationary on the 26th, at *5h. aft.* ♃ JUPITER is a morning star, rising nearly due E. In Virgo, not far from η Virginis.

♄ SATURN rises in the early evening, in the constellation Pisces.

On the 1st of October, Cassiopeia, Andromeda, Pisces, and Cetus are on the meridian at midnight: while Cancer and Orion are rising, and Hercules and Capricornus setting.

In Andromeda, near to the 4th mag. star *v*, is a large and irresolvable Nebula in the form of an elongated ellipse. It is situated in R.A. *0h. 37m.* and Decl. 40° 43′ N. In Sept., 1885, a decided stellar nucleus was observed in R.A. *0h. 36m. 31s.*, Decl. 40° 38′ N., probably unconnected with the Nebula. Very many minute stars can be seen within the Nebula.

A fine double cluster of stars, situated midway on a line joining *α* Persei and *γ* Cassiopeiæ, may be observed in this month. The northern cluster is a magnificent collection of stars, 30′ in diameter, ranging in magnitude from the 6th to 14th. The smaller southern cluster, 15′ in diameter, is less rich in stars, and much condensed toward the centre. On fine nights, without moonlight, such as those about the 13th, these objects afford one of the most beautiful subjects for observation.

Mean Longitude of Moon's Ascending Node, November 1, 68° 58′ ♊.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

November 1. Day breaks at 5*h.* 1*m. morn.*, and Twilight ends at 6*h.* 27*m. aft.*, the length of the Day being 9*h.* 38*m.*

Nov. 1. Occultation of 121 Tauri; magnitude 5·4. The disappearance takes place at 5*h.* 34*m. morn.*, 101° from the vertex; the reappearance at 6*h.* 15*m. morn.*, 173° from the vertex.

Nov. 4. Occultation of A Geminorum; magnitude 5·0. The disappearance takes place at 10*h.* 47*m. aft.*, 80° from the vertex; the reappearance at 11*h.* 27*m. aft.*, 355° from the vertex.

Nov. 6. Occultation of η Leonis; magnitude 3·6. The disappearance takes place at 0*h.* 36*m. morn.*, 97° from the vertex; the reappearance at 1*h.* 18*m. morn.*, 11° from the vertex.

Nov. 8. Occultation of ν Virginis; magnitude 4·2. The disappearance takes place at 5*h.* 4*m. morn.*, 163° from the vertex; the reappearance at 6*h.* 19*m. morn.*, 317° from the vertex.

Nov. 19. Occultation of 33 Capricorni; magnitude 5·6. The disappearance takes place at 9*h.* 14*m. aft.*, 337° from the vertex; star not visible at Greenwich at the reappearance.

Nov. 22. Occultation of 33 Piscium; magnitude 4·6. The disappearance takes place at 8*h.* 28*m. aft.*, 77° from the vertex; the reappearance at 9*h.* 29*m. aft.*, 192° from the vertex.

Nov. 25. Occultation of 38 Arietis; magnitude 5·2. The disappearance takes place at 6*h.* 27*m. aft.*, 140° from the vertex; the reappearance at 7*h.* 13*m. aft.*, 232° from the vertex.

Nov. 27. Total Eclipse of the Moon, partly visible at Greenwich. See p. 83.

Nov. 28. Occultation of 132 Tauri; magnitude 5·1. The disappearance takes place at 7*h.* 43*m. aft.*, 87° from the vertex; the reappearance at 8*h.* 32*m. aft.*, 331° from the vertex.

Nov. 29. Occultation of ε Geminorum; magnitude 3·2. Disappearance not visible at Greenwich; reappearance at 5*h.* 49*m. aft.*, 335° from the vertex.

In this month the Mornings decrease 49*m.*, and the Afternoons 39*m.*

19	1	27	25·3	88	49	39
28	1	27	20·5	88	49	41

Morning and Evening Stars.

☿ Mercury is a morning star, rising E. by S., later in the month E.S.E., and at end of the month S.E. by E.

♀ Venus is an evening star, setting S.W. In conjunction with the Moon on the 17th, *4h. 27m. morn.* ♀ 0° 6′ S.

♂ Mars souths between *8h.* and *9h. aft.*

♃ Jupiter is a morning star, rising a little S. of E

♄ Saturn souths between *9h.* and *10h. aft.* In conjunction with the Moon on the 24th, *2h. 53m. morn.* ♄ 1° 32′ N.

On the 1st of November, Perseus, Aries, and Cetus are on the meridian at midnight.

An irresolvable Nebula 2½° to the East of γ Andromedæ may be observed in this month. It was discovered by Miss Herschel, with a small reflecting telescope of twenty-seven inches in focal length. It is a very elongated Nebula, 15′ long by 3′ broad, with a cleft, dark in the middle, and suggests the idea of a vast flat ring seen very obliquely. It is in R.A. *2h. 16m.* and Decl. 42° 49′ N. The best evenings for observing it are those about the 12th.

Juno can be well observed in this month. See p. 94.

Eclipses, Occultations, and other Celestial Phenomena.

December 1. Day breaks at 5*h* 41*m*. *morn*., and Twilight ends at 5*h*. 57*m*. *aft*., the length of the Day being 8*h*. 8*m*.

Dec. 16. Venus in conjunction with the Moon, 3*h*. 10*m*. *aft*. ♀ 2° 50′ N.

Dec. 22. Occultation of ξ Arietis ¼ magnitude 5·5. The disappearance takes place at 6*h*. 45*m*. *a*.*m*., 115° from the vertex; the reappearance at 7*h*. 41*m*. *aft*., 212° from the vertex.

Dec. 23. Occultation of 31 Arietis magnitude 5·6. The disappearance takes place at 1*h*. 47*m*. *morn*., 348° from the vertex; the reappearance at 2*h*. 28*m*. *morn*., 253° from the vertex.

Dec. 24. Occultation of ω² Tauri magnitude 4·6. The disappearance takes place at 6*h*. 10*m*. *aft*., 65° from the vertex; the reappearance at 6*h*. 58*m*. *aft*., 326° from the vertex. B.D. + 20° 751; magnitude 5·9. The disappearance takes place at 9*h*. 5*m*. *aft*., 89° from the vertex; the reappearance at 10*h*. 18*m*. *aft*., 245° from the vertex.

Dec. 26. Occultation of 121 Tauri magnitude 5·4. The disappearance takes place at 2*h*. 42*m*. *morn*., 105° from the vertex; the reappearance at 3*h*. 15*m*. *morn*., 165° from the vertex.

Dec. 27. Occultation of ε Geminorum; magnitude 3·2. The disappearance takes place at 3*h*. 13*m*. *morn*., 58° from the vertex; the reappearance at 6*h*. 9*m*. *morn*. 230° from the vertex. A Geminorum; magnitude 5·0. The disappearance takes place at 6*h*. 50*m*. *aft*., 76° from the vertex; the reappearance at 7*h*. 26*m*. *aft*., ☌ from the vertex.

Dec. 28. Occultation of κ Geminorum; magnitude 3·7. The disappearance takes place at 5*h*. 21*m*. *morn*., 62° from the vertex; the reappearance at 6*h*. 21*m*. *morn* 239° from the vertex.

Dec. 31. Occultation of *i* Leonis magnitude 5·7. The disappearance takes place at 8*h*. 6*m*. *morn*. 30° from the vertex; the reappearance at 8*h*. 47*m*. *morn*., 304° from the vertex.

In this month the Morning decrease 23*m*., and the Afternoons increase 5*m*.

Horizontal Equatorial Parallax of Sun and Planets.

Morning and Evening Stars.

☿ Mercury is an evening star after the middle of the month, setting S.W. In superior conjunction with the Sun on the 3rd, at *6h. morn.*

♀ Venus is an evening star, setting S.W. by W.

♂ Mars souths in the evening about *7h. aft.*

♃ Jupiter in Virgo, midway between α and η Virginis at the end of the month.

♄ Saturn in the constellation Pisces, southing in the early evening.

On the 1st of December, at midnight, the constellations Camelopardus, Taurus, and Eridanus will be on the meridian.

In Taurus is a fine Nebula of a pearly white colour 1½′ North-west of ζ Tauri. Lord Rosse compared its appearance to that of a crab, and it is generally known as the "Crab Nebula."

About the middle of December Orion souths at midnight, and can be best observed in this month.

This magnificent constellation contains the grandest of all the Nebulæ, situate in the Sword-Scabbard. A line drawn from α Orionis through ζ, the third star of the belt, will pass over θ Orionis and the Nebula. It can be seen with the naked eye on any clear night. Evenings about the 12th are the best.

Neptune and Juno can be well observed in this month. See p. 94.

Standard Time.

It is well known that the "time of day" differs everywhere except in places on the same meridian, the difference in local times being caused by the rotation of the Earth on its axis from West to East in each twenty-four hours; and as the globe is divided astronomically into 360° of longitude, reckoned by us from the meridian of Greenwich, 180° to the East and 180° to the West, it is easily seen that each 15° is equal to one hour of time.

The notice, "London (Greenwich) time observed at all stations," formerly so familiar to the travellers by railway, was really the introduction to the use of *Standard Time*, and was inevitable when railway time-tables were printed; but in a country so large as the Dominion of Canada, which extends over 80° of longitude, as also in the United States with nearly 60°, it soon became absolutely necessary to minimise the great inconvenience, and so the use of Standard Time was made legal.

By *Standard Time* is meant that the hour of each 15° of longitude becomes the local mean time for the zone or belt extending 7½° on each side of the central meridian; though in practice the zone has to be adapted to local circumstances, and so cannot conform to the exact line or meridian, but is arranged to suit boundaries of States or Provinces as may be most convenient. By way of illustration, it may be noted that in the Province of Ontario, Canada, by Act of the Legislature, the hour of 75° W. is Standard Time for the Province as far as 89° W., and that the S.W. point, 83° W., extends westerly beyond the eastern part of the State of Michigan, where the time of 90° W. is used; so at Windsor, Ontario, it is noon while in Michigan—more to the east—it is 11 A.M. The *Standard Time* as used in the chief cities of Canada and the United States may be noted: at Quebec, Montreal and Toronto, at Boston, New York and Washington, the time of 75° W., five hours earlier than Greenwich, is used; at Winnipeg in Manitoba, and at Detroit, Chicago and New Orleans, the time of 90°, six hours earlier than Greenwich, is used; at Regina and Denver it is the time of 105°, seven hours earlier than Greenwich; and in British Columbia and at San Francisco the time of 120° W., eight hours earlier than Greenwich, is used; and when 180° is reached another day begins in Eastern Siberia, at the Fiji Islands, and a little to the east of New Zealand.

The same rule applies to places east of Greenwich, where, of course, noon is earlier than at Greenwich according to the longitude. Spain adopted Standard—that is, Greenwich—Time early in the century. When noon at Greenwich it is 2 P.M. in Egypt and South Africa; it is 6 P.M. at Calcutta, 90° E.; in Japan, 135° E., it is 9 P.M.; and in Eastern Australia, 150° E., it is 10 P.M.

The question has been asked very often, "Where does a day begin?"—that is, any special day, New Year's Day or Easter Day—and the answer is that for all peoples, nations, and languages, using maps with longitude East and West from Greenwich, each day begins at the meridian of 180°, slightly east of New Zealand in the South, and intersecting Eastern Siberia in the North, and so the last day of the nineteenth century and the first day of the twentieth were on the Earth together, not running concurrently or side by side, north and south of the Equator, as has been supposed, erroneously, but the latter following the former from 180° westerly to Greenwich, and on again to 180°, where it gave place to January and.

* Peculiar to Russia.

Julian Calendar.

IN the Roman (Julian) Calendar the months corresponded exactly with our own, excepting that down to the time of the great Emperor Augustus, the fifth and sixth months of the year —which, with the Romans, began with March— were called Quintilis and Sextilis; afterwards they were named in honour of the emperors, Julius and Augustus.

In reckoning the days of each month three fixed points were taken, and any particular day was said to be so many days *before* the next coming fixed day. These three points were (1) the Kalends, by which name the first of each month was known; (2) the Nones, which fell on the seventh day of the month in March, May, July, and October, and on the fifth day in each of the other months; and the Ides, which always fell eight days after the Nones.

For example, the 1st of January was the Kalends of January (*Kalendis Januariis*), the 31st of December was the day before the Kalends of January (*pridi Kalendas Januarias*); but Dec. 30th was the third day before the Kalends of January (*ante diem tertium Kalendas Januarias*), in this case both Jan. 1st and Dec. 31st being included in the reckoning. And so on back to Dec. 14th, which was the nineteenth day before the January Kalends (*ante diem undevicesimum Kal. Jan.*), Dec. 13th being *Idibus Decembribus*, the Ides of December. In Leap-year, both Feb. 24th and Feb. 25th were known as the sixth day before the March Kalends, being distinguished respectively as *prior* and *posterior*.

Table for Finding the Times of Sunrise and Sunset.

THIS double entry table provides the means for finding, with sufficient accuracy for all practical purposes, the times of sunrise and sunset for any place situated between latitudes 0 and 66°.

To use the table: With the Sun's declination, or the first column, and under the required latitude on the horizontal line, will give the apparent time of sunset. Subtracting the time so found from 12*h*. will give the apparent time of sunrise. To obtain the mean or clock time, the numbers in the column headed *before* or *after* clock (which will be found on the second page of each month), giving the difference in time between the mean and true sun for each day in the year, must be applied to the apparent times of sunrise and sunset, as the particular case may require; that is to say, if the true sun is *before* the clock the equation of time must be subtracted from the apparent to obtain the mean or clock time, and if *after*, added.

The table is arranged for northern latitudes, but will serve equally well for places south of the Equator by changing the declination from North to South and *vice versâ*.

If the time of sunrise or sunset should be required for any declination or latitude falling between the arguments in the table, these times may easily be found by simple proportion.

The corrections derived from the above Table are all additive. To make them so the above quantities have been increased by 1′, and therefore the final result must be diminished by that amount.

To obtain the Sidereal Time corresponding to a given Mean Solar Time, we must take, from the second page of the month, the preceding Sidereal Time at Mean Noon, and add to it the Sidereal Equivalents corresponding to the hours, minutes, and seconds of the given Mean Time. Should the sum come out more than twenty-four hours, that amount must be subtracted from it. As an example, let the Sidereal Time corresponding to the Mean Time of June 2, 11*h.* 3*m.* 12*s.*, be required;—

		H.	M.	S.
Sidereal Time at Mean Noon, on June 2		4	42	15
Mean Time intervals and Sidereal Equivalents	11*h.* =	11	1	48·42
	3*m.* =		3	0·49
	12*s.* =			11·03
Corresponding Sidereal Time		15	46	14·94

essary to correct, in calculating ... place, by a quadrant, also be used to show the acceleration of Sidereal on Mean Solar intervals by subtracting the relative positions in Time arguments from their sidereal equivalents.

altitude.

TIDES AND TIDAL WAVES.

is not possible within the limits assigned to article to enter minutely into all the causes ch produce the complex phenomena of the s, though the most prominent factors may explained without having recourse to the er mathematics necessary to a full compre- sion of this difficult subject.

he Newtonian law of gravitation teaches us at every particle of matter in the universe acts every other particle, with a force varying rsely as the square of their mutual distances, directly as the mass of the attracting particle."

ippose the Earth to be a sphere covered by a of uniform depth, and the Earth and Moon tively at rest, then the layer of water nediately under the Moon will be attracted e per unit of mass than the Earth, and ped up towards the Moon; the layer of er on the opposite side of the Earth will be racted less than the solid Earth per unit of s: being further off, the water here will be ped up away from the Earth and Moon. these opposite places there will be high er, though in this latter case not quite so n as in the former. The sea will thus have y nearly the form of a prolate spheroid, h the major axis passing through the Earth Moon. At places situated on a circle 90° n the major axis there will be low water.

s the Moon revolves around the Earth, and Earth rotates on its axis, this figure never time to perfect itself, and an imperfect form it travels round the Earth in a lunar day, ich is longer than a civil day by about ninutes. So that high water occurs, generally aking, about that time later at the same place h day.

esides the Moon, the Sun exerts a consider- e disturbing force, producing tides exactly ilar to those produced by the Moon, but aller in effect, for although the mass of the is immensely greater than that of the Moon, his distance from the Earth is such that the io of his tide-producing force to that of the on is as 1 to 2¼. The observed tide, there- e, is the effect of the superimposed lunar and ar tides. Calculation shows that the difference ween the major and minor axes of the spheroid to the Moon alone amounts to 58 in., and ording to the ratio above would make the same erence due to the Sun alone about 25¼ in.

t New or Full Moon these two bodies are ing in concert, and as a consequence the s are higher and lower; with the Moon in drature they are acting in opposition, and se tides are neither so high or low: in the mer we have the Spring, and in the latter Neap tides. It is not strictly true to say t high water takes place immediately under Moon, because, owing to the irregular dis- ution of land and water, with the variation he depth of the ocean, an amount of friction caused which retards the passage of the al wave, making it come later than it other- e would. This retardation is a matter of ervation peculiar to each locality, and known hnically as the Establishment of the Port. e actual high tide being that produced by the ted action of the Sun and Moon, makes it essary to correct the Establishment of the t, in calculating the times of high water at y place, by a quantity depending upon their ative positions; thus, at the intermediate phases of the Moon between New Moon and First Quarter, the Sun passes the Meridian before the Moon and, pulling the tidal wave towards the West, accelerates the time of high water: this is called the priming of the tides. On the other hand, between First Quarter and Full Moon the tide lags. In like manner, between Full Moon and Last Quarter the tide primes, and from Last Quarter to New Moon lags. Since Newton's time the theory of the tides has been improved by the several mathematicians who have taken the problem in hand, but, from our want of knowledge of the depth of the ocean and the geography of its bottom, cannot yet be considered perfect.

With our actual geography many local complications arise: seas like the Mediterranean, Baltic, or Euxine offer so small an area that the Moon can only act upon each as a whole, and there is practically no tide. The disturbing action requires a very wide expanse of deep water, such as the great Southern Ocean, or the S. Pacific; and there, accordingly, is assigned the birthplace of our great tidal wave, to which many tides in distant seas are referred. One mighty pulse enters the Pacific in a N.W. direction, and another the Atlantic, both to be modified by the depth of water and the form of the coasts, and both extending to the bottom of the ocean. Owing to the islands of the Pacific the tides there become small as the impulse travels north; but in the long deep trough of the Atlantic the tidal force attains a velocity of from 600 to 650 miles an hour. The western impulse across the S. Pacific reaches Tasmania in 12 hours, and in 12 hours more dashes against Hindostan and S. Africa. Another 12 hours and the tidal wave has reached Newfoundland on the West, and the African Cape Blanco on the East. Turning eastward across the N. Atlantic, the tide in 4 hours is split into two waves at Land's End, one of which goes slowly up the shallow English Channel, while the main branch is borne round the North of Scotland—to bring high water to Aberdeen and the coasts of Norway and Denmark—and finally reaches the mouth of the Thames in 48 hours after leaving the Antarctic Ocean. The Atlantic, being deep and free of islands, produces an independent tide, which helps to modify the tidal impulse from the South, one result being the famous high tides of the Bay of Fundy.

The tides are locally affected by the configuration of the coasts, and also to a slight extent by the changes of atmospheric pressure. Where the tidal wave enters gulfs or estuaries which open in its direction, the difference between high and low water is much increased—*e.g.*, Bristol Channel, 40 to 60 ft.; St. Malo, in the English Channel, 50 ft.; Chepstow, 60 ft.; Bay of Fundy, 70 ft. up to 100 ft. in the highest spring tides. The "bore" or "eagre" on certain rivers occurs when the advanced portion of the tidal wave moves so slowly, owing to shallowness or other circumstances, that the succeeding waters gather in a heap—*e.g.*, Severn "head," 3 ft. high; Hoogly, 5 ft.; Amazons, 12 to 15 ft.—that on the Tsien Tang in China has been estimated to flow up the river with a velocity of 13 miles an hour. Another curious local modification of the tides is seen at Southampton, Poole, Weymouth, &c., where two tides occur in 12 hours; a similar anomaly near Clackmannan, on the Firth of Forth, is known as the "leaky tides."

The following heights of tides on the Thames,

with the distance of their respective stations from the mouth of the river, are from *Phil. Trans.* (cxxiii. 204):—

	Height.	Distance.
	ft. in.	m.
London Docks	18 10	60
Putney	10 2	67½
Kew	7 1	73
Richmond	3 10	76
Teddington	1 4½	79

The lunar tides, according to the results of recent investigation, are by friction slowly interfering with the Earth's rotation, and therefore lengthening our day. This must go on through countless centuries till the Earth's time of rotation is equal to a lunation, when the lunar tides will no longer exist, and our seas be disturbed only by the weak action of the solar tides.

OUR SEASONS.

The revolution of the Earth in its annual orbit round the Sun has the effect of causing the latter body, seemingly, to describe a complete revolution among the Stars in the course of a year. If the plane of this apparent path had been parallel to the Earth's Equator, the Days and Nights would be equal all over the Globe, and each place on the Earth would have one constant Season, the character of which would depend on its geographical latitude. Instead of this coincidence of planes, the Equator and Ecliptic (as this apparent path of the Sun is called) are mutually inclined to each other at 23½°; consequently, the Sun is alternately seen above and below the Equator by this amount, causing the phenomena of Summer and Winter: giving long days and Summer to the Northern Hemisphere when the Sun is North of the Equator, and short days and Winter when South of it.

This inclination of the two planes causes the Sun to cross the Equator twice in the year, viz., in the Spring and Autumn, at which times the Days and Nights are equal all over the world.

From Spring, through Summer to Autumn, the Sun traverses exactly one-half of the Ecliptic, and from Autumn, through Winter to Spring, the other half; but that these halves are not travelled over in equal times will be seen by an inspection of the times at which the different Seasons commence. It appears that the Sun is longer in performing the Summer than the Winter half; this is caused by the eccentricity of the Earth's orbit and the Law of Areas—a law which requires that an imaginary line, joining the Earth and Sun, shall sweep over equal areas in equal times. The Earth when farther from the Sun, as at the Summer Solstice, must move more slowly than at the Winter Solstice; because then the line joining the two bodies is longer. The effect is to detain the Sun about eight days longer in the Northern than in the Southern Hemisphere.

The Earth's atmosphere is generally supposed to extend some forty miles in height, probably farther, but becoming, at only a few miles from the surface, of too great a tenuity to support life. The condition and motions of this aërial ocean play a most important part in the determination of climate, modifying, by absorbing, the otherwise intense heat of the Sun; and, when laden with clouds, hindering the Earth from radiating its acquired heat into space. The amount of heat absorbed in its passage throug the atmosphere will depend upon the thickne of the stratum which the rays have to penetrat and this on the meridian altitude of the Sun.

If the surface of the Globe were smooth, a consisted entirely of land or water, the me temperature of our Seasons would depend sol on our geographical latitude; but being, it is, made up of water and land very unequa distributed, the former occupying two-thir of the entire surface of the Globe, the te perature of the Seasons at places on the sa parallel of latitude is modified by the s rounding masses of land and water. The gr capacity of water for heat, and its low power radiation, make the great Ocean, extending fr Pole to Pole, the reservoir which stores up for the heat it has received from the Sun; wh the land, radiating its heat very quickly, wo soon grow cold. The principal medium which this heat is conveyed to the land is t of the Winds, which, receiving their warm and moisture from the water, pass over land, and compensate for the loss of h which the latter suffers from radiati From this cause it is that islands en more equable Seasons than inland countr being neither so cold in Winter nor so hot Summer; since the same clouded skies t retard the cooling of the land by radiation shield it from the rays of the Sun in Sumr But in the interior of continents, where winds have lost their moisture on their pas from the coast, great extremes are known prevail between the Summer and Winter t peratures. We must not forget that the oc and seas are traversed by currents of w water from the Equatorial regions, which gre promote the distribution of heat.

VARIABLE STARS.

Although the Stars generally shine with form brightness, there are among them s remarkable exceptions to this general rule. earliest known, and the most remark amongst this class of Stars, is one situate the constellation Cetus, and known by name of *o* Ceti, or Mira Ceti. It has a p of nearly 331·6 days; that is to say, it through its cycle of variations in that leng time, continuing for about twelve or fou days at its maximum brightness, which h some of its maxima, reached to the second of magnitude; it then goes on decreasin some three months until it becomes invisib which condition it remains for five more mo when it again goes on increasing to the e the period, when the maximum is again rea but the order of magnitude is not alway same at successive maxima. The mon October is the best time for observing it. recent observations seem to show that thi has now settled down to the 8th magn after having exhausted its changes of magn It will be found in R.A. 2*h.* 14*m.* 45*s.* and Declination 3° 23′.

Another remarkable Variable Star is A Persei. This has a very short perio quite three days—and has a range of m tude from 2·2 to 3·7. It continues maximum for two days and a half, then to decrease very suddenly, and in rather than four hours is reduced to a Star of the fourth magnitude; after remaining magnitude for a quarter of an hour, it

ains to its maximum in the same time that ook in passing from it to the minimum. This r will be found in R.A. 3*h.* 2*m.* 15*s.* and North clination 40° 36′. It can be well observed October and November.

Ophiuchi varies from the 6th to the 6¾ gnitude, with a period of 20*h.* 8*m.* It may be served in June, soothing about midnight on e 9th. Will be found in R.A. 17*h.* 11*m.* 55*s.* d North Declination 2° 19′.

The Variable Star β Lyræ is remarkable in ving a double period, viz., two maxima and o minima—the double period being very arly equal to thirteen days; the difference tween the maximum and minimum is only one gree of magnitude. There is another pecu- rity in the changes of this Star—that, although e two maxima are equal, the minima are equal. It is situated in R.A. 18*h.* 46*m.* 43*s.* d North Declination 33° 15′. The best time r observing it is in the months of June and ly. Bright lines are occasionally seen in the ectrum of this Star.

The Star δ Cephei is also subject to consider- le variations in magnitude, passing from the ird to the fifth with a period of 5½ days. In ssing from the minimum to the maximum it cupies less time than that required for it to ach the minimum again—in the proportion 38 hours to 91. It is to be found in R.A. *h.* 25*m.* 47*s.* and North Declination 57° 57′. igust and September are the best months in hich to observe it.

There are two hypotheses suggested to explain e phenomena exhibited by the variable or riodical Stars; one of which endeavours to count for the variations in magnitude by sup- sing that opaque bodies are revolving around ese particular Stars, and that at certain times ey are interposed between the Earth and the ar, and so cut off from us a portion of the minous rays of the latter. The other hypothesis ggests that the Stars themselves may have rtions of their surface of unequal brightness, d that in their rotations they present to in turns these more or less bright parts, d so cause the variations that we observe. is theory fails to explain the changes observed the stars of the Algol type, and is only applic- le to such as are quite regular in their fluc- ations. Professor Pickering has shown that ne of the theories put forward to account for e variability of the light of such stars as Algol ll satisfy the observed changes, except that of opaque or less bright satellite. Adopting is theory (which is now generally accepted), he ds theoretically a satellite whose position and ovements would agree with the observed cts.

TERRESTRIAL MAGNETISM.

Magnetism is that property possessed by rtain bars of steel, called Magnets, of attract- g pieces of iron and also other magnets: yond this idea very little, if any, meaning is pularly attached to the term Magnetism.

Every magnet has two poles, each pole having, the term implies, exactly opposite properties, ch that if we suspend one magnet by a thread e to move in any direction it will be found at on bringing another magnet, held in the nd, near to one end of the suspended magnet, the opposing poles of each are of like proper- s, they will repel each other, but if of unlike, ey will be attracted towards each other. In the mariner's compass we have a case of this kind, where the compass-needle is so suspended as to be free to move in the horizontal direction, the Earth itself being the other magnet, with its South Pole near to the Earth's North Pole, and its North Pole near to the Earth's South Pole; so that the North Pole of the compass will always point to the Magnetic South Pole of the Earth, differing from the true or astronomical north by a quantity called the "variation." The variation of the compass is not only different for different places on the Earth, but is, moreover, liable to slow variation from year to year. In 1580, at London, the needle had an eastern variation of about 11½°; between 1657 and 1662 its direction coincided with the plane of the astronomical meridian; that is to say, the variation, or declination, as it is generally called, was zero; since then it travelled westwards, and reached the maximum western declination in 1815, and is at the present time (1908) slowly moving towards the East.

The compass-needle, being constructed to move in a horizontal direction only, exhibits that component of the total magnetic force which determines the declination; but if the needle had been mounted on a horizontal axis, placed in the magnetic meridian, and left free to move in a vertical plane, it would have been found to *dip*, as it is technically called, or be inclined at an angle to the horizontal plane, the North Pole of the needle being depressed. The value of this *inclination* or *dip* varies in different places on the Globe, increasing towards the Poles, so that in the Northern Hemisphere, at the Magnetic Pole, we shall have the north end of the needle pointing directly downwards.

This North Magnetic Pole was found by Sir James Ross to be situate in 97° W. longitude and 70° N. latitude. The South Magnetic Pole is situated in about 168° E. longitude and 76° S. latitude. Between these points there are found places of no *dip*; all such places are said to be situated on the Magnetic Equator, a plane not far removed from the terrestrial Equator. The *dip*, like the declination, is subject to secular and other variations, the true laws of which are not yet understood, but for the investigation of which magnetic observatories have been established all over the world, and elaborate series of observations made on the motions of suspended magnets (their movements in most observatories being automatically recorded by photography), furnishing a continuous record from hour to hour, and year to year, of the forces acting upon them.

FORECASTING THE WEATHER.

All outdoor pursuits, undertaken for profit or pleasure, depend so much upon the weather that we can imagine mankind to have taken an interest in its study from very early times; and, as a matter of fact, the popular ideas about weather prognostics are much the same as those which were in vogue in the earliest ages. Aristotle, in his book on Meteors (which, in his time, were supposed to have an atmospheric origin), collected all the then known prognostics of the weather, but in this work no serious attempt is made to explain the phenomena observed. In the cases where the attempt is made, the explanations offered are often very absurd, and show entire ignorance of the principles of physical science.

The observation of the state of the sky taught

the meteorologists of early times when to expect variations in the weather, and the result of these observations, formulated into short and pithy sayings, made up, until quite recent times, the science of weather prognostics.

Birds and beasts are all more or less sensitive to coming changes in the weather, and by observation of their movements, warning of changes in the weather may be obtained. Among other instances, it is observed that sea birds, as stormy weather comes on, fly inland in search of food; wild fowl leave the marshy grounds for higher localities; swallows and rooks fly low before and during bad weather; frogs are unusually noisy before rain; sheep huddle together near bushes and trees.

It was not until the discovery of the barometer, in **1643**, that the first great step was made towards a knowledge of the nature of our atmosphere. We were then, by its help, enabled to ascertain the weight and pressure of the great aërial ocean which surrounds us, and to learn when and where it was in a state of calm or storm. The invention of the thermometer, shortly afterwards, gave the means of determining its temperature. The hygrometer, for showing the amount of moisture it contained, and the anemometer, for giving the direction and force of the wind, are also instruments of great importance to the meteorologist. The indications of these instruments, combined with the careful observation of atmospheric appearances, interpreted by the results of former observations, will enable the individual observer generally to predict the kind of weather that may be expected in his immediate locality for a day or sometimes longer in advance.

A strip of sea-weed forms a very useful hygrometer for practical purposes, provided it be not kept in a room warmed artificially. In fine weather it will keep dry and have a somewhat dusty feeling, but with an increase of moisture in the air will become limp and sticky, indicating a probable change of weather in the shape of rain.

Since the time of Admiral FitzRoy the science of weather forecasting has made much progress in its details, but, for the individual observer, the method remains much the same now as then. The principal rules in use for forecasting the weather may be briefly stated as follows:—

A rising barometer usually foretells less wind or rain, and a falling barometer more wind or rain, or both; a high barometer, fine weather, and a low one the contrary.

If the barometer has been *about* its ordinary height at the sea level, and is steady or rising, while the thermometer falls and the air becomes drier, north-westerly, northerly, or north-easterly wind, or less wind, may be expected; and, on the contrary, if a fall takes place with rising thermometer and increasing dampness, wind and rain may be looked for from the south-east, south, or south-west; a fall of the barometer, with low thermometer, foretells snow.

With the barometer *below* its ordinary height a rise foretells less wind, or change in the direction towards the north, or less wet; but when the barometer has been low, the first rising usually precedes strong wind or heavy squalls from the north-west, north, or north-east, and continued rising foretells improving weather. If the barometer falls and warmth continues, the wind will probably *back*, and more southerly or south-westerly winds will follow.

In northern latitudes the heaviest northerly gales occur after the barometer first rises from a very low point. A rapid rise generally indicates unsettled weather; slow rise or steadiness, with little moisture in the atmosphere, fair weather. A considerable and rapid fall signifies stormy weather and rain. The barometer generally falls with a southerly and rises with a northerly wind, though sometimes the contrary happens, and then the southerly wind is dry and the weather fine, or the northerly wind wet and violent.

When the barometer sinks considerably, high wind and rain or snow will follow; wind from the northward, if the thermometer is low for the season; from the southward, if high.

When a gale sets in from the east or south-east and wind *veers* by the south, the barometer will continue falling till the wind becomes south-west, when, after a lull, the gale will be renewed.

The north-east wind tends to *raise* the barometer most, and the south-west to lower it most.

Instances of fine weather often happen with a low barometer, and are generally followed by a duration of wind or rain, or both.

Predictions founded solely on the indications of the barometer and thermometer may be made with more certainty if combined with careful observation of the appearance of the sky, and the atmospheric effects peculiar to the particular locality.

A rosy sky at sunset, whether clouded or clear, a grey sky in the morning, a low dawn (that is, when the first signs of the dawn appear on the horizon), all indicate fair weather. A red sky in the morning indicates bad weather, or much wind; and a high dawn (or when the first signs of the dawn are seen above a bank of clouds) presages wind.

From the clouds we may draw the following conclusions:—Soft-looking and delicate clouds foretell fine weather, with moderate breezes; hard-edged clouds, wind; rolled or ragged clouds, strong wind. A bright yellow sky at sunset also presages wind, and a pale yellow sky wet.

Dew and fog both indicate fine weather, while remarkable clearness of the atmosphere near the horizon (causing distant objects to appear very distinct and nearer than usual) is one of the most characteristic signs of coming wet.

At the present day, by the help of the electric telegraph, the meteorologist can obtain from many stations as he desires the height of the barometer, direction and force of wind, &c., data which will inform him of the condition and movements of the aërial ocean at a definite time. He then marks on a map the height of the barometer at each place, and, drawing lines through all the places where the quicksilver stands at the same height, at any convenient interval, obtains a series of lines of equal pressure or weight, called shortly *isobars*, which show the height or depression at those places as the contour lines on a map show the different altitudes of the mountains and valleys. The thermometer readings, treated in the same way, are called *isotherms*. To make these synoptic charts (as they are called) complete, the force and direction of the wind, the amount of humidity, character of clouds, and other weather signs are also marked down, so that the chart may furnish a view of the weather at that particular time over the area from which reports have been obtained.

Supposing now that at the same time the next day a new set of data are received and marked on another chart, a comparison of the two will show the nature and direction of the changes going on, and enable the meteorologist to

, to a certain extent, what will be the ediately coming weather. This is a general ription of the way in which the forecasts of ther, printed in the daily papers, are made. interpretation of these synoptic charts may appear to the reader to be a very difficult ration, but it must be remembered that eorology is purely a science of observation, as such will be most successfully handled by observer of the greatest experience. From nt of knowledge concerning the laws which ern the fluctuations of the weather, failures he forecasts must happen now and again, and reason can be given why certain states of the nosphere, which previous observation would i us to believe should be stable, suddenly ak up without any apparent warning.

The extended use of the telegraph, due to the roduction of wireless telegraphy on board ps, especially on the great liners between Great tain and America, has already done much, and l probably do still more in the future, to prove our means for forecasting the weather.

Besides the meteorological instruments men- ned above, there is one often used to indicate ather changes which is known as the chemical ather-glass, camphor-glass, or storm-glass. Though sold in London more than a hundred rs ago, no scientific explanation of its indica- ns seems to have been attempted till the late miral FitzRoy took it in hand. He considered t this instrument had a scientific value, ed in conjunction with the barometer and rmometer, in predicting local storms. Some ier writers are at variance with the Admiral this point, affirming that the weather indica- ns of the storm-glass are not to be relied on; other, that light and temperature are the ents that bring about the changes observed.

The instrument itself consists of a mixture of mphor, nitrate of potassium, and muriate of monia, partly dissolved in alcohol, with a little ter. This solution is placed in a long glass vial tube, with some air, and hermetically sealed. me authorities say that a small hole should left in the top to admit the external air.

t one time the upper part of the liquid in the e will appear quite clear, the bottom portion ng occupied by a shapeless mass like melting ite sugar. Again, the liquid portion will be re or less filled with crystallizations like fern- ves or hoar-frost, and under some circum- nces, like stars.

The general rules given for interpreting the dings of the storm-glass are as follows:—

(1) If the undissolved substance lies low and both at the bottom of the tube—fine weather.

(2) If it rises gradually in the shape of fern or ther-like crystallizations—rain.

(3) If it rises much higher than in (*b*), and if the uid portion is less clear, with star-like crystals motion, high wind or storm will follow.

RIGHT ASCENSION.

The Right Ascension of any heavenly body is angular distance measured along the Equator n that point of intersection of the Equator l Ecliptic known as the Vernal Equinox. In time of the ancient astronomers this point s situated in the constellation of Aries, and led by them the "First Point of Aries," but as since then retrograded considerably behind t constellation, and is at present in the con- llation Pisces. Modern astronomers, however, l speak of this zero point, whence Right Ascensions are measured, as the "First Point of Aries." The Right Ascension and Declination are the two co-ordinates which define the position of any point on the celestial sphere with regard to the Equator as a fundamental plane, just as those of longitude and latitude define the position of any place on the terrestrial globe; the meridian of Greenwich being taken as the starting-point by geographers from which to reckon their longitudes, while the astronomer reckons his from the meridian passing through the Vernal Equinox.

Since a well-regulated astronomical clock should show *0h. 0m. 0s.* when the First Point of Aries is on the Meridian, the Right Ascension may be called the Sidereal time of Southing, and the approximate Mean time corresponding to it may be easily found for any object whose Right Ascension is given in this Almanack by means of the column headed Sidereal Time at Mean Noon, printed on the second page of each month. The rule may be thus stated:—*From the given Right Ascension subtract the Sidereal time at the preceding Noon, and further diminish the result at the rate of 10 secs. an hour.* If the Right Ascension should be smaller than the Sidereal time to be subtracted, then **24** hours must be added to it. As an example:—At what time will Arcturus South on May 15?

R. A. of Arcturus	*14h. 11m. 31s.*
Sidereal time at Mean Noon (sub.)	*3h. 30m. 17s.*
	10h. 41m. 14s.
Diminish by the Acceleration for *10h. 41m. 14s.* at *10s.* per hour	*1m. 47s.*
Approximate Mean time of Southing, May 15.....	*10h. 39m. 27s.*

In a similar manner the Sidereal time corresponding to any Mean time may be found by adding the Mean time to the Sidereal time at Noon of that day. As an example, let it be required to find the Sidereal time corresponding to *9h.* P.M. on May 15.

Sidereal time at Mean Noon	*3h. 30m. 17s.*
Mean time ..... (add)	*9h. 0m. 0s.*
	12h. 30m. 17s.
Add for Acceleration for *9h.* at *10s.* per hour	*1m. 30s*
Approximate Sidereal time May 15 at *9h.* P.M.	*12h. 31m. 47s.*

The figures in the second and third columns of the preceding table give the apparent dimensions of Saturn's Ring as seen from the Earth, and refer to the outer limit of the outer Ring. The sign + signifies that the northern surface will be visible, and − the southern surface. The Ring will be invisible when its plane passes through either the centre of the Sun, centre of the Earth, or when the Sun and Earth are on opposite sides of the plane of the Ring.

The figures in the fifth and sixth columns represent respectively the illuminated portions of the discs of Mercury and Venus.

MAGNETIC ELEMENTS.

The following table of mean magnetic elements is derived from the observations made at Greenwich in the respective years, and applies to Greenwich only.

The diurnal variation of the magnetic declination at Greenwich is about 12′ in summer and 7′ in winter. The needle occupies its mean position about 10*h*. a.m., and again about 6*h*. p.m., throughout the year. It reaches its most westerly position about 2*h*. p.m., and its most easterly position during the night or early morning, according to the season of the year. The inclination or dip also varies, from hour to hour, in a similar manner to the declination. The declination and dip are also subject to secular variations, the duration of which is not accurately known. Accidental perturbations, due to magnetic storms, affect the needles. These variations in the position of the magnets occur with great suddenness, deflecting the needle right and left with great rapidity, almost like ordinary telegraphic signalling, and are, generally speaking, coincident with the passage of great outbursts of sun spots across the sun's central meridian.

Year.	Mean Magnetic Declination at Greenwich West.	Horizontal Magnetic Force in C. G. S. Units at Greenwich.	Mean Inclination or Dip of Needle at Greenwich.

Nevil Maskelyne	179
John Pond	181
Sir George Biddell Airy	181
Sir William Henry Mahoney Christie, K.C.B.	181

The Variable Star Algol (Beta Persei).

THIS is one of the most conspicuous and noteworthy variable stars in the heavens. Its remarkable fluctuations of light were probably known to the ancient observers, but the first definite record of its discovery is by Montanari, in 1669, and the accurate determination of its period was not effected until 1782 by Goodricke. At that time the star passed through all its gradations of brilliancy in 2*d*. 20*h*. 48*m*. 59*s*., but the period seems decreasing, for Chandler has recently found it 8½ seconds less. The star is usually a little fainter than 2nd mag., and remains so for about 2*d*. 11*h*., when it rapidly declines in lustre, and in about 4½ hours arrives at a minimum of 3¼ mag. There is then a revival of its brilliancy, and in 5½ hours it reaches its normal magnitude of 2¼. The following are the computed times of minima in 1909. From the end of March until the beginning of August the star is not favourably visible, being immersed in the vapours and twilight over the northern horizon; but in the autumn and winter months it may be viewed with advantage. Astronomic time is employed in the table.

Celestial Objects and Phenomena for Observation, 1909.

IE following is a summary of the more promi- and interesting astronomical objects and rrences visible during the year. The in- ation is intended as a guide to that ever- easing band of amateur observers who nsider the heavens." We have only at- pted to describe such events as are capable eing definitely predicted. There are various ts and wonders presented in the firmament ch do not admit of being foretold with racy. Among the latter class of objects may ncluded large Sun-Spots, displays of Auroræ eales, bright Comets, New Stars, and brilliant eors or Fireballs.

ECLIPSES.

a the year 1909 there will be four Eclipses, two he Sun and two of the Moon.

A Total Eclipse of the Moon, June 3-4, ly visible at Greenwich.

t contact with the
e Shadow ..... 3*d.* 11*h.* 43*m.* aft.
dle of the Eclipse 4*d.* 1*h.* 29*m.* mrn.
contact with the
adow ..... 4*d.* 3*h.* 14*m.* mrn.

} Mean Time at Green- wich.

he first contact with the Shadow takes place 5° from the North point of the Moon's limb, ating towards the East, and the last contact towards the East. The Moon sets at Green- at 3*h.* 37*m.* morn. on the 4th.

. An Annular Eclipse of the Sun, June 17-18, sible at Greenwich. Begins on the Earth erally on June 17 at 9*h.* 17*m.* aft., in longitude East of Greenwich, and latitude 26° North. tral Eclipse begins generally on June 17, at 30*m.* aft., in longitude 82° East of Greenwich, latitude 50° North. Central Eclipse ends erally on June 18, at 0*h.* 7*m.* morn., in longi- 42° West of Greenwich, and latitude 60° th. Ends on the Earth generally on June 18, *h.* 37*m.* morn., in longitude 94° West of nwich, and latitude 39° North. The line of tral Eclipse passes across the North Pole.

I. A Total Eclipse of the Moon, November 27, ly visible at Greenwich.

t contact with the
adow ..... 7*h.* 11*m.* morn.
dle of Eclipse ..... 8*h.* 55*m.* morn.
contact with the
adow ..... 10*h.* 38*m.* morn.

} Mean Time at Green- wich.

The first contact with the Shadow takes place at 58° from the North point of the Moon's limb, counting towards the East, and the last contact at 269° towards the same point. At Greenwich the Moon sets at 7*h.* 37*m.* morn.

IV. A Partial Eclipse of the Sun, December 12, invisible at Greenwich. Begins on the Earth generally at 5*h.* 57*m.* aft., in longitude 159° East of Greenwich, and latitude 39° South. Greatest Eclipse at 7*h.* 45*m.* aft., in longitude 86° East of Greenwich, and latitude 65° South. Ends on the Earth generally at 9*h.* 33*m.* aft., in longitude 18° West of Greenwich, and latitude 55° South.

A Partial Eclipse is visible at Wellington, New Zealand. A very small Eclipse: taking the Sun's diameter = 1, the magnitude of the Eclipse will be only 0·04.

Begins.....Dec. 13*d.* 5*h.* 34*m.* morn.
Greatest Phase Dec. 13*d.* 5*h.* 52*m.* morn.
Ends.....Dec. 13*d.* 6*h.* 11*m.* morn.

} Standard Mean Time.

First contact 345° from the vertex towards the East, and last contact 309° from the vertex to the same point.

V. Eclipses of Jupiter's Satellites.

The following table contains *all* the Eclipses of the first Satellite, and *those only which are visible at Greenwich* of the second, third, and fourth Satellites.

The Roman numerals indicate the Satellite eclipsed; the letters D. and R. signifying respectively Disappearance and Reappearance. Those Eclipses which are visible at Greenwich have an asterisk after the D. or R. in the second column.

At the beginning of the year, and until February 28, the disappearances and reappearances take place on the Western side of the Planet; from February 28 to August 18, on the Eastern side; from October 19 to the end of the year, on the Western side. In the astronomical telescope, which inverts the image, the Western side of the Planet will be on the left hand and the Eastern on the right.

The mean time for any other place than Greenwich may be found by applying to the times given in the following table the difference of longitude, adding if the longitude of the place is *East* of Greenwich, and subtracting if *West*.

OCCULTATIONS.

Occultations.—There will be no occultations of ry bright stars by the Moon during the year, t several rather conspicuous ones will be lden, and the dates and times of these to the magnitude are given in the calendar portion the Almanack.

JUPITER'S SATELLITES.

Jupiter's Satellites.—Amateurs possessing telepes of moderate dimensions will find the four ght Galilean satellites of Jupiter very attrace objects for study. They can be distinctly perved in any small glass, and the circumstance ich, more than any other, renders them so eresting is that their relative places vary from ır to hour and from night to night. Besides ipses and occultations they also make transits oss the disc, and it is at these times that y occasionally become visible as circular k spots projected on the bright surface of piter. The shadows of the satellites are o to be distinguished on the face of the net at such periods or near such periods, l a telescope will sometimes reveal the ctacle of two or three black spots coursing ng the line of the Jovian belts. The fifth ellite, which was discovered by means of the at 36-inch refracting telescope at the Lick ervatory in California on September 9, 1892, xceedingly faint and close to the planet, so t it requires a large instrument to reveal it. sixth and seventh satellites, discovered by otography at the same Observatory by Perrine 1905, are also far beyond the reach of ordiy appliances. The eighth satellite was deed in 1907 on a photographic plate by Mr. Melotte at Greenwich, and its period is a long and the motion in its orbit probably retrole. Appended are the occasions in 1909 n the fourth satellite (Callisto) and the third nymede) will be observable in transit across disc of their primary :—

ronomical time, reckoned from noon to through the twenty-four hours, has been oyed in the foregoing tables.

A telescope of about three inches aperture will be powerful enough to exhibit the satellites Ganymede and Callisto (the third and fourth) and their shadows during these transits. The shadows are larger and relatively much more conspicuous from their dark tone than the satellites themselves, but mistakes in identifying them are easily and frequently made. The times of occurrence specified in the above tables should, however, obviate errors of this kind, for, except at the epoch near opposition, the satellites and their shadows differ materially in their times of transit. Before opposition the shadows precede the satellites; after opposition the order is reversed, the satellites taking precedence of the shadows.

The third and largest satellite is so bright that it has been occasionally glimpsed with the unaided eye. All four of the old Galilean satellites would be visible without telescopic power but for the glare and proximate position of the planet. The four small satellites discovered in recent years are only objects for those who can command the services of an exceedingly large telescope. Their periods of revolution are :—

Satellite.	*Period.* D. H. M. S.	*Discoverer and Date.*

THE SUN.

The Sun.—Whenever a telescope is employed for solar observations a dark-tinted glass should be attached to the eye-piece, in order to moderate the intense brilliancy of the Sun, otherwise serious damage may result to the observer's sight. A very convenient plan of effecting observations of the Sun is to detach the coloured glass from the instrument, and to allow the telescopic image of the Sun to fall upon a piece of white cardboard. The details of the spots may be readily perceived in this manner, and the speckled appearance of the whole disc will be displayed satisfactorily. This method also affords a means of exhibiting the spots to several persons at a time. For critical examination of sun-spot structure and variation in detail, we must, however, resort to the ordinary plan of direct vision as decidedly the most effective. A good 4½-inch refractor is perhaps the most suitable instrument for solar work. The spots are abundantly displayed at intervals of about eleven years with intervening times of minima. We may look at the Sun many times during two or three successive years, and scarcely ever see a large dark spot amid the bright stippling of the solar surface. In other years we shall see spots distributed in plentiful array along zones lying not far N. and S. of the Equator. Thus in 1901 and 1902 the Sun was practically free from conspicuous spots, while in the last two or three years they have been very abundantly presented.

The spots apparently transit the solar surface in about 13½ days, and merit close study when near the margin of the disc, for certain modern observers object to the idea that they represent cavities in the sun's atmosphere. When the dimensions of a sun-spot reach one minute of arc, it may be considered large enough to be distinguished by the naked eye.

THE MOON.

The Moon.—Our knowledge of the particular objects spread in great profusion over the Moon's disc may be regarded as pretty complete and accurate, except, perhaps, as regards minute and complicated details. As an object for telescopic study there is no known orb in the heavens which can offer a parallel to the wonderful picture she presents. Small instruments will show this most distinctly. The crescent Moon is the most attractive for study, as the objects show their distinctive characters more readily at such a time; the Sun is then shining upon them from a slanting position, and the hills, mountains, and crater walls throw dark shadows which are easily distinguishable. The full Moon is brilliant, but is void of the shadows which render the crescent phase so entertaining. Our satellite can be observed to great advantage in spring when her age is about 3 to 10 days.

The colour and opacity of the Earth's shadow in lunar Eclipses varies considerably: at one time transparent enough to allow the whole disc to be seen through it plainly; at another, like the Eclipse of Oct. 4, 1884, so dark as almost entirely to obscure the Moon.

MERCURY.

Mercury.—The smallest of the primary planets will be visible as an evening star during the last half of January, 1909. He should be seen in the West about an hour after sunset for at least 10 days *before* the date of his eastern elongation. Another opportunity for observing this interesting planet will be afforded in the May evenings, and during the July mornings. He is visible, for the last time this year, towards the end of October and beginning of November.

Mercury never departs more than 28° from the Sun; it is therefore considered interesting by both professional and amateur astronomers to try and see him as often as our somewhat cloudy climate permits. At Bristol Mercury has been observed over 135 times since February, 1868, although not looked for on every occasion when he should have been visible. Intending observers should find the exact position of the planet and the time of setting, for it is very easy to mistake him for a star, or *vice versa*, as he shines with a strongly sparkling light. It is sometimes best to use an opera-glass at first, and then when once found he will be easily visible to the naked eye. Probably Mercury could be seen on about 15 occasions annually in this country. In the spring apparitions he should be looked for *before* the date of maximum E. elongation, and in the autumn *after* W. elongation. When near East elongation the planet is approaching the Earth, but the decrease in the illuminated portion of the disc is so great that a decline in lustre becomes apparent. Mercury is often quite a brilliant object about ten evenings before East elongation, but may be invisible a week or so after that time. The reflecting capacity of this planet is not very great, being only 17, whilst that of Venus is about 65, and that of clouds 72. Keen eyesight will detect him about half an hour after sunset, or before sunrise, during his apparitions. Viewed telescopically his disc shows very few certain markings; all observation is most difficult owing to his nearness to the Sun. The true rotation period is still unknown.

VENUS.

Venus.—At the opening of the year Venus is a morning star, in the most southern portion of the constellation of Ophiuchus, 7° N.E. of Antares (α Scorpii). During January she traverses Sagittarius. In conjunction with Uranus on the 30th, at 5 P.M. (Venus 0° 21′ N.). At the beginning of March she enters Aquarius, passing from thence into Pisces towards the end of the month. Venus is in superior conjunction with the Sun on April 28, and will therefore emerge from his rays as an *evening* star during the latter half of the year. Her course in May is through Aries and Taurus, being in conjunction with the beautiful cluster of the Pleiades on the 14th (Venus 4° S.). In July she enters Cancer, her position being about 6° S.E. of the first magnitude star Pollux (β Geminorum) on the 1st. On September 9 the planet is in conjunction with the well-known first magnitude star Spica (α Virginis), the former being 1½° N.; with the Moon on the 17th, at 9.9 P.M. (Venus 3° 55′ S.). In October she is in Scorpio; in conjunction with δ Scorpii on the 12th (Venus ¼° N.), and with β Scorpii on the 13th (Venus 2¼° S.). Venus is 2¼° N. of the beautiful red star Antares (α Scorpii) on the 18th, and also in conjunction with the Moon on the same date, at 4.40 A.M. (Venus 2°$\frac{28}{60}$ 17′ S.), and on November 17th, at 4.27 A.M. (Venus 0° 6′ S.); and with the planet Uranus on the 24th, at 1.15 A.M. (Venus 2° 33′ S.). Venus is at greatest elongation East (47° 18′) from the Sun on December 2, at 6 P.M. During the second week of December she enters the western portion of Capricornus. As a naked-eye object Venus is undoubtedly the most beautiful member of the solar system. But when viewed telescopically she is, perhaps, the most disappointing, as very few surface markings have been glimpsed, and even those few are somewhat uncertain and indefinite in character. When in the crescent phase she presents a pretty picture, especially when seen at the moment of her conjunctions with our satellite. At such times the great contrast in colour — Venus being dazzlingly white, and the Moon dull yellow — is very noticeable. Her elongations extend to between 45½° and 47°, and she is at greatest brilliancy 36 days before or after her inferior conjunction with the Sun, when her disc is one-fourth illuminated and her apparent diameter about 40 seconds of arc.

MARS.

Mars.—At the commencement of 1909 the planet Mars is a morning star, in Libra. He is in conjunction with γ Librae on January 1 (Mars 3½° S.). During the month he passes into Scorpio, and is in conjunction with β Scorpii on the 12th (Mars ½° S.), and with Antares, α Scorpii, on the 21st (Mars 5° N.). His course in February, March, April, and May is through Sagittarius, Capricornus, and Aquarius. In the middle of July he enters on the N.W. portion of the constellation Cetus. As he rises late in the evening he will be visible during most of the night. Mars is best situated for telescopic observation near the time of his opposition to the Sun on September 23rd, as he is then at great brilliancy and is visible all night. He is in conjunction with the Moon on November 10.11 P.M. (Mars 4° 26′ N.); with δ Pisciu December 19 (Mars 2° S.); and with the on the 20th, at 11.56 P.M. (Mars 5° 0′ N.). two hemispheres of Mars are very dissimila southern having large, irregular, dark pa with light areas and some brilliant spots it, and the northern exhibiting a large n

dusky streaks, termed "canals" or hannels" by Schiaparelli, and delicate rkings extending over long ranges and apparly intersecting or interlacing at certain nts. These streaks are knotted in places, and not so straight, dark, and sharply outlined some observers have represented them. Of objective existence of these canal-like rkings there is no doubt, but all theories nt to a natural origin. Some of these rkings are three or four thousand miles long about sixty miles wide. In 1881–82 Iaparelli affirmed that many of the "canals" e *double*, a companion running parallel at a ance varying from 200 to 400 miles; whether "double canals" are merely an optical sion or a reality is not yet ascertained. There large white spots on Mars near the two poles ch have often been likened to the polar ons of the Earth. These vary in size as the tian seasons advance, being much smaller in mer and larger in winter. It has been thought these "polar caps" are not composed of v and ice, but of solid carbonic acid, which es in a much lower temperature than the ier. As there is no dense atmosphere nor rapid rotation we are more successful in a cographic way than with Jupiter or Saturn.

MINOR PLANETS.

inor Planets.—Between the orbits of Mars Jupiter revolve a large number of small named Minor Planets. Over 600 have been overed since 1801, and every month fresh abers are added to the list. Nearly all these veries have been made by the aid of photohy, Metcalf of America, and Kopff and f of Germany, being perhaps the leaders in branch of astronomical work. Eros is the important of these small planets, as it is only one moving in a path the mean distance hich falls between the Earth and Mars. Its sional near approaches to the former will le the Sun's distance to be determined more rately than has been possible by any other hod. Unfortunately, Eros is extremely faint, only visible as a telescopic star. It was ght that its light was variable, but it has been proved that the slight change noticed rely a phase effect. A favourable opposition not occur until 1924. The four largest and test of the minor planets are Ceres, Pallas, , and Vesta.

nenever it is desired to identify one of small planets, or any other object of similar cter beyond reach of the naked eye, its exact ion relatively to a known star should be d and the telescope directed to the place. bserver should then construct a diagram of mall stars visible, and on succeeding nights, mparing this diagram with the same spot e heavens, the object sought for will reveal by its motion.

es is in Sagittarius during the summer and nn months of 1909. Her course is retro- until September 2, after which she moves vards. On June 6 she is 2° E. of four 5th itude stars, A, *b*, *c*, and *ω* Sagittarii. The t is at opposition to the Sun on July 13, s then of the 7·66 magnitude. She was the minor planet, discovered by Piazzi in 1801, also the largest, having a diameter of iles.

las is in the eastern portion of Hercules in on the 14th being 2° E. of 109 Herculis and 3° W.N.W. of 110 Herculis. From the end of April until the end of August her course is retrograde, after which it is direct for the remainder of the year. She is at opposition to the Sun on June 22, when she is 9·15 magnitude; her position on that date in Hercules is at the apex of a triangle formed by the planet, 109 and 102 Herculis, at the same time being in close conjunction with a 6th magnitude star 3¼° N. of 102 Herculis and 3½° S. of *o* Herculis. Pallas was discovered by Dr. Olbers in 1802, and is the second largest of the asteroids, having a diameter of about 304 miles.

Juno is in Orion during the last quarter of the year. On October 21 she is 6° W.S.W. of Bellatrix (*γ* Orionis) and 7½° W.N.W. of *δ* Orionis, being at the same time ½° E. of Σ 627 Orionis. She is at opposition to the Sun and visible all night on November 30; her position on that date is in Eridanus, 6° W.N.W. of *β* Eridani and 2° E.N.E. of *ν*, and also in conjunction with *μ* Eridani (Juno ½° N.). On December 14 she is in conjunction with *ν* Eridani (Juno ½° N.). At the end of the year she is situated 2½° N.N.E. of *ξ* Eridani and 3° N.W. of *ν* Eridani. Juno was discovered by Harding in 1804. She is the smallest of the first four minor planets, her diameter being only 120 miles. Her magnitude at the time of opposition is 8·65.

Vesta is the brightest of the minor planets, and is sometimes visible to the naked eye. At the beginning of the year she is in Libra, almost midway between *α* and 16 Libræ; 6° N. of *α* and 6° W. of *β* Libræ, the two well-known 2nd magnitude stars in the Balance. In conjunction with *β* Libræ on January 15 (Vesta 2° S.), and with *γ* Libræ on the 26th (Vesta 2½° N.). She enters Ophiuchus in March, and is in conjunction with *ζ* Ophiuchi on the 15th (Vesta 3° S.). From April until the second week in July her course is retrograde, after which she moves direct for the remainder of the year. In conjunction with the Moon on October 19, at 12 P.M. (Vesta 0° 49′ N.); and on November 17, at 7 A.M. (Vesta 1° 15′ S.). Vesta was discovered by Dr. Olbers in 1807. Her diameter is 239 miles, and her light-reflecting capacity very high, being almost as great as that of snow.

JUPITER.

Jupiter.—The "Giant Planet" is a brilliant evening star during the first seven months of the year. His course is retrograde in Leo until May 1, on which date he is stationary 6° E.S.E. of Regulus (*α* Leonis), being in conjunction with *ρ* Leonis at the same time (Jupiter 1° N.). After May 1 he resumes his course eastwards during the remainder of the year. In conjunction with the Sun on September 18 in the extreme W. of Virgo, and with *η* Virginis on October 30 (Jupiter ½° S.). In conjunction with the Moon on November 9, at 5.43 A.M. (Jupiter 3° 52′ S.), and on the 29th with *γ* Virginis (Jupiter 1½° S.). At the end of the year his position is in Virgo, between *γ* and *α* Virginis (Spica), being 4° S.E. of *γ* and 9° N.W. of *α*.

The planet Jupiter is of greater bulk than all the other major planets of the solar system put together. His attractive power is also enormous, and many comets own their capture as satellites of our Sun and permanent members of our system to their too near approach to him. Jupiter is considered to be at a stage of evolution intermediate between that of the Sun and that of the Earth; that is, he is still a hot and almost

gaseous body, without a solid crust. The belts and spots visible on his disc are not real surface markings, but have their origin in his gaseous envelope. That they are not stable formations is proved by their varying rotation periods. Jupiter's distance from the Sun varies from about 460,000,000 to about 510,000,000 miles, the time occupied in completing one revolution being 11·6/7 years.

The most interesting marking ever seen on Jupiter is undoubtedly the Great Red Spot. Although not so bright as in former years, it has endured for such a long time that it may be considered a permanent feature of the planet. In July, 1878, it was an intensely red colour, but it has undergone many changes of tone and tint. The mean rotation of this marking during a very long period has been $9h.\ 55m.\ 37s.$, but the rate has varied between about $9h.\ 55m.\ 33s.$ and $9h.\ 55m.\ 42s.$ The velocity of the red spot during the last few years has shown remarkable variations, due to the existence of an irregular spot in nearly the same latitude which seems to have the capacity of accelerating the motion of the former when they come into conjunction every two years.

For the guidance of those observers who may desire to examine the faint remains of the great red spot and its neighbouring features, a list of some of the times when it may be expected to present itself on or very near the central meridian of the planet is given below. The observer may readily calculate for himself the times of transit on other nights, should he require to know them, by adopting the rotation period of $9h.\ 55m.\ 40s.$, which is equivalent to the interval elapsing between successive returns of the same marking.

TRANSIT TIMES OF RED SPOT ON JUPITER.

1909.	H.	M.	1909.	H.	M.
Feb. 19	11	57	Apr. 4	8	12
,, 24	11	6	,, 6	9	51
Mar. 6	9	8	,, 18	9	46
,, 8	10	46	,, 30	9	40
,, 15	11	36	May 5	8	50
,, 18	9	4	,, 7	10	29
,, 30	9	1	June 5	9	33

These predictions are made on the basis that the position of the spot remains the same as at present, with a longitude of 30°, which enables it to follow the transits of the zero meridian of System II. of the Ephemeris in 50 minutes.

At intervals of 12 days (which include 29 rotations) the spot becomes central on Jupiter at nearly the same times as before. These remarks only have a special reference to the red spot, for it is found that different latitudes furnish objects controlled by different periods of rotation. Some of the markings have exhibited a proper motion so rapid that they complete a circuit of Jupiter in $8m.$ less time than others. These features are doubtless of an atmospheric character, and are certainly influenced by currents of different velocity operating far above the sphere of the planet. Though it cannot be a formation cohering with the actual surface of Jupiter, it must possess elements of remarkable permanency.

SATURN.

Saturn at the commencement of 1909 is on the Equator in Cetus, and very near the boundary of that constellation and Pisces, being midway between δ Pegasi and β Ceti. He rises on January 1 at 11.35 A.M., and sets at 11.37 P.M.; he will therefore be visible during the evening hours. Gradually drawing nearer the Sun during February and March, he is in conjunction with him on April 3, and will remain invisible until the summer. In May he enters the southern region of Pisces, being in conjunction with Piscium on the 5th (Saturn 2½° S.). At quadrature to the Sun on July 16, and stationary on August 6 in the E. portion of Pisces, after which he will slowly retrograde until December 2 upon that date resuming his direct motion. He will increase in brilliancy in the summer and early autumn, arriving at opposition to the Sun on October 13, when he is particularly well placed for telescopic study, being visible throughout the night. Saturn rises on the date mentioned at 5.20 P.M., and sets at 6.20 A.M. on the following morning. In conjunction with the Moon on November 24, at 2.53 A.M. (Saturn 1° 32′ N. His position at the end of the year is in Pisces 3° S.S.E. of ϵ Piscium.

The Rings. — These beautiful appendages unique as far as we know in the whole solar system, are now slowly opening out, having been closed in October, 1907, and January, 1908, the Earth and the planet being then in the same plane. At about the time of Saturn's opposition to the Sun in October, 1909, the major axis of the outer ring will be 46·19″ and the minor axis 9·47″, the elevation of the Earth above the plane of the rings being 11° 50·1′. The rings will not be open to the fullest extent until 1915.

Once in every 15 years Saturn comes to position in his orbit when his rings disappear and the satellites transit his disc. This was the case in 1907 (October 4), when the Earth passed through the plane of the rings and these appearances were presented exactly edgewise to view.

The irregular markings on Saturn, like the similar features on Jupiter, are evidently influenced by proper motions of considerable extent. In fact, different latitudes of these planets give discordant rotation periods, as there are a number of atmospheric currents of different velocities circulating round them.

Satellites.—Saturn has 10 satellites, seven of which are visible in small telescopes. It is therefore be of interest to give a few dates when the planet's two brightest attendants are at elongation, *i.e.*, at greatest distance E. or W. of Saturn, and most favourably placed for observation.

URANUS.

Uranus is in Sagittarius, 2½° S.E. of π Sagittarii, at the commencement of 1909. As he is in conjunction with the Sun on January 7 he is not be suitably placed for observation until summer. His course is direct until April 20, when he is stationary, about 7° E. of π Sagittarii, after this date he will slowly retrograde

tember 27, when he is again stationary; he l then continue his direct motion E. until the l of the year. Uranus is at opposition to the on July 12, and is therefore best situated for ervation during July, August, and September, en he is visible most of the night. In njunction with the Moon on the following tes :—

	H. M.	
June	6 at 8.35 P.M.	Uranus 2° 29′ N.
July	4 ,, 2.30 A.M.	,, 2° 22′ N.
Sept.	24 ,, 3. 3 ,,	,, 2° 35′ N.
Dec.	14 ,, 1 52 ,,	,, 3° 5 N.

s motion during the whole year is under 7°. When near opposition and under favourable cumstances Uranus may be seen with the naked e as a star of the 6th magnitude. In a tele- pe his appearance is disappointing, as mark- s are rarely visible, and even those sometimes mpsed are of a very doubtful nature. His tation period is unknown, but is most likely a rt one, intermediate between that of the ger planets, Jupiter and Saturn, and that of e smaller, Venus and Mars. Uranus has four tellites; the outermost pair, Titania and eron, may sometimes be glimpsed with tele- pes of moderate power.

NEPTUNE.

Neptune is in Gemini, 1° W.S.W. of δ Gemi- rum and in close conjunction with a 6th gnitude star situated 1° W. of δ on January 1. is within ½° W. of δ for about three weeks this month, his motion being retrograde until arch 25, when he becomes stationary; after is date his course is direct to October 23, when will again slowly retrograde during the mainder of the year. As he is at opposition the Sun on January 6 he will be well placed r observation in the first quarter of 1909. His A. on the date stated is *7h. 7m. 51s.*, and eclination N. 21° 45′ 2″. In conjunction with e Moon on January 6, at 1.46 P.M., and on ebruary 2, at 6.54 P.M. (Neptune 2° 31′ S.). On ebruary 26 the planet is only ¼° N. of another h magnitude star about half-way between and ζ Geminorum, at the same time being 1° S.E. of the variable star marked R on the aps. He is again in conjunction with our tellite on March 1, at 11.32 P.M. (Neptune 2° 37′), and on March 29, at 5.30 A.M. (Neptune 2° 51′). He is in conjunction with the waning escent of the Moon on November 3, at 2.19 A.M. eptune 4° 11′ S.). His position at the end of e year is 1° E.S.E. of δ Geminorum, at the ex of a triangle formed by the planet and the ars 61 and 56 Geminorum.

Neptune is the most distant known planet of e solar system, and is quite invisible to the ked eye, as he is only 8th magnitude, and in a werful telescope only a very small disc is seen. he best time for observation will be about the me of opposition. See p. 94.

COMETS.

Comets.—The majority of comets appear to volve in parabolic orbits or in such vastly ex- nded ellipses that they exhibit little deviation om the parabola, and to have very long periods revolution. In fact, a proportion of these odies appear to have periods amounting to any thousands of years, and in a few instances hundreds of thousands of years. Comets be- nging to the class revolving around the Sun in mparatively limited times are in the minority, but our knowledge of them is constantly on the increase. One well-known family of comets is known as the Jovian group, as the more remote section of their paths lies near the orbit of Jupiter, and this great planet is supposed to have materially brought about this arrangement by powerful attraction exercised upon them in past ages.

The small periodical comets, revolving around the Sun at intervals of from 3 to 9 years, are entitled to equal regard, from the highly inter- esting nature of their orbits and the fact that they may be re-observed again and again similarly to the well-known planets of the solar system. The majority of these short-period comets extend their flights to a little distance outside the path of Jupiter, and approach the Sun to about the average distance of Mars. About 34 of these objects are now known to exist, and the number is being frequently aug- mented. It appears that though new comets of short period are being introduced by means of planetary perturbations (for which Jupiter is mainly responsible), there are others which meet with disturbances in pursuing their paths sufficiently forcible to endanger, if not to ter- minate, their visible existences. Biela's double comet has not reappeared during the last half a century, and its material seems to have been distributed into a stream of November shooting stars. Brorsen's comet has also been missing, and may have followed the same fate. The materials of which these presumably lost comets were composed no doubt still exist and revolve around the Sun in regular periods, but it is doubtful whether they will ever be viewed again under the same aspect as formerly. As an example of the increase in the number of known periodical comets, it may be stated that during the 16 years from 1880 to 1896 no less than 16 new comets of short period were dis- covered. The following table includes details of some of the best-known comets which are predicted to return during the ensuing few years :—

Date of Return.	Period in Years.	Name of Comet.
1909. October	5·828 ...	Pons-Winnecke.
December ...	5·456 ...	Brorsen.
1910. February	5·279 ...	Tempel (1873).
May	76·080 ...	Halley.
September ...	6·686 ...	D'Arrest.
November ...	6·538 ...	Tempel (1867).
1911. January	7·101 ...	Brooks (1886).
March	7·390 ...	Faye.
August.....	3·300 ...	Encke.
1912. March	6·823 ...	Wolf.
December ...	6·400 ...	De Vico-Swift.

Large comets appear promiscuously and with more or less suddenness, so that in the present state of our knowledge it is impossible to definitely predict the times of their apparitions.

In the above list of comets expected to return that of Halley is included, though it has a much longer period than the others. Its last appari- tion in our skies was in 1835, and its rediscovery is now awaited with intense interest. It may possibly have been detected by means of photo- graphy, or by one or other of the many large telescopes now employed in work of this kind, by the time these lines appear in print. In any case, this famous comet will be seen both in

1909 and 1910. The following is an ephemeris of the comet from January, 1909, to May, 1910:—

1909.	R.A. H. M. S.	Dec. ° ′ ″	Distance in Millions of Miles From Sun.	From Earth.
Jan. 1 ...	2 33 22	+ 12 14 24	... 561	... 473
April 1 ...	4 59 8	+ 14 41 38	... 488	... 522
July 1 ...	5 35 54	+ 17 21 23	... 408	... 498
Oct. 1 ...	6 3 42	+ 17 41 6	... 319	... 294
1910.				
Jan. 1 ...	2 33 22	+ 13 0 23	... 218	... 158
Mar. 1 ...	1 8 52	+ 10 32 22	... 144	... 202
May 16...	0 44 28	+ 16 51 31	... 64	... 94

In the beginning of October the comet will be in the N.E. region of Orion and 2° N. of ν Orionis. Moving westwards through the Hyades in Taurus, it will pass along the southern part of Aries, and from thence into Pisces. It must be observed in a telescope in the autumn of 1909, but it ought to become conspicuous to the naked eye in the spring of 1910.

METEORIC SHOWERS.

Meteoric Showers.—Fireballs, meteors, shooting stars, or falling stars, as they are differently called, represent one and the same class of objects, the distinction being only one of size. They are visible in varying number on every night of the year, and are sometimes so abundant as to form impressive showers. There were brilliant and plentiful displays of the November Meteors, called Leonids, in the years 1799, 1833, 1866, 1867, 1868, and less striking exhibitions of the same objects in 1901 and 1903. It is not to be expected, however, that this particular system of falling stars will again show itself prominently until the years 1933 to 1937. The meteors appear numerously every 33½ years, but it appears that just before their last return the planet Jupiter disturbed their orbit so much that the main collection of meteors was enabled to avoid encountering the Earth, and the observed showers were more scanty than usual. But some of the meteors are visible every year, and furrow the morning sky with their rapid flights and luminous streaks at the middle of November. This meteoric system appears to be identical with, and its material actually derived from, a periodical comet, which was discovered by Tempel in December, 1865. In November, 1909, very few of these Leonid meteors are expected in our skies, but observers should maintain an attentive watch for them at the important time. The maximum date is usually the morning of November 15 or 16, but it varies a little owing to leap year. Whenever any conspicuous meteors are seen, whether during a known shower or on an ordinary night, their paths amongst the stars should be carefully and accurately recorded. The same advice applies to occasional fireballs, which often appear suddenly and startle spectators by lighting up the heavens very vividly for two or three seconds. Observers should always remember that mere descriptions of the brilliancy or general situation of these phenomena are practically useless for scientific purposes. What is required by those who critically discuss such observations relates specially to the exact path of the object in the heavens and to the duration of its visible flight. The following is a table of the most prominent meteoric streams visible during the year:—

No.	Epoch.	Radiant Point. R.A. °	Dec. °	Name of Shower.
1	January 2—4 ...	230	+53	Quadrantids.
2	January 11	220	+13	ζ Bootids.
3	January.....	295	+53	κ Cygnids.
4	Feb. 5—23.....	75	+41	α Aurigids.
5	February 20.....	263	+36	ρ Herculids.
6	March 1—4	166	+ 4	τ Leonids.
7	March 13—24 ...	161	+58	β Ursids.
8	April 12—24 ...	210	−10	α Virginids.
9	April 17—22 ...	218	−31	Hydrids.
10	April 20—22 ...	271	+33	Lyrids.
11	May 1—6	338	− 2	γ Aquarids.
12	May, June, July	253	−21	α Scorpiids.
13	May 7—18.....	231	+27	α Coronids.
14	May 24—27	194	+58	ϵ Ursids.
15	May 26—31	310	+80	κ Cepheids.
16	May 30—June 4	333	+27	η Pegasids.
17	June and Aug.	312	+61	α Cepheids.
18	June 10—28.....	335	+57	δ Cepheids.
19	June—Aug.	302	+24	η Sagittids.
20	July 6—Aug. 22	284	−13	λ Aquilids.
21	July—Aug.	269	+48	γ Draconids.
22	July 6—Aug. 16	315	+48	α Cygnids.
23	July 15—28	304	−10	α Capricornids.
24	July	280	+57	b Draconids.
25	July—Oct.	30	+36	β Triangulids.
26	July 23—Aug. 4	47	+43	α–β Perseids.
27	July 25—30	339	−11	δ Aquarids.
28	July—Oct.	310	+79	κ Cepheids.
29	August 10—12...	45	+57	Perseids.
30	August 5—16 ...	292	+53	κ Cygnids.
31	Aug.—Sept. 16	353	−11	ψ Aquarids.
32	Aug. 12—Oct. 2	74	+41	α Aurigids.
33	August 15—25...	291	+60	o Draconids.
34	Aug. 21—Sep. 21	62	+37	ϵ Perseids.
35	Aug.—Sept.	332	+71	β Cephids.
36	Sept. and Nov.	64	+22	e Taurids.
37	Sep. 15—Oct. 11	14	+ 7	ϵ Piscids.
38	September 27 ...	75	+15	o Orionids.
39	October 4	133	+79	Ursids.
40	October 11—24...	40	+20	ϵ Arietids.
41	October 17—24...	92	+15	Orionids.
42	October 22—27...	91	+59	δ Aurigids.
43	Nov. 2—3	55	+ 9	ϵ Taurids.
44	Nov. 13—15	150	+23	Leonids.
45	Nov. 13—28	155	+40	Leo Minorids.
46	Nov. 17—23	25	+43	Andromedids.
47	Nov. 23—Dec. 1	193	+73	χ Draconids.
48	Nov. 30—Dec. 9	162	+58	β Ursids.
49	Dec. 1—14.....	108	+33	Geminids.
50	Dec. 7—10.....	119	+29	α Geminids.
51	Dec. 22—29	194	+32	Canis Venaticiids

The Perseids (No. 29 in the foregoing list) display some singular characteristics, for they probably continue visible for more than a month during which period their radiant point exhibits a diurnal motion of about 1° to the E.N.E. The places of this radiant on alternate days during about four weeks of the chief activity of the shower are as follows:—

DATES AND POSITIONS OF PERSEID RADIANT.

Date.	Radiant R.A. °	Dec. °	Date.	Radiant R.A. °	Dec. °
July 19	18·9	+50·5	Aug. 4	36·4	+55·5
,, 21	20·8	+51·1	,, 6	38·9	+56·0
,, 23	22·8	+51·8	,, 8	41·5	+56·5
,, 25	24·9	+52·5	,, 10	44·3	+56·9
,, 27	27·1	+53·2	,, 12	47·1	+57·3
,, 29	29·3	+53·8	,, 14	50·0	+57·7
,, 31	31·6	+54·4	,, 16	52·9	+58·0
Aug. 2	33·9	+55·0	,, 18	55·9	+58·4

Comets, and large nebulæ such as those in Orion and Andromeda, require very low powers and an extensive field of view, so that the objects may be presented in their entirety, and their light sufficiently concentrated to display the fainter portions. If it is decided to critically examine the structure of a comet's nucleus or details of form in a nebula, then powers of 150 or 200 may be used. The cluster in Hercules (Messier 13) is splendidly resolved with 100 on a 10-in. reflector.

The spots on the Sun may be very distinctly seen in any small telescope, care being taken to protect the eye with deeply-tinted glass. A 4-in. refractor, powers from 60 to 100, reveals the spots in great detail and under many varieties of form and grouping. The craters, mountains, clefts, and ridges of the Moon are satisfactorily seen in general outline with about 30 and 75, though, for very minute features, powers of 300 and 400 are necessary on a 10 or 12 in. glass. Solar and lunar eclipses are best visible under low powers, with fields sufficiently ample to include a picture of the whole phenomenon.

The phases of Mercury may be discerned with 100 or 200, but the air must be steady and the object not very near the horizon; those of Venus are plain with far less power. These planets appear under the most satisfactory aspect near the times of sunrise or sunset, and indeed all observations of conspicuous planets are best made at such times. When the image is surrounded with dark sky the glare from a bright object is sometimes troublesome, for it is apt to aggravate telescopic defects and obliterate faint details.

The chief spots on Mars, such as the *Syrtis Major* and *Acidalium Mare*, may be distinguished with 90 on a 2-in. refractor, but powers of 300 and 350 and an 8-in. refractor or 10-in. reflector are desirable to exhibit the outlines of the fainter, narrower markings, many of which are delicate, intersecting lines suggesting a canaliform structure of surface.

Jupiter's equatorial belts are perceptible in a 2½-in. telescope, power 40, but for studying their variable appearances and the different velocities of the bright and dark spots 200 and 250 are requisite on a much larger instrument. The writer has successfully employed 1540 with a 12½-in. reflector on Jupiter, but found no advantage over powers of 200 to 440. The four bright satellites are visible in an opera-glass. Dark transits of Satellites III. and IV. and their shadows may be observed with a 3-in. refractor and power of 120 or 150.

Saturn and Mars usually appear well defined under higher powers than Jupiter. The division in Saturn's ring and his principal dark belt are to be readily glimpsed, when the system is sufficiently inclined, with a 2½-in. glass, power 120. But magnifiers of 250 to 350, and greater aperture, are essential to reach the delicate features of the planet, such as the spots which appeared in his northern hemisphere in 1903. A good 4½-in. refractor will occasionally show Encke's division in the ring when this feature is visible, but at the best it is only a faint pencil-like marking; also the interior crape ring and five of the satellites; but the night must be good. Titan is visible in any small telescope, and Iapetus is sometimes an easy object, but Tethys, Rhea, and Dione are much more difficult, requiring careful scrutiny of the region just outlying the rings, where they will be usually recognised as tiny points of light.

In planetary work the observer will ultimately find it an advantage to accustom himself to one and the same power. When on special occasions or for particular purposes really high magnifiers are employed, they should be single lenses, as they possess a decided advantage in light and definition at the centre of the field.

Occultations of stars by the Moon may generally be well observed with a 3-in. glass, power 50 to 75.

For double stars the eye-piece required will depend in a great measure upon the character of the object. For very close pairs, high powers, such as 300 or 400, and even more, are sometimes desirable, but in cases where the components are distant and the magnitudes differ considerably, as Vega, Polaris, or Rigel, then a moderate power, such as 100 or 150, will give excellent results. For showing variable stars a good field-glass is to be recommended. For groups of stars a comet eyepiece, power 25 or 30 and field about 1½°, will be best. The latter would also be well adapted for comet-seeking, and for general views of large comets, nebulæ, and parts of the Milky Way. It should always be remembered that on nights of good seeing, when the air is tranquil and planetary features very sharply defined, telescopes will bear much higher powers than on less favourable occasions.

A TABLE OF THE NUMBER OF DAYS FROM ANY DAY IN ONE MONTH TO THE SAME IN ANY OTHER MONTH IN ORDINARY YEARS.

δ Orionis, magnitude ranges between 2·2 and 2·7.

EXPLANATION OF THE ASTRONOMICAL TABLES.

Mean Right Ascension.

The Mean Right Ascension and Declination for any other year may be found from this table by multiplying the annual precession by the number of years elapsed, and applying the result to the quantities given in the table. If the required date be earlier than 1909, the *sign* of the annual variation must be changed. In applying the corrections, to reduce to any other date, to the Declinations, it must be borne in mind that N. Declination means + and S. Declination −, and that the corrections must be added *algebraically*.

Configuration of Jupiter's Satellites.

This column exhibits, at the particular hour mentioned, the respective position of Jupiter and his Satellites as seen in an inverting telescope. The white circles represent the Planet, and the numerals 1, 2, 3, and 4 the respective Satellites, those on the left hand being west of the Planet; a black circle is intended to show either that the Satellite whose numeral it stands in the place of is in the shadow of the Planet (eclipsed) or else is behind the disc of Jupiter (occulted); the sign ☌ indicates that the Satellite in question is *on* the disc of the Planet.

Sidereal Time at Mean Noon.

This column indicates the Sidereal Time at Mean Noon on each day of the year, and is the time which the Observatory or astronomical clock should show when the Mean Time clock points to Noon, and, in connection with the table on p. 76, serves to convert Sidereal into Mean Solar Time.

Mean Time at Sidereal Noon.

This column indicates the time which should be shown by the Mean Time clock when the first point of the sign Aries is on the meridian, or, in other words, when it is Sidereal Noon, and is useful for changing

α^1 Herculis, magnitude ranges from 3·1 to 3·9. β^1 Lyræ, magnitude ranges from 3·4 to 4·5.

Mean Solar into Sidereal Time with the help of the table on p. 75.

Following the Phases of the Moon on the first page of each month there will be found, as well as the *times* of Apogee and Perigee, the corresponding distances from the Earth to the nearest 100 miles.

The mean distance of the Moon from the Earth is 238,840 miles.

Under the head "Eclipses, Occultations, and other Celestial Phenomena," in each month, will be found the "Mean Time of the Sun's Semidiameter passing the Meridian" for the 5th and 20th days. This will be useful in determining time by the Dipleidoscope or similar instrument, when, from the interference of clouds, &c., only one limb of the Sun is observed. From the values on the 5th and 20th, that for any other day can be easily inferred with sufficient accuracy, the change in the apparent semidiameter being very slow.

Mean Right Ascension and Declination of some Fundamental Stars, Visible in the Southern Hemisphere, for January 1, 1909.

Name of Star.	Mag.	Right Ascension.	Annual Precess.	Declination.	Ann. Prec.

Gruis	1·9	22 2 30·1	+ 3·79	−47 24 8	+17·5

η Argûs, magnitude varies from 1 to 7·5.

α Centauri.

It is supposed that this star, one of the brightest in the Southern Hemisphere, is the nearest of the fixed stars to the Earth. Dr. Gill gave to it a parallax of 0″·75, which would make its distance from the Earth 275,000 times that of the Sun. At the rate at which light travels through space, it would require four years and four months to reach the Earth from this star.

Standard Time, referred to the meridian of Greenwich, has been adopted for railways and other purposes in the countries mentioned in the following table :—

Country.	Central Meridian.	Fast or Slow on Greenwich Time.
Mid-Europe	15° E.	1*h.* fast.
West Europe		
British S. Africa	30° E.	2*h.* fast.
Egypt		
Mauritius and Dependencies	60° E.	4*h.* fast.
Negros Archipelago	75° E.	5*h.* fast.
India	82½° E.	5½*h.* fast.
Calcutta	90° E.	6*h.* fast.
Burma	97½° E.	6½*h.* fast.
Hong Kong		
Borneo	120° E.	8*h.* fast.
West Australia		
Japan	135° E.	9*h.* fast.

Country.	Central Meridian.	Fast or Slow on Greenwich Time.
South Australia	142½° E.	9½*h.* fast.
Victoria		
New South Wales	150° E.	10*h.* fast.
Queensland		
Tasmania		
New Zealand	172½° E.	11½*h.* fast.
Iceland	15° W.	1*h.* slow.
America.		
Atlantic	60° W.	4*h.* slow.
Eastern	75° W.	5*h.* slow.
Central	90° W.	6*h.* slow.
Mountain	105° W.	7*h.* slow.
Pacific	120° W.	8*h.* slow.

Greenwich Time is used in Spain, Belgium, Holland, Gibraltar, and Faroe (Sheep Islands).

SIGNS OF THE ZODIAC.

♈ *Aries*, the Ram; ♉ *Taurus*, the Bull; ♊ *Gemini*, the Twins; ♋ *Cancer*, the Crab; ♌ *Leo*, the Lion; ♍ *Virgo*, the Virgin; ♎ *Libra*, the Balance; ♏ *Scorpio*, the Scorpion; ♐ *Sagittarius*, the Archer; ♑ *Capricornus*, the Goat; ♒ *Aquarius*, the Water-Bearer; ♓ *Pisces*, the Fishes.

ASTRONOMICAL DEFINITIONS.

THE time used throughout this Almanack, with the one exception of that of High Water at Dublin, is Greenwich Mean Time, or the time which would be shown by a well-regulated clock; the column headed "Sun before or after Clock" gives the difference between mean and apparent time, or the time as shown by the Sun.

N. North; S. South; E. East; W. West.

h. hours; m. minutes of time; s. seconds of time; ° deg. of arc, or thermometer; ′ minutes of arc; ″ seconds of arc.

Conjunction.—A Planet is said to be in Conjunction with another body when it has the same longitude, and is seen in the same direction from the heavens. It is obvious that in the case of the inferior Planets this Conjunction will be of two kinds—the one when the Planet is between the Earth and the Sun, called *inferior* Conjunction; and the other when at the opposite point of its orbit, with the Sun between the Planet and the Earth, called *superior* Conjunction. The latter is the only kind of Conjunction that can happen to the *superior* Planets, Mars, Jupiter, Saturn, Uranus, and Neptune; the *inferior* Planets, Mercury and Venus, being subject to both kinds.

Opposition.—A Planet is said to be in Opposition when it is distant from the Sun 180° of longitude, at which time it is most brilliant, souths about midnight, and is, generally, at its least distance from the Earth.

Elongation.—The inferior Planets, in their revolutions round the Sun, appear to an observer on the Earth to swing pendulum-like from side to side, being alternately east and west of the Sun; the greatest Elongation is the termination of one of the swings, either east or west; and at these times the Planet appears, when viewed through a telescope, like the Moon in her first quarter if the Elongation be in the east, and like her last quarter if west. Both Mercury and Venus exhibit these phases, passing from new to full while moving from inferior to superior Conjunction, and from full to new again while passing from superior to inferior Conjunction.

Occultation.—It often happens that the Moon or her orbital motion passes before, and hides from a spectator on the Earth, certain of the fixed Stars, and occasionally one or other of the planets; these occurrences are called *Occultations.* Among the "Celestial Phenomena" are given the times at which certain of these Occultations take place, as well as the exact point on the Moon's disk where the observer is to look for the phenomenon; this point is reckoned from the true vertex, or highest upper portion of the Moon's image, counting continuously towards the East from ☌ to 360°. The disappearance always takes place on the left-hand side of the Moon, and the reappearance on the right, but *vice versâ* when viewed through an inverting or astronomical telescope. Stars to the sixth magnitude inclusive have been included in this summary.

Southing.—The *Time of Southing* is the time at which the heavenly bodies pass the Meridian, and is so called because they are then due south. The Meridian being a great circle passing through the Pole and Zenith of the place, the southing will also be the time when they attain their greatest altitude above the horizon.

Rising, Setting, Right Ascension, and Declination of the Planets Uranus, Neptune, Ceres, Pallas, Juno, and Vesta, 1909, about the times of opposition, at Mean Noon of the respective dates.

Millard Fillmore (elected as Vice-President)	1850	William Howard Taft	1909

THE line (or rather lines) of native sovereigns is a very long one; some Irish historians have traced the succession to about the period of the Flood, "before which time there were many princes," but, unfortunately, the records have not been preserved. According to Keating, the first sovereigns after the Milesian Conquest, of whom there is any "absolute certainty," were Heber and Heremon, Milesian princes from Galicia in Spain, who conquered Ireland, and gave to its throne a race of 171 kings. These two princes reigned jointly from the year 1300 B.C. till 1291, when Heremon alone ruled. Of their successors, who reigned from the year 1285 B.C. to the Christian Era, about 169 in number, only fifteen died comfortably in their beds; four died of the plague or some malignant distemper, the rest being assassinated, killed in battle, or dying other violent deaths. Home Rule was in existence from the earliest times till after the Conquest of Ireland by Henry II. in 1172; the Rulers, however, appear to have had anything but a peaceable, quiet time.

The following is an "authentic list" of—

IRISH SOVEREIGNS AFTER THE BIRTH OF CHRIST.

	A.D.
Fearaidhach-Fionfachtna—"a most just and good prince"; slain by his successor	4
Fiachadh-Fion—slain by his successor	24
Fiachadh-Fionohudh—the Prince with the White Cows; "murdered by the Irish plebeians of Connaught"	27
Cairbre-Cincait—murdered in a conspiracy	54
Elim—slain in battle	59
Tuathal-Teachtmar—slain by his successor	79
Mal, or Mail—slain by his successor	109
Feidhlimidh — "an excellent justiciar"; died a natural death	113
Cathoire Mor, or the Great—had thirty sons	122

Conaire—killed	145
Art-Aonfhir, the Melancholy—slain in battle	152
Lughaidh, surnamed Mac Conn—thrust through the eye with a spear in a conspiracy	182
Feargus, surnamed Black-teeth—murdered at the instigation of his successor	212
Cormac-Ulfhada—"a Prince of most excellent wisdom, and kept the most splendid court that ever was in Ireland"; choked by the bone of a fish at supper	213
Eochaidh-Gunait—killed	253
Cairbre-Liffeachair—slain in battle	254
Fiachadh—succeeded his father; slain in battle by his three nephews	282
Cairioll or Colla-Uais—dethroned	315
Muirreadhach-Tireach—slain by successor	319
Caolbhach—slain by his successor	352
Eochaidh-Moidhmeodhain—natural death	353
Crionthan—poisoned by his sister to obtain the crown for her son	360
Niall—surnamed of the nine hostages; killed in France, on the banks of the Loire	375
Dathy—killed by a thunderbolt at the foot of the Alps	398
Laoghaire—killed by a thunderbolt	421
Oilioll-Molt—slain in battle	453
Lughaidh—also killed by a thunderbolt	473
Murtough—died naturally	492
Tuathal-Maolgarbh—assassinated	515
Diarmuid—fell by the sword of Hugh Dubh	528
Feargus, in conjunction with his brother Daniel; manner of their deaths unknown	550
Eochaidh, with his uncle Baodan; both slain	551
Aimmereach—deprived of his crown and life	554
Baodan—slain by the two Cuimins	557
Aodh or Hugh—killed in battle	558
Hugh Slaine—assassinated	587
Aodh-Uaireodhnach—killed in battle	591
Maolcobha—defeated in a dreadful battle, in which he was slain	618
Suibhne-Meann—killed	622
Daniel—died a natural death	635
Conall Claon, jointly with his brother Ceallach; the first was murdered, the other drowned in a bog	648
Diarmuid and Blathmac—both died of the plague	A.D. 661
Seachnasach—assassinated	668
Cionfaola—succeeded his brother; murdered	674
Fionachta-Fleadha—murdered	678
Loingseach—killed in battle	685
Conual Cionmaghair—"a cruel persecutor of the Irish Church, without mercy or distinction"; sudden death	693
Feargal—routed and slain in battle	702
Fogartach—slain in battle	719
Cionaoth—defeated and found dead on the battle-field	720
Flaithbheartagh—became a monk	724
Aodh, or Hugh Alain—killed in battle	731
Daniel—died on a pilgrimage at Joppa	740
Niall-Freasach—became a monk	782
Donagh, or Donchad—"died in his bed"	786
Aodh, or Hugh—slain in battle	815
Connor, or Conchabhar—"died of grief, being unable to redress the misfortunes of his country"	837
Niall-Caillie—drowned in the river Caillie	851
Turgesius, the Norwegian chief—possessed himself of the sovereign power; "expelled the Irish historians, and burnt their books"; made prisoner, thrown into a lough and drowned	866
Maol Ceachlin, or Malachy I.	879
Hugh Fionnliath	897
Flann Sionna	913
Niall-Glundubh — "died on the field of honour"	951
Donnagh or Donough	954
Congall—slain by the Danes at Armagh	974
Daniel—became a monk	984
Maol Ceachlin II.—resigned on the election of Brian Boroimhe as King of Ireland	1002
Brian Boroimhe—a valiant and renowned prince; defeated the Danes in the memorable battle of Clontarf, on Good Friday, 1014; assassinated in his tent the same night, while in the attitude of prayer. He was 30 years king of Munster, and 12 years king of Ireland	1014
Maol Ceachlin II. restored	1039
Donough, or Denis O'Brian, third son of the preceding	1048
Tirloch, or Turlough, nephew of Donough	1098
Muriertagh, or Murtough—resigned and became a monk	1110
Turlough (O'Connor) II.—the Great	1130
Murtough MacNeil MacLachlin—slain in battle	1150
Roderic, or Roger, O'Connor	1168
Henry II., King of England—conquered the country, and became Lord of Ireland	1172

(The English monarchs were styled "Lords of Ireland" until the reign of Hen. VIII., who styled himself King; this title continued till the Union, 1st Jan., 1801.)

Physicians in Ordinary, Sir J. Williams, Bt., M.D.; A. J. R. Oxley, M.D.
Surgeon in Ordinary, Edgar Hoffmeister, M.B.

The Peerage.

In a broad sense this heading is commonly taken as identical with the one that follows; but there are close upon 130 holders of titles of long-standing nobility who are not members of the Upper House of Parliament, their peerages being those of Scotland or Ireland only. But, as further explained below, there are about an equal number of Peers of those kingdoms who possess additional titles which constitute them members of the Lords, these titles being in a majority of instances, though very far from all, inferior to those by which they are generally known. A considerable complication is the result, but to lessen the trouble of reference we have now arranged all Peers of the same rank under a single alphabet for that rank, distinguishing every Peer whose title is Scottish or Irish, and also such of these as possess Imperial titles in addition. The full details as to each are given under his leading title, and a reference is in every case supplied under any other that he may hold, so that the table of equivalent titles formerly given in this work is no longer needed: a double index will be found in "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE," pages 36–7.

THE HOUSE OF LORDS,

the *Magnum Concilium* of the early chroniclers, consists of the Spiritual Lords of England (the 2 Archbishops and 24 of the Bishops), the Temporal Peers of England, Great Britain, and the United Kingdom, and of Representative Peers of Scotland and Ireland, together with such Scottish and Irish Peers as have also Imperial titles. No Peer can take his seat if he be under age, of unsound mind, or bankrupt. The *full* Assembly would consist of 3 Princes of the Blood Royal, 2 Archbishops, 22 Dukes, 23 Marquesses, 124 Earls, 40 Viscounts, 24 Bishops, 334 Barons, and 16 Scottish and 28 Irish Representative Peers: total 616. See WHITAKER'S PEERAGE, page 18, for complete table, showing numbers of Life Peers, Minors, &c. There are also 12 Ladies who are Peeresses in their own right, whose titles and names, along with those of Scotland, are given below at page 100. Female succession may occur in the Imperial Peerage in any Barony of England which was conferred by writ of summons; but it is subject to the rule of *abeyance* whenever there are more than one daughter, sister, &c., eligible to succeed. There are also a few cases in which "special remainders" have been granted to female relatives in the absence of males. We use the term "Imperial" as including the three series of Peers of "England" (up to June 20, 1707), "Great Britain" (thence till close of 1800), and "United Kingdom" (1801 onward).

SCOTTISH AND IRISH PEERS.

There are in all 87 Scottish Peers and 175 Irish, but of the total 262 there are 133 possessing Imperial titles and 129 without them. Of the 87 Scottish, 51 have Imperial titles and 16 are elected or re-elected every Parliament to sit in the Lords; and similarly of the 175 Irish 82 hold Imperial titles, and 28 are elected for life. Of the Imperial titles of the two kingdoms there are 76 which are inferior to the native ones, 30 are superior, 12 are identical in rank but differing in designation, and 15 are absolutely the same. Of the 3 Scottish Peeresses cited on page 102, that of Melfort is subject to a degree of doubt, so that the lady does not assume it. There are other lines in the Scottish Peerage which are open to female succession, and this is not subject to abeyance as in England. In the Irish Peerage, on the other hand, the only titles open to female succession are the Massereene Viscounty and the La Poer Barony, the latter now held by the Marquess of Waterford. It will be observed that Ireland possesses a great advantage over Scotland in the Lords as it does in the Commons, its native Peers who hold Imperial titles numbering, as just stated, 82 as against 51 of Scotland, and its elected Representative Peers 28 as against 16. An Irish Peer who holds no Imperial title has also the special privilege of being able to seek election to the Commons for any constituency not in Ireland itself.

Contractions.—*S.* or *I.* appended to the date of creation denotes a *Scottish* or *Irish* title; the further addition of a * implies that the Peer in question holds also an Imperial title, which is specified (after the name) by its more definite description as *Engl.*, *Brit.*, or *U.K.* When both titles are alike, as in the case of Argyll, this star is appended to the conjoined date below, and it then denotes that such date is that of the Imperial creation. A † appended to *S.* or *I.* implies that the Peer is an elected Representative to the House of Lords. For the mark ° see heading to Marquesses; *b.* signifies born; *s.*, succeeded; *m.*, married; *w.*, widower or widow; *div.*, divorced; *M.*, minor.

COMPLETE LIST OF THE PEERS.

PRINCES OF THE BLOOD ROYAL (3).—*Style*, His Royal Highness the Duke of ——. *Addressed as*, Sir, or more formally, May it please your Royal Highness.

1901 George Frederick Ernest Albert, Prince of Wales, Duke of Cornwall (1337) and York (1892) (*Scott. Duke, Rothesay*), *b.* 1865, *s.* 1901, *m.* ...Prince Edward, *b.* 1894 — *Eldest Son or Heir.*

Eldest Sons of Knights in order of their Fathers.
Members 5th Class of the Royal Victorian Order.
Younger Sons of the younger Sons of Peers.
Baronets' younger Sons.
Younger Sons of Knights in the same order as their Fathers.
Naval, Military, and other Esquires by Office.

Women take the same rank as their husbands or as their eldest brothers; but the daughter of a Peer marrying a Commoner retains her title as Lady or Honourable. Daughters of Peers rank next immediately after the wives of their elder brothers, and before their younger brothers' wives. Daughters of Peers marrying Peers of lower degree take the same order of precedency as that of their husbands; thus the daughter of a Duke marrying a Baron degrades to the rank of Baroness only, while her sisters married to commoners retain their rank and take precedence of the Baroness. Merely official rank on the husband's part does not give any similar precedence to the wife."

There are three Orders confined to Ladies: The Order of Victoria and Albert, the Crown of India, and the Royal Red Cross. But members are entitled to no special precedence.

LOCAL PRECEDENCY.—No written code of county or city order of precedence has been promulgated, but naturally in the county the Lord Lieutenant stands first, and secondly the Sheriff. In London and other Corporations, the Mayor stands first, after him the Aldermen, Sheriff, Chief Officers, and Livery. At Oxford and Cambridge the High Sheriff takes precedence of the Vice-Chancellor.

* For fuller tables (and for *Scottish and Irish Precedency*) see Introduction to "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE," a companion volume, price 5s. net.

England, Great Britain, U. K., and 59 Ireland (marked I).

Orders of Knighthood usually restricted to Peers.

*** *For full particulars see* "Whitaker's Peerage, Baronetage, Knightage and Companionage." The Imperial Orders of Knighthood are the Garter, Thistle, and St. Patrick, usually restricted to Peers; and the Bath, Star of India, St. Michael and St. George, Indian Empire, and Royal Victorian Order, open to Commoners also. There are also Orders of Knighthood which have no Knights, *e.g.*, the Distinguished Service Order and the Imperial Service Order, the members (Companions) of which will be found in separate lists.

KNIGHTS OF THE MOST NOBLE ORDER OF THE GARTER (1349)—K.G.

Ribbon, Garter Blue. *Motto*, Honi soit qui mal y pense *(Evil be to him who evil thinks)*.

THE SOVEREIGN.

The Order of Merit—O.M.

INSTITUTED *26th June*, 1902.

MEMBERS.

Membership is of two kinds, Military and Civil; the former having crossed swords, and the latter oak leaves, upon the badge. Members take no precedence, but are authorised to place the letters O.M. after the G.C.B. and before the other Orders.

Field-Marshal Earl Roberts of Kandahar, *VC*, K.G., K.P.
Field-Marshal Viscount Wolseley, K.P.
General Viscount Kitchener, G.C.B.
Viscount Morley of Blackburn.
Lord Rayleigh, F.R.S.
Lord Lister, F.R.S.
Admiral of the Fleet Sir Edward Hobart Seymour, G.C.B.
Sir William Huggins, F.R.S.
Field-Marshal Sir George Stuart White, *VC*, G.C.B.
Sir Laurence Alma-Tadema.
Admiral of the Fleet Sir John Fisher, G.C.B.
George Meredith.
William Holman-Hunt.
Earl of Cromer.
Rt. Hon. James Bryce.
Sir Joseph Dalton Hooker.
Field-Marshal Prince Yamagata.
Field-Marshal Prince Oyama.
Admiral Count Togo.
Miss Florence Nightingale.
Professor Henry Jackson.
Alfred Russel Wallace.

The Distinguished Service Order—Companions. D.S.O.

EXCLUSIVE OF SUCH COMPANIONS AS HOLD HIGHER DISTINCTIONS, *q.v.*

Ribbon, Red with blue edge.

INSTITUTED *9th November*, 1886.

SOVEREIGN: HIS MAJESTY KING EDWARD VII., EMPEROR OF INDIA.

COMPANIONS. D.S.O.

Officers of the Orders of Knighthood.

*** *For full particulars see* "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE."

THE MOST HONOURABLE ORDER OF THE BATH (1399). (Remodelled 1725 and 1815, and enlarged twelve times since.)—THE SOVEREIGN; *Great Master and Principal Knight Grand Cross, Field-Marshal* H.R.H. the Duke of Connaught and Strathearn, K.G., K.T., K.P., G.C.S.I., G.C.M.G., G.C.I.E., G.C.V.O.; *Dean of the Order*, The Dean of Westminster; *Bath King of Arms*, Rt. Hon. Sir Spencer Cecil Brabazon Ponsonby-Fane, G.C.B., I.S.O.; *Registrar and Secretary*, The Comptroller of the Lord Chamberlain's Department—for the time being Col. Sir Douglas Dawson, K.C.V.O., C.M.G.; *Gentleman Usher of the Scarlet Rod*, Charles George Barrington, C.B.; *Chancery*, The Lord Chamberlain's Office.—G.C.B., Knight Grand Cross; K.C.B., Knight Commander; C.B., Companion—each marked (*m*) or (*c*) for Mil. or Civ. Division.

THE MOST EXALTED ORDER OF THE STAR OF INDIA (1861).—THE KING-EMPEROR; *Grand Master and First and Principal Knight Grand Commander*, Viceroy and Gov.-Gen. of India; *Secretary* (in India), Spencer Harcourt Butler, C.I.E.; *Registrar*, The Comptroller of the Lord Chamberlain's Department—for the time being Col. Sir Douglas Dawson, K.C.V.O., C.M.G.—G.C.S.I., Knight Grand Commander; K.C.S.I., Knight Commander; C.S.I., Companion.

THE MOST DISTINGUISHED ORDER OF ST. MICHAEL AND ST. GEORGE (1818).—THE SOVEREIGN; *Grand Master and First and Principal Knight Grand Cross*, H.R.H. the Prince of Wales, K.G., K.T., K.P., G.C.B., G.C.S.I., G.C.I.E., G.C.V.O., I.S.O.; *Prelate*, Rt. Rev. Henry Hutchinson Montgomery, D.D.; *Chancellor*, The Duke of Argyll, K.T., P.C., G.C.M.G., G.C.V.O.; *Secretary*, Sir Montagu Frederick Ommanney, G.C.M.G., K.C.B.; *Registrar*, Sir F. Hopwood; *Officer of Arms*, Sir William Alexander Baillie-Hamilton, K.C.M.G., C.B.; *Chancery*, Colonial Office, S.W.—G.C.M.G., Knight Grand Cross; K.C.M.G., Knight Commander; C.M.G., Companion.

THE MOST EMINENT ORDER OF THE INDIAN EMPIRE (1878). (Since enlarged 9 times.)—THE KING-EMPEROR; *Grand Master*, The Viceroy and Governor-General of India for the time being.—G.C.I.E., Knight Grand Commander K.C.I.E., Knight Commander; C.I.E., Companion.

THE ROYAL VICTORIAN ORDER (1896).—THE SOVEREIGN; *Chancellor*, The Lord Chamberlain; *Secretary*, The Keeper of His Majesty's Privy Purse.—G.C.V.O., Knight Grand Cross; K.C.V.O., Knight Commander; C.V.O., Commander; M.V.O., Members marked 4th or 5th Class.

THE KNIGHTS BACHELORS do not constitute an Order, and hence have no officials. There is, however, a "Society of Knights Bachelor" (*Office*, 25, Essex Street, Strand, W.C.; *Registrar*, Sir William Bull, M.P.), for the protection of members of the Order

The House of Commons.

THE second Parliament of King Edward VII. was elected in January and February, 1906, and was opened by the King on 19 Feb. of that year. The General Election had returned 512 Ministerialists (374 Liberals; 54 Labour Members; 84 Nationalists) and 158 Opposition (131 Conservatives and 27 Unionists), distributed as shown in the following table:—

	Distribution of Members.				Position as to Parties (1906).		
	Counties.	Boroughs.	Universities.	Total Members.	Ministerial.	Opposition.	Majority
England	234	226	5	465	337	128	209 *Min.*
Wales	19	11	—	30	30	0	30 *Min.*
Scotland	39	31	2	72	61	11	50 *Min.*
Ireland	85	16	2	103	84	19	65 *Min.*
United Kingdom	377	284	9	670	512	158	354 *Min.*

From 1 Nov., 1907, to 31 Oct., 1908, there were bye-elections at *Ashburton* (*C.*), Rewdley, West Derbyshire, Dewsbury, *Haggerston* (*C.*), Hastings, Hull, South Leeds, *N.W. Manchester* (*C.*), *Newcastle-upon-Tyne* (*C.*), Newport (Salop), *Peckham* (*C.*), *Pudsey* (*C.*), *Ross* (*C.*), St. Austell, Central Sheffield, Wolverhampton, Worcester; W. Carmarthenshire, Mid Glamorgan, Pembrokeshire; Dundee, Kincardineshire, Montrose, Stirling; Oaslow, W. Down, Kilkenny, and N. Leitrim. Constituencies in italics were won by the political party indicated in parentheses.

At the time of going to press there was a vacancy in the Chelmsford Division (*C.*).

On 31 Oct., 1908, the parties stood as follows: Liberal and Labour, 389; Labour (L.R.C.) Members, 31; Socialist, 1; Nationalists, 83. Ministerial total, 504. Conservatives, 135; Liberal Unionists, 31. Opposition total, 166. Ministerial majority over Unionist Opposition, 338.

The total number of electors upon the register in 1908 is given below, together with the Registrar-General's estimate of the population in the middle of the year 1908:—

Division.	Electors.	Population.
England and Wales	6,058,894	35,348,780
Scotland	762,861	4,826,587
Ireland	692,726	4,363,351
United Kingdom	7,514,481	44,538,718

POLITICAL PARTIES AND ORGANISATIONS.

The principal political organisations are as follows:—

LIBERAL.—The *Liberal Central Association*, 41, Parliament Street, Westminster, S.W., is the official organisation and headquarters of the Liberal Party. The *National Liberal Federation*, 42, Parliament Street, Westminster, S.W., founded at Birmingham 31 May, 1877, is a federation of Liberal Associations in England and Wales. The *Liberal Publication Department*, under the combined auspices of the two above bodies, and of the same address, issues periodical literature and political magazines. Among other organisations the *National Reform Union*, 5, Cross Street, Manchester, and 50, Parliament Street, S.W., founded in 1864 for the advocacy of electoral reform and opposition to the Corn Laws, aims at inculcating Liberal principles by means of lectures, &c.; the *Eighty Club*, 3, Hare Court, Temple, E.C., was founded in 1880, and works on similar lines; the *Liberal League*, 20, Queen Anne's Gate, S.W., is the outcome of Lord Rosebery's speech at Chesterfield advocating the abandonment of Home Rule and certain other matters which had accrued to Liberal Programmes during recent years; *Home Counties Liberal Federation*, 42, Parliament Street, S.W.; the *London Liberal Federation*, 41, Parliament Street, S.W.; the *Women's Liberal Federation*, 124, Victoria Street, S.W.; and the *Women's National Liberal Association*, 138, Palace Chambers, S.W. The *Scottish Liberal Association* is at 7, West George Street, Glasgow, and at 95, Princes Street, Edinburgh; the *Scottish Women's Liberal Association* is at the Glasgow office. The *Chief Liberal Whip* (Patronage Secretary to the Treasury) is Rt. Hon. J. A. Pease. *Other Whips*, J. H. Lewis, Capt. C. W. Norton, and J. H. Whitley, with the Master of Elibank (for Scotland), Sir E. Strachey, and J. M. F. Fuller.

CONSERVATIVE.—The *National Union of Conservative and Constitutional Associations*, St. Stephen's Chambers, Westminster, S.W., was founded in 1867, and is a federation of Conservative and Constitutional Associations and Clubs in England and Wales. As constituted at present, it consists of 38 Provincial Divisions, a Council of about 200 members, which meets quarterly, and a Conference, which meets annually. It has five Committees, viz.: Executive, Organisation, Publication, Lecture, and Finance, which have the important duties of strengthening, stimulating, and creating electioneering organisation in the constituencies, publishing and distributing the whole of the literature for the education of the electorate, and providing and controlling the staff of speakers and lecturers; Mr. Thomas Cox is the *Secretary*. The *Conservative Central Office* is the Parliamentary department, the *Principal Agent* being Mr. J. Percival Hughes. The *National Union of Conservative Associations in Scotland* is at 1, Castle Street, Edinburgh. The *Primrose League*, 64, Victoria Street, S.W., founded in 1883, is the educating body, and aims at the Maintenance of Religion, of the Union, and of the ascendency of the British Empire: *Grand Master*, Rt. Hon. A. J. Balfour, M.P.; *President Ladies' Council*, Miss Balfour; *Registrar*, F. Willis; *Clerk of the Council*, R. Bennett. The *Conservative Whips* are Sir A. Acland Hood, Viscount Valentia, H. W. Forster, Lord Balcarres, Marquess of Hamilton, H. P. Pease, and Lord Edmund Talbot.

LIBERAL UNIONIST.—The *Liberal Unionist Council*, 6, Great George Street, Westminster, was formed in 1886, and re-constituted in 1904. Its main object is the prevention of the separation of the governments of Great Britain and Ireland. *President*, Rt. Hon. J. Chamberlain, M.P.; *Sec.*, J. Boraston.

LABOUR.—The Labour Party in Parliament is composed of 31 Labour Party nominees. The Parliamentary organisation is the *Labour Party*, 28, Victoria Street, Westminster, S.W., which selects candidates, pays a proportion of the Returning Officers' expenses, and contributes £200 a year towards the maintenance of elected members. *Sec.*, J. R. Macdonald, M.P. The *Labour Whips* are G. H. Roberts and C. Duncan. In addition to the Labour Party of 31 members there are 15 representatives of the Miners' Federation, and 8 Trade Union and other representatives, the whole 23 composing the *Trade Union Group*. Under the heading of Labour may also be included one Socialist.

SOCIALISTS. — The *Social Democratic Party*, Chandos Hall, 21A, Maiden Lane, Charing Cross, W.C., and the *Independent Labour Party*, 10, Red Lion Court, Fleet Street, E.C., have many aims and some members in common. The *Fabian Society*, 3, Clement's Inn, Strand, W.C., preaches an intellectual Socialism to the middle classes.

IRISH PARTIES.—The *United Irish League* represents the Nationalist Party, and the Nationalist Whips are Capt. A. J. C. Donelan, P. O'Brien, E. Haviland Burke, and J. P. Boland. The Irish Unionist party is represented by the *Irish Unionist Alliance*, 109, Grafton Street, Dublin. *Sec.*, R. G. Carden, D.L.

TARIFF REFORM.—The *Tariff Reform League*, 7, Victoria Street, Westminster, S.W., was founded in 1903, in furtherance of Mr. Chamberlain's proposals for the reform of the Fiscal System of the United Kingdom. *Sec.*, T. W. A. Bagley.

WOMEN'S SUFFRAGE.—The principal organisation for putting forward the claims of women to the Parliamentary franchise are the *National Union of Women's Suffrage Societies*, 25, Victoria Street, Westminster, S.W.; the *London Society for Women's Suffrage* (at the same address) is a Society in the above Union of 54 Societies and their branches; the *Women's Social and Political Union*, 4, Clement's Inn, W.C.; the *Lancashire and Cheshire Women's Textile Workers' Representation Committee*, 5, John Dalton Street, Manchester; and the *Women's Co-operative Guild*, Kirkby Lonsdale. The offices of the *Women's Local Government Society* are 17, Tothill Street, S.W.

RESIGNATION OF MEMBERS OF PARLIAMENT.—No member of the Commons can resign his seat; he must apply for some office of profit under the Crown, and so vacate his seat under the Act of Settlement (6 Anne, c. 7), and the usual practice is to apply for the Stewardship of the *Chiltern Hundreds*, or of the Manor of Poynings, or Northstead, or the Escheatorship of Munster, whereupon the seat is declared vacant and a writ issued.

SESSION 1908.

(Up to the adjournment, *August* 1, 1908.)

THE CHANGE IN THE PREMIERSHIP. — The death of Sir Henry Campbell-Bannerman, following immediately upon his retirement from the Premiership, had an appreciable effect upon the course of the Session, besides that which followed in the reconstitution of the Ministry. Contracting influenza in the opening days of the Session, he was only able to be present in his place upon a few occasions, and when on *April* 5 the King, while at Biarritz, received a letter tendering his resignation, no surprise was felt. Mr. Asquith was at once summoned, and he had completed his Cabinet and was in a position to resume Parliamentary business when Sir Henry succumbed on *April* 22. In both Houses, noteworthy tributes to the memory of the late Premier were delivered by the leaders of all parties. The principal changes in the Cabinet involved by the reconstruction were that Mr. Lloyd-George became Chancellor of the Exchequer, Mr. Winston Churchill President of the Board of Trade, Earl Crewe Colonial Secretary, Mr. McKenna First Lord of the Admiralty, and Mr. Runciman President of the Board of Education, the new Premier of course assuming the position of First Lord of the Treasury.

KING'S SPEECH.—In the Royal Speech, read by the King in person on *January* 29, it was announced that Bills would be introduced to amend the Licensing law in England and Wales; to amend the law relating to elementary education; to regulate the hours of underground labour in coal mines; to amend the Acts relating to the housing of the working classes; to amend the system of valuation of property in England and Wales; to improve and extend University education in Ireland; to amend the Land Purchase (Ireland) Act of 1903; to establish an authority for the control and improvement of the Port and Waterway of London; and to consolidate and amend the law relating to the protection of children and to the treatment of juvenile offenders. In the Lords, the address was moved by Lord Airedale and seconded by Lord Nunburnholme, and after brief discussions was agreed to. The proposer and seconder in the Commons were respectively Mr. R. C. Lehmann and Mr. W. H. Davies. It was finally carried on *Feb.* 6 after some interesting debates. The first amendment proposed was that of Mr. Ramsay Macdonald, regretting the absence of legislation for dealing with unemployment. Others relating to the condition of affairs in India and constitutional reform in Egypt were withdrawn after the replies of Mr. Morley and Sir E. Grey respectively; and these were followed by the official Opposition amendment, moved by Mr. W. Long, censuring Ministers for failing to give any assurance as to the adoption of measures for the better protection of life and property in Ireland. This was eventually rejected by 414 against 115. Sir W. Holland represented that the Board of Trade should rank with departments of Secretaries of State, with which view the Government agreed; and Sir Gilbert Parker censured the Government for not safeguarding the interests of civil servants in the Transvaal.

THE BUDGET.—Mr. Asquith introduced his Budget on *May* 7. He estimated the receipts, on the basis of existing taxation, at £157,770,000, and the expenditure at £152,869,000. He proposed to remit the sugar duty, which would account for £3,400,000, and to reduce marine insurance, £20,000 being lost by this alteration. The cost of the Old Age Pensions scheme during the quarter that would come in the year 1908–9

was set down at £1,200,000, and £1,240,000 was allotted to local authorities; the final surplus for 1908-9 being £241,000. The realised surplus was £4,726,000, which, with certain exceptions, would be applied to the reduction of the National Debt. The chief opposition to the Premier's proposals was directed against the Old Age Pensions scheme, but as this was embodied in a separate Bill it is dealt with elsewhere. On the second reading of the Finance Bill, on *June* 1, an official amendment was proposed regretting that, in view of the growing liabilities of the nation, no attempt had been made to increase the resources of the Exchequer by broadening the basis of taxation; but this was rejected by 367 to 124 (a majority of 243), and the Bill was read a second time. Several proposals to reduce the duty on tea were defeated in Committee, and on *July* 25 the third reading was adopted, and being passed through the Lords the measure received the Royal Assent on *August* 1.

THE INDIAN BUDGET.—The Indian Budget was outlined by Mr. Buchanan on *July* 22. It showed that there had been three reductions of the Salt Duty, accounting for a loss of revenue to the amount of three and a quarter millions. These reductions had benefited the people greatly, there having been an increase in the consumption of about twenty-five per cent. He said the general diminution of the opium revenue had to be faced, which would probably cost in the current year £300,000, and in ten years' time the revenue would cease altogether. Expenditure on police, education, and the army had largely increased, but a slow but fairly steady decrease in military expenditure might be expected in future. Despite this additional expenditure there was still a surplus.

LICENSING.—The measure which had promised to be the principal one of the Session, the Licensing Bill, was introduced on *Feb.* 27 by Mr. Asquith, who outlined its proposals at considerable length. He said the Government proposed to provide for the compulsory reduction within a specified period of the number of "on" licences upon a uniform scale, based upon the ratio between licences and population. Where there were two persons per acre they proposed that the number of "on" licences should not exceed one to 400 persons. Between two persons and 25 per acre the maximum number of licences was to be one to 500 persons, and so on up to one licence to 1,000 persons where there were more than 200 persons to the acre. The scheme would lead to the suppression of about 32,000 licences. The Bill, he said, restored to the Licensing authorities the discretion taken away from them by the Act of 1904, with regard to the renewal, repeal, and transfer of all existing "on" licences. There was to be compensation for the extinction of licences during the statutory period, and the time limit after which the nation would resume absolute domination was 14 years. The Bill, which also dealt with the inspection of clubs and Sunday closing, was read a first time on its introduction. The second reading was postponed for a considerable time, and was moved by Mr. Asquith on *April* 28. A protracted discussion took place on the official Opposition amendment, introduced by Mr. Cave, calling upon the House to refuse further to proceed with a measure which, while failing to promote the cause of temperance, violated the principles of equity. This was rejected by 397 to 147, and the second reading was carried by 394 to 148. Before the Committee stage commenced the House adopted, after some opposition and two divisions, a motion defining and limiting the time to be spent upon each clause. On *July* 20 the first clause was considered in Committee, and after several amendments had been defeated the closure was put into force and the clause carried by 348 to 140. The remainder of the Bill was postponed until the Autumn Session, seventeen days of which were allocated to Committee, five days to report, and one day to third reading.

OLD AGE PENSIONS. — The Government's scheme of providing old age pensions was unfolded by Mr. Asquith in his Budget statement, and was later embodied in a Bill. The age limit was fixed at 70, and the amount of pension at £13 per annum, while the income limit was first put at £26 per annum, though the principle of a sliding scale was subsequently accepted by the Government and inserted in the measure. Mr. Asquith estimated that 500,000 persons would satisfy the conditions and be entitled to pensions, and the cost at first was estimated at £6,000,000. The second reading was moved by Mr. Lloyd-George on *June* 15. An amendment by Mr. Cox, favouring a contributory scheme, was defeated by 417 against 29, and the Bill was read a second time and referred to Committee. At this stage a number of minor concessions were made, and it was completed by the aid of the guillotine, though the Bill had to be recommitted in respect of the schedule containing the sliding scale. The third reading was adopted after an amendment had been defeated by 315 against 10. In the Lords, the Archbishop of Canterbury supported the Bill, as did many of the leading Unionist Peers, and the second reading was accepted by 123 against 16. In Committee Lord Cromer moved an amendment limiting the operation of the Bill for seven years, and this was agreed to by 77 against 45. Thus amended, the third reading was carried; but when the Bill returned to the Commons the Speaker pointed out that Lord Cromer's amendment infringed the privileges of the Commons, and it was disagreed with, as were several other amendments. Upon this Lord Cromer declared that his proposal was not introduced in any hostility to the Bill, and he would not insist upon it. This course was adopted in regard to the other amendments objected to by the Commons, though a resolution declining to accept the reasons offered by the Commons was, on Lord Lansdowne's motion, agreed to by 37 against 23. The Bill received the Royal Assent on *Aug.* 1, and the pensions come into operation on Jan. 1, 1909.

EDUCATION.—Mr. McKenna's Education Bill was presented on *Feb.* 24. The measure aimed at supplementing the educational system, and left to the parish school boards their present powers of administration over both elementary and secondary education. On the second reading, Mr. Runciman (who had by that time succeeded to the charge of the department) intimated that the Government would be prepared to accept amendments so long as they did not vitiate the principles of the measure. Mr. Balfour declared no desire for a solution of the difficulty could be found in the Bill, while Mr. Asquith appealed to the House to facilitate agreement. An amendment for the rejection was negatived by 370 to 205, and the Bill was referred to Committee. On *March* 18, in the Lords, the Bishop of St.

Asaph introduced an Education Bill, in which, on the second reading on *March* 30, Lord Crewe said the Government recognised an honest attempt to arrive at a settlement. The question was put off until the Autumn Session.

PORT OF LONDON.—The Bill to set up a public authority to control the Port of London was introduced by Mr. Lloyd-George on *April* 2 and read a first time, and the second reading was agreed to without a division on *May* 6, when the Bill was referred to a Joint Committee of Lords and Commons. Towards the close of the Session they reported that the Bill ought to be allowed to proceed.

MINERS' HOURS.—Mr. Gladstone on *Feb.* 20 introduced the Mines (Eight Hours) Bill, and on *July* 6 it was read a second time. Its aim is to limit the time during which a miner is underground to eight hours a day, but the change is to come into operation gradually. The Bill was taken to the Grand Committee, and further progress was postponed until the autumn.

ARMY.—The most important discussion on Service matters was the debate on armaments on *March* 2. This was initiated by Mr. Murray Macdonald's motion asking the House to declare that, in view of our continued friendly relations with foreign Powers, further reductions might be made in the expenditure on the Army and Navy. Although supported by many Liberals, the resolution was resisted by the Government, and Mr. Asquith moved an amendment asking the House to support the Government in such economies of naval and military expenditure as should be consistent with the adequate defence of His Majesty's dominions. Mr. Macdonald's motion was eventually rejected by 320 against 73. During the debate which followed Mr. Haldane's statement on Army matters on *March* 4 and 5, the Government consented to the appointment of a Parliamentary Committee to inquire into the use of troops during trade disputes, and its report was presented during the Session. In the Lords, on *July* 16, Lord Lucas, Under Secretary for War, replying to the Duke of Bedford, who called attention to the state of the Territorial Army, said, as to recruiting, the men coming in were of a superior class to the men who had hitherto enlisted in the Militia. They were going through a transitory stage, he added, and it was too early to judge whether the Territorial Army would be a success or a failure. On *July* 27 Mr. Haldane stated that on January 1 the strength of the Militia, infantry and cavalry, was 83,672, while on July 1 the number of Militiamen was 44,137, and of special reservists 30,161, making a total of 74,297. For the Special Reserve 54,000 men were in sight. An amendment for the reduction of the vote of £840,000 for this branch of the Service was rejected by 231 against 77, and the vote was agreed to.

NAVY.—In the Commons, on *March* 10, Mr. Asquith announced that by January, 1911, Great Britain would have 12 ships of the *Dreadnought* and *Invincible* class; and if there appeared a probability of Germany having 13 of these ships by the end of that year, the Government would provide for a sufficient number of ships to prevent the superiority of Germany. When the shipbuilding programme was considered in Supply on *July* 13, Mr. McKenna repeated this declaration, and said that in 1911 Britain would have over Germany a marked superiority in regard to the *Dreadnought* and *Invincible* type. Britain would have eight *Dreadnoughts* and four new great cruisers, while Germany, if she completed her programme as speedily as she hoped, would have seven *Dreadnoughts* and two *Invincibles*. Next year the Government would lay down all the ships that might be necessary to ensure security in 1911 and 1912. In the Lords, on *March* 18, Lord Tweedmouth declared that in 1911 the combination of no two first-class Powers in the world would be equal to the strength of Great Britain.

CHILDREN'S BILL.—Mr. Herbert Samuel, Under Secretary at the Home Office, on *Feb.* 10 brought in a Bill, which was then read a first time, to consolidate and amend the law relating to the protection of children. It dealt with juvenile smoking, and proposed to separate juvenile offenders from adult criminals, special courts being established. The Act relating to baby farming was to be strengthened, and the powers of societies for the prevention of cruelty to children were to be increased. On the second reading, on *March* 24, it was announced by Mr. Samuel that the Home Secretary had decided to add provisions for securing the greater safety of children attending theatrical entertainments in large numbers. The measure was then passed through Grand Committee, and the report and other stages reserved for the Autumn Session.

HOUSING AND TOWN PLANNING.—Another measure which went over to the Autumn Session was the Bill introduced by Mr. Burns to amend the law relating to the housing of the working classes, and to provide for town planning schemes. It was read a second time without a division on *May* 12, and referred to the Standing Committee—a stage which had not been completed when the Session concluded. On that occasion Mr. Burns said the Government's object was to provide for the people housing conditions by which they would benefit physically and morally, and to abolish slums. The Bill would enable the Local Government Board to authorise the various authorities to prepare town planning schemes, and if necessary the Board would order the authority to act, and enforce its command by mandamus. Through Mr. Walter Long the Opposition gave the measure a friendly reception.

IRELAND.—The chief Irish measure was the Universities Bill, which passed into law by the end of the Session. By this two new Universities will be established at Dublin and Belfast. On its introduction by Mr. Birrell, on *March* 31, Mr. Balfour received it with great favour, but throughout its passage the Ulster members and the Liberal Nonconformists opposed the measure. The second reading was carried on *May* 11 by 344 to 31. A provision was inserted permitting the erection of a chapel within University precincts, but on the report stage Mr. Birrell was obliged to accept an amendment omitting this. The third reading was agreed to on *July* 25, when the Bill was read a first time in the Lords, the second reading being carried on *July* 27. During the Committee stage permission to erect a chapel within University precincts was given, but when the Bill went to the Commons it was disagreed with by 142 against 40, and the Lords agreeing to this the Royal Assent was given on *Aug.* 1. There was a Home Rule debate in the Commons on *March* 30, when Mr. Redmond's motion was agreed to by a majority of 156, the official Opposition amend-

ment being rejected by 334 against 142. A Bill to amend the Evicted Tenants Act by modifying the amendment inserted by the Lords in 1907, which was afterwards found to have had the effect of excluding the Clanricarde estate from the scope of the Act, was passed into law, as was the Summary Jurisdiction (Ireland) Bill, amending the law relating to drunkenness in Ireland. Bills relating to the Bee Pest, Grand Juries, Seed Potatoes and Seed Oats, Whale Fisheries, and the Prevention of Tuberculosis also received the Royal Assent.

SCOTLAND.—At the very outset of the Session the Small Landholders and Land Values Bills for Scotland, which failed to obtain places on the Statute Book in the preceding Session, were presented to the Commons. On *Feb.* 12 Sir H. Campbell-Bannerman, in one of his final utterances, moved a resolution to closure the two Bills by compartments, holding that it would be wrong to sacrifice valuable time in useless debate on questions which had been decided so recently; and after two amendments had been defeated, the motion was carried by 331 against 84. The various stages of the Bills were accordingly gone through without delay, and they were sent up to the Lords. On *March* 11 the latter House adopted, by 153 against 33, a resolution declining to pass the Small Landholders Bill, because it unnecessarily extended the provisions of the Crofter Acts throughout Scotland. The Lords gave the Land Values Bill a first reading on *Feb.* 27; and although on the second reading, on *March* 25, Lord Ridley moved its rejection, this stage also was carried. In Committee a number of amendments were agreed to, despite the declaration of the Government that they had insuperable objections to some of them, and finally the Government abandoned the Bill.

SPEAKERS OF THE COMMONS SINCE 1660.

PARLIAMENT OF ENGLAND.

1660. Sir H. Grimston.
1661. Sir E. Turner.
1673. Sir J. Charlton.

John Atkinson, K.C.	*Attorney-General*	John Atkinson, K.C.
James Henry Mussen Campbell, K.C.	*Solicitor-General*	James Henry Mussen Campbell, K.C.

Premiers, Principal Secretaries,

Premiers and Secretaries of State.—The inability of George I. to understand the English language made his attendance at meetings of the Cabinet "useless and irksome, and allowed the appearance of a Prime Minister, for his example has been so consistently followed as to have become a settled custom." In 1905 the office of Prime Minister was officially recognised. The first mention of a King's Secretary of State is under Henry III. In 1433, owing to press of work in France, two Secretaries were appointed, and under Henry VIII. there were still two. Under Elizabeth we find one Secretary only in the early years of her reign, but afterwards two, and until 1794 two seems to have been the normal number; though from 1707 to 1746 we find a third Secretary for Scottish, and from 1768 to 1782 a similar Secretary for Colonial, business.

From 1688 to 1782 one of the two dealt with matters pertaining to the Northern States of Europe, the other with matters pertaining to the Southern States, Home, Irish, and Colonial business. In 1782 the former became Foreign and the latter Home Secretary, still retaining Irish and Colonial business. The Home Secretary was also responsible for the Secretary at War, who, though not a Secretary of State, directed the movements, payment, and civil control of the Army. In 1794 a Secretary of State for War was appointed to manage all military business, and in 1801 he was given the control of the Colonies. In 1854 the War Secretary was relieved of Colonial business, and a fourth Secretary of State was appointed for the Colonies. In 1858 the Secretary of State for India was appointed.

Solicitor-General	Redmond Barry	2,000

ADMIRALTY, Whitehall, S.W.

The management of all maritime affairs, the government of the Royal Navy, jurisdiction in maritime cases, and the appointment and commissioning of Naval officers, was in early times the province of the "Lord High Admiral," the ninth Great Officer of State. The judicial functions of the office have long been vested in other hands, and the office itself has been "in commission" since 1708 except for a short time in 1827, when the Duke of Clarence was Lord High Admiral, the duties being performed by "Commissioners for executing the office of Lord High Admiral of the United Kingdom." These Commissioners, or "Lords of the Admiralty" as they are more generally called, consist of a Political First Lord (who, by virtue of the importance of his office, is a Cabinet Minister), a "First Sea Lord," "Second Sea Lord," "Third Sea Lord and Controller," and a "Fourth Sea Lord," now always selected from Officers of the Service, with a Political "Civil Lord." There is also a "Parliamentary and Financial Secretary" and a non-political Permanent Secretary. The *net* amount provided in the Navy Estimates 1908-9, for salaries, &c., of the Board and subordinate officials is £370,000.

LORDS COMMISSIONERS—

First Lord, The Rt. Hon. Reginald McKenna, M.P. £4,500

AGRICULTURE AND FISHERIES, Board of, 4 Whitehall Place; 3 St. James's Square, and 3 Delahay Street, S.W.

The Board of Agriculture was established by the Act of 1889, when there were transferred to it the duties of the Privy Council in connection with Diseases of Animals, and the functions of the Land Commissioners for England. Technically, the membership of the Board is analogous to that of the Local Government Board, and "Board of Education, but in effect the establishment comprises a President, Secretary, Assistant Secretaries, &c., and its main functions are to prevent the introduction or spread of certain diseases among animals, to deal with insect and fungus pests, to collect and distribute information relating to agriculture, horticulture and forestry in Great Britain, to administer the Grant voted by Parliament to the Board for Agricultural Education in England and Wales, to collect and publish agricultural statistics, to administer the Fertilisers and Feeding Stuffs Act and the Sale of Food and Drugs Acts in Great Britain so far as the latter relate to agricultural produce, to control the redemption of tithe rent charge and the enclosure of common land, to enfranchise copyhold land, to administer the Small Holdings and Allotments Acts and the Acts relating to the improvement of land by private owners, and to administer the Acts relating to Sea, Salmon and Freshwater Fisheries as regards England and Wales. The Board also publish a monthly "Journal," price 4d. By the Board of Agriculture and Fisheries Act of 1903 certain powers and duties formerly exercised by the Board of Trade with respect to fisheries were transferred to this Department, the designation of which was at the same time changed. The Board also control the Ordnance Survey of the U.K., which is the subject of a separate note. By an Order in Council of 28 March, 1903, the supervision of the Royal Botanic Gardens, Kew, was transferred to the Board. The cost of administration in the financial year 1908-9 was estimated at £148,124.

President, Rt. Hon. the Earl Carrington, K.G. £2,000
Private Secs., E. B. Shine, £300; R. Winfrey, M.P. *unp.*; and C. W. B. Prescott £100

ARMS, COLLEGE OF, or HERALDS' COLLEGE, Queen Victoria Street, E.C.

The Heralds' College was incorporated and endowed by Richard III. in 1484, as a College of Arms, presided over by the Earl Marshal, the other members being the then Kings of Arms, and the six Heralds, to regulate the bearing of Coat Armour, in addition to the ordinary functions of the Heralds. Their first residence was in Paternoster's Inn until the present site was granted by Queen Mary in 1554, the house being rebuilt as it now stands after destruction in the Great Fire.
Earl Marshal, His Grace the Duke of Norfolk, K.G., G.C.V.O.

KINGS OF ARMS.
Garter, Sir Alfred Scott Scott-Gatty, Knt., C.V.O., F.S.A.
Clarenceux, George Edward Cokayne, M.A., F.S.A.
Norroy, William Henry Weldon, C.V.O., F.S.A.

SIX HERALDS.
Chester, Henry Murray Lane.
Lancaster, Edward Bellasis.
Somerset, Henry Farnham Burke, C.V.O., F.S.A.
Richmond, Charles Harold Athill, F.S.A.
Windsor, Wm. Alex. Lindsay, K.C., M.A., F.S.A.
York, Gordon Ambrose de Lisle Lee.

FOUR PURSUIVANTS.

and Div. Clerks (Higher Grade), J. Ford; A. L. Guest; J. W. Joyce; C. Comper; A. Bouttwood; C. N. Francis; F. H. Lewis; A. S. Hanbury; G. Thomas; H. I. Brown; A. E. Large; H. B. Denham; S. Hart ..... £250 to £350

CIVIL SERVICE COMMISSION, Burlington Gardens, W.

The Civil Service Commission was established in 18[illegible] to apply tests of fitness for junior situations in [illegible] branches of the Civil Service. In 1870 an Order [illegible] Council applied the system of competitive examinatio[illegible] throughout the Service, and the examination of cand[illegible] dates is among the more important functions of th[illegible] Commission. The expenses of the Commission [illegible] salaries, &c., were estimated at £40,278 in 1908-9.
1st Commissioner, Lord Francis Hervey ..... £1 [illegible]
Commissioner, Stanley M. Leathes ..... £1,[illegible]
Sec. and Registrar, J. L. Le B. Hammond £800 to £[illegible]
Assist. Sec., S. Cassan Paul ..... £[illegible]
Senior Clerks, W. D. Dade and H. Finehan, I.S.O. ..... £500 to £[illegible]
Senior Examiner, D. B. Mair ..... £700 to £[illegible]
Staff Officer, J. C. Henwood, I.S.O. ..... £350 to £[illegible]

COLONIAL OFFICE, Downing Street, S.W.

The business of the Colonies was, until 1801, include[illegible] in the functions of the Home Secretary, to be trans[illegible] ferred in that year to the newly-created "Secretary fo[illegible] War." In 1854 the outbreak of the Russian War led t[illegible] the appointment of a Secretary of State for the Colonie[illegible] (to relieve the War Secretary of Colonial business). Th[illegible] Colonial Secretary possesses an advisory power of vet[illegible] on legislation of the self-governing Colonies, and i[illegible] responsible for the government of the remainin[illegible] Dominions beyond the Seas in inverse proportion to th[illegible] amount of self-government granted to them. Th[illegible] salaries, &c., of the Colonial Office are estimated a[illegible] £56,450 for 1908-9.
Principal Secretary of State for the Colonies, Rt. Hon the Earl of Crewe, K.G. ..... £5,00[illegible]
Priv. Sec., Lionel Earle, C.M.G. ..... £30[illegible]
Assist. do., H. C. W. Verney, £150; W. C. Bottomle[illegible] ..... £10[illegible]

UNDER-SECRETARIES.
Permanent, Sir Francis J. S. Hopwood, G.C.M.G., K.C.B. ..... £2,00[illegible]

and Div. Clerks (Higher Grade), W. Scott; T. Wilson; W. E. Hobson; J. A. Smith; E. E. Wilkinson ..... £250 to £35[illegible]
Medical Adviser, Sir Patrick Manson, M.D., C.M.G., F.R.S. ..... £250 to £35[illegible]

Emigrants' Information Office.—£1,700.
31 Broadway, S.W.—(10 to 5. Sat. 10 to 1.30.)
Pres., Committee of Management, The Secretary of State for the Colonies.
Chairman, do., F. G. A. Butler.
Chief Clerk, Malcolm Jones.
Editor of Publications, Walter B. Paton, M.A.

COLONIES, CROWN AGENTS FOR THE,

Whitehall Gardens, S.W., and 1 Tokenhouse Buildings, E.C. (for Stock transfers only).

The Crown Agents for the Colonies are appointed by the Secretary of State for the Colonies, and act as commercial and financial agents in this country for all Colonial Governments which do not possess an Agent-General. The self-governing Colonies cannot avail themselves of the services of the Crown Agents and have established Agents of their own (see p. 454).
Crown Agents, Sir E. E. Blake, K.C.M.G.; Maj. M. A. Cameron, C.M.G., late R.E.; W. H. Mercer, C.M.G.
Secretary, P. H. Ezechiel.
Chief Clerk and Accountant, E. G. Antrobus.
Assistant Accountant, N. E. O. Willis.
Registrar for Inscribed Stocks, C. F. R. H. Urquhart.
Chief Cashier, L. Adams.
Head of Engineering and Works Dept., Maj. J. F. Carmichael, R.E.
Head of Engineering Inspection Dept., A. M. Heath, A.M.I.C.E.
Head of General Stores Dept., H. F. Smith.
Head of Shipping Dept., W. E. James.
Head of Appointments Dept., H. Martin.

CORNWALL, DUCHY OF, Buckingham Gate, S.W.

Cornwall was created a Duchy by Edward III. for the support of his eldest son afterwards created Prince of Wales, and the eldest son of the Sovereign has since been born Duke of Cornwall, the revenues of the Duchy accruing to the Duke. The internal government of the Duchy was amended by the Acts of 1863 and 1893, and certain peculiar juridical powers abolished. The accounts of the Duchy will be found on page 463.
Lord Warden of the Stannaries, The Lord Balfour of Burleigh, K.T.
Keeper of Privy Seal, The Earl of Mount Edgcumbe, G.C.V.O.
Attorney-Gen., Charles Alfred Cripps, K.C.
Receiver-General, The Lord Revelstoke.
Auditor, Sir Lesley Charles Probyn, K.C.V.O.
Sec. and Keeper of Records, Walter Peacock.
Assistant Secretary, George Thomas Hutchinson.
Clerk Accountant and Dep. Receiver, A. E. Gillett.
Solicitor, R. E. Tucker.
Land Stewards, A. M. Webster, Wm. Proudfoot.

CUSTOMS ESTABLISHMENT, E.C.

Commissioners of Customs were first appointed in 1671 and housed by the King in London, the present "Long Room" replacing that built by Charles II. and rebuilt after destruction by fire in 1718, and 1814. In 1830 the Customs business of Ireland was transferred to London. The Board of Customs (consisting of a Chairman, Deputy Chairman, and a Commissioner) is one of the four great Revenue-collecting bodies, and for this purpose exacts the duties prescribed in the Finance Act of each year and pays the moneys received into the Bank of England for the Exchequer account. The revenue derived from Customs in the financial year 1907-8 amounted to £34,362,336, and the cost of collection (at the hands of Custom House officers in the various ports) to £1,603,790.
Chairman, Laurence N. Guillemard, C.B. £2,000
Private Sec., Harry W. Trotter.
Dep. Chairman, F. Sydney Peard, C.B. £2,500
Commissioner, Richard F. Crawford £2,200
Private Sec. to Deputy Chairman and Commissioner, L. W. Jennings.

DURHAM, COUNTY PALATINE OF.

It is uncertain when "Palatine" privileges were first exercised in the County of Durham, as no formal creation of the Palatinate by charter or deed appears to have ever been made. From the founding of the See of Lindisfarne, out of which the bishopric and palatinate of Durham arose, the Bishops received large grants of lands, with extensive immunities; and Guthred, king of Northumbria, and Alfred the Great appear to have confirmed the grant to the See of the whole of the land between the rivers Tyne and Wear. There is no evidence

of the exercise of *palatine* privileges by the Bishops prior to the Norman Conquest, but it is probable that these were acquired in the reign of the Conqueror, and they were exercised by the Prelates until arrogated by the Crown in 1836. Palatine counties are understood to have been erected for the defence of neighbouring kingdoms against the Welsh and Scots, and were in reality self-contained kingdoms in alliance with their creator. The ancient customs of the County Palatine of Durham are in some measure retained, the administrative authority being exercised on behalf of the Crown.

Temporal Chancellor, John Scott Fox, K.C.
Attorney-General, Edward Tindal Atkinson, K.C.
Solicitor-General, Herbert F. Manisty, K.C.
Registrar of Chancery Court, A. O Smith.
Steward & Clerk of Halmotes, Sir Alfred de Bock Porter, K.C.B.

Senior Legal Asst., F. G. Turner (*Church Building*).

Junior Legal Assistants, E. A. Mears; H. T. H. Bond; W. T. T. Channell.

EDUCATION, BOARD OF, Whitehall, S.W.

The Government Department of Education was, until the establishment of a separate office, a Committee of the Privy Council appointed in 1839 to supervise the distribution of certain grants which had been made by Parliament since 1834, and consisted of the Lord President, the Secretaries of State, the First Lord of the Treasury, the Chancellor of the Exchequer, and a Vice-President. The Board of Education Act, 1899, abolished the Committee of the Council, established the Board of Education, with a President and Parliamentary Secretary, and created a Consultative Committee. The Grant towards Elementary Education in 1908-9 were estimated at £21,195,375; towards Secondary Education, including the Training of Teachers, &c., at £1,302,700; towards Technical Education, Colleges, Museums, &c., £656,699 cost of administration (including Inspection) £443,376.

EXCHEQUER AND AUDIT DEPARTMENT,

Victoria Embankment, E.C.

The Comptroller and Auditor-General was appointed by Letters Patent under 29 & 30 Vict. c. 39 § 3 (1866), in place of the Comptroller-General of the Exchequer and the Commissioners for Auditing the Public Accounts, whose duties were handed over to him. The main functions of the office are: (1) In regard to the Exchequer:—The examination of the daily accounts of revenue and other public moneys paid into the Banks of England and Ireland to the account of His Majesty's Exchequer; the examination of the quarterly accounts of the Income and Charge of the Consolidated Fund, in order that the Banks may be authorised to make advances in the case of any deficiency; and also the grant of credits for Issues from the Exchequer, not exceeding the amounts sanctioned by Parliament. (2) In regard to the Audit of the Public Accounts of the United Kingdom:—To ascertain that money expended has been applied to the purpose for which the grant of Parliament was intended to provide; that the expenditure is supported by proper payment, and generally to verify the correctness of the Accounts and to report to Parliament thereon.

The Accounts of certain Crown Colonies and Protectorates are audited by the Comptroller and Auditor-General on behalf of the Secretary of State for the Colonies. In 1903 the staff employed upon these duties was amalgamated with the main establishment of the Department. The cost of this audit is borne by the Colonies and Protectorates affected.

The net expenses of the Department were estimated at £64,900 in 1908-9.

Comptroller and Auditor-General, John Arrow Kempe, C.B. £3,000
Private Secretary, W. T. Restall £100

Senior Clerks, R. W. Reay; Edith Barrett; A. H. Britton; H. J. W. Cox; W. H. Gallier; S. Waine V. G. Crawley; F. W. A. Clarke; S. Stronge; A. E. Stephenson; M. S. Kelly; John Tenney; W. Fortescue Barratt; B. Horner; J. A. Barnes; T. J. Bradley; A. T. V. Robinson; F. N. Dixon; H. N. Bunbury ..... £550 to £700
Chief Examiners, F. Wood; F. N. Warman; F. C. Goldby; H. Collot; J. R. Sowden; E. Merrick; W. W. Hunter; J. S. Lee; C. Monk; J. D. Rees; W. E. Jeffery; J. J. Garnham; W. T. Restall; J. Houldsworth; W. Anderson; M. Cleary; T. A. Pearson; P. A. N. Nicholls; W. A. Woods; T. C. Evans; H. N. Horton; B. H. Cox; J. L. Rawcliffe; W. D. Bathurst; C. H. Stoodley; C. Burley; H. J. Price; W. E. McKown; G. F. Davis; R. J. Watson ..... £350 to £500

There are also 175 *Examiners* (of these 150 are on the Home Establishment and 25 are serving as Local Auditors or Assistant Auditors in the Colonies, in addition to 12 Local Auditors or Assistant Auditors who are not on the general Establishment of the Department) ..... £100 to £350

FOREIGN OFFICE, Downing Street, S.W.

(Office hours 11 to 6.)

The Secretaryship of State for Foreign Affairs was created in 1782, superseding the ancient Secretary for the Northern Department of Europe as the Officer has been called since 1688. He is assisted by two Under Secretaries (one Parliamentary, the other Permanent), three Assistant Under Secretaries, a Librarian, a Head of the Treaty Department, and a staff of Clerks. The chief functions, in addition to the formal duties, are receiving and answering communications from individuals or other Government Departments, from Diplomatic and Consular Agents of this country or others, and in determining the policy of the country towards Foreign Powers. The administrative expenses of the Foreign Office were estimated at £64,830 in 1908-9.

FRIENDLY SOCIETIES' REGISTRY,

Central Office, 28 Abingdon Street, S.W.

A Barrister was appointed in 1828 to certify the Rules of Savings Banks, and in 1829 to certify those of Friendly Societies. In 1846 he was constituted Registrar of Friendly Societies. By the Friendly Societies Act, 1875, the central office of the Registry of Friendly Societies was created, consisting of Chief Registrar and the Assistant Registrars for England. It exercises numerous and important functions under the Friendly Societies Act, the Industrial and Provident Societies Acts, the Building Societies Acts, the Trade Union Acts, the Workmen's Compensation Acts, the Scientific Societies Act, the Savings Banks and Post Office Savings Banks Acts, the Loan Societies Act, the Shop Clubs Act, and a great number of local and personal Acts. The administrative expenses of the Registry were estimated at £8,819 in 1908-9.

Chief Registrar, J. D. Stuart Sim £1,500
Assist. Registrar, T. Hall Hall £800
Do., G. Dudley Harlow £700
Chief Clerk, G. Brown, I.S.O. £500
Statistical Clerk, W. H. Tozer £400
Actuarial Clerk, A. M. Leveaux £400
2nd Divn. Clerks (Higher Grade), G. T. Knecht; E. Bennett; T. Jordan ..... £250 to £350

GENERAL REGISTER OFFICE,

Somerset House, W.C.

The Registration of Births, Marriages, and Deaths is believed to have been inaugurated by Thomas Cromwell in 1522, but the Statutes concerning such registration are of a comparatively modern date, and were consolidated by 37 & 38 Vict. c. 88. The first Registrar-General was appointed in 1836, his work being enormously increased by the above Act of 1874, which made registration compulsory in England and Wales. The expenses of the Office were estimated at £50,745 in 1908-9.

Registrar-General, Sir William C. Dunbar, Bart, C.B. £1,200
Chief Clerk, A. C. Waters £900
Sup. of Statistics, J. F. W. Tatham, M.D. £800 to £1,000

HOME OFFICE, Whitehall, S.W.

The Secretaryship of State for Home Affairs was created in 1782, the duties having previously been assigned to the "Southern" Secretaryship, which embraced the affairs of the United Kingdom, Ireland, and the Colonies, and also Southern Europe. By the appointment of the "Home" and "Foreign" Secretaries the duties were divided in accordance with the names of the Offices, the former retaining Irish and Colonial business, and until 1794 War business also. In 1801 the Colonial business was also removed. The Home Secretary is the medium by which the Sovereign acquaints his people of his pleasure, and a channel of communication with the Sovereign, and his main functions are the maintenance of the King's peace, the enforcement of rules made for the internal well-being of the community, and the exercise of the prerogative of mercy. The administrative expenses of the Home Office were estimated at £214,967 in 1908-9.

Principal Secretary of State for Home Affairs, Rt. Hon. Herbert John Gladstone, M.P. £5,000

INLAND REVENUE OFFICES, Somerset House, W.C.

"Inland Revenue" is derived from Excise, Death Duties, Stamps, and Taxes, and is partly collected by the Post Office. The principal share, however, is collected by the Board of Inland Revenue, established in 1849 and consisting of a Chairman, Deputy-Chairman, and two Commissioners, with Joint Secretaries, Assistant Secretaries, and a staff of officials. The estimated cost of the

Department in 1908 9 was £2,353,600 (the establishment charges of the Chief Office being £340,110, and the amounts collected under the various heads above specified reached a total of £99,100,000 in the financial year 1907-8.

LANCASTER, DUCHY OF.

Office, Lancaster Place, Strand, W.C.

Lancaster was erected into a "Palatine" Duchy by Edward III. for his son John of Gaunt in 1359, but in 1399 merged into the Crown through the accession of Henry IV. Its revenues have always been kept separate, though vested in the Sovereign and his heirs. The Judicature Act has left only the Chancery Court of the Duchy, but while the Chancellor is a Political Officer of the Government, and may or may not be learned in the law, a lawyer is appointed Vice-Chancellor. The accounts of the Duchy for the year 1906–7 will be found on p. 463.

Chancellor, Rt. Hon. Lord Fitzmaurice £2,000
Private Sec., Herbert E. Mitchell.
Vice-Chancellor, O. L. Leigh-Clare.

Registrar, Preston Dist., Alexander Pearce.
Do. Liverpool Dist., F. Willis Taylor.
Do. Manchester Dist., Hubert Winstanley.

LOCAL GOVERNMENT BOARD,

Whitehall, S.W.

The Local Government Board was created by the Local Government Board Act 1871, and consists of the Lord President of the Council, the Secretaries of State, the Lord Privy Seal, the Chancellor of the Exchequer, and a Political President. The functions of the Board and of various Local Bodies were dealt with on p. 341 of the 1905 issue. The administrative expenses of the Board were estimated at £241,500 in 1908–9.

Resident Supt. House of Lords, J. K. Williams ... £300

METEOROLOGICAL OFFICE,
63 Victoria Street, S.W.

The Meteorological Office was established as a Department of the Board of Trade in 1854. Changes have been made from time to time in the management, and the control is now vested in a Director and Committee appointed by the Lords Commissioners of the Treasury. The work of the office includes the collection and discussion of meteorological observations from all oceans, the maintenance of a number of stations for daily telegraphic reports upon which forecasts and storm warnings are based, and other work incidental thereto. The administrative expenses are met by a Government grant, which amounts to £15,500 annually.

Director and Chairman of Committee, W. N. Shaw, LL.D., SC.D., F.R.S.
Marine Superintendent, Comm. M. W. Campbell Hepworth, C.B., R.N.R.
Supt. of Instruments, H. C. Curtis.
Chief Clerk, John A. Curtis.
1st Class Clerks, W. Allingham; T. D. Bell; F. J. Brodie; J. E. Cullum *(Valencia Observatory)*; C. Harding; H. Harries.

MINT, THE ROYAL, Tower Hill, E.

The Royal Mint, as now constituted, may be said to date from 1817, and the buildings from 1810, the latter being completed in that year at the cost of over £250,000. In 1870 the Coinage Act abolished the ancient post of Master of the Mint as such, and combined it with that of the Chancellor of the Exchequer. The first known Master (or Warden) of the Mint dates from Henry I., and the last Warden was Lord Maryborough (1814–23), the last Master being Professor Thomas Graham, who died in 1869. The estimated administrative expenses amount to £157,840 for 1908–9.

Master and Worker, Chancellor of the Exchequer.
Deputy Master and Engraver of H.M. Seals, Rt. Hon. William Grey Ellison-Macartney £1,500
Chief Clerk, F. L. D. Matthews ..... £500 to £700
Sen. Clerk & Reg., D. J. Scourfield ..... £300 to £400
Staff Clerk, C. T. Folkerd ..... £300 to £400
Superintendent, Operative Department, Edward Rigg, I.S.O., M.A. ..... £700 to £900
Assistant do., T. R. Sacheverell; W. J. Hocking ..... £360 to £500
Chemist and Assayer, T. K. Rose, D.SC. ... £700 to £900
Assistant Assayers, S. W. Smith, B.SC.; J. Phelps, M.A. ..... £350 to £550

Branches of the Royal Mint.

Sydney, New South Wales.
Deputy Master, E. H. S. von Arnheim £1,100
Superintendent, D. J. K. Culley ..... £550 to £750
Melbourne, Victoria.
Deputy Master, E. S. Wardell £1,100
Superintendent, M. L. Bagge ..... £800 to £900
Perth, Western Australia.
Deputy Master, J. F. Campbell £1,100
Superintendent, A. Ventris ..... £700 to £800

Ottawa, Canada.
Deputy Master, J. Bonar, LL.D. ..... £900 to £1,100
Superintendent, A. H. W. Cleave ..... £650 to £800

MUSEUM, THE BRITISH, Bloomsbury, W.C.

The British Museum may be said to date from 1753, when Parliament granted the sum of £20,000 to purchase the collection of books, &c., of Sir Hans Sloane, the building (Montagu House) being opened in 1759. The present buildings were erected between 1823 and 1857, and the original collection has increased to its present dimensions by gifts and purchases, and by the operation of the Copyright Act of 1842, which secures a copy of every publication for the Library. Rules, &c., affecting the public dates and times of opening, &c., will be found among "Places of Interest." The administrative expenses of the British Museum were estimated at £175,137 (including Natural History Museum) in 1908-9, and were met by a vote under "Education, Science, and Art," Class IV. of the Civil Service Estimates.

Director and Principal Librarian, Sir Edward Maunde Thompson, K.C.B., D.C.L., LL.D., Litt.D., F.B.A. £1,500
Assistant Secretary (vacant) ..... £600 to £700
Assistants, 1st Class, A. R. Dryhurst; E. B. Nicholson, B.A. ..... £300 to £500
Clerk in Charge of Accounts, C. P. Cooke ..... £400 to £500
Keeper of Printed Books, George K. Fortescue, LL.D. ..... £700 to £800
Assistant Keepers, Arthur W. Kaye Miller, M.A.; William R. Wilson, I.S.O.; George F. Barwick, B.A. ..... £520 to £650
Superintendent of Reading Room, G. F. Barwick, B.A.
Assistants, 1st Class, Henry Jenner, F.S.A.; Henry M. Mayhew; Cyril J. Davenport, M.B., F.S.A.; Alf. W. Pollard, M.A.; R. Nisbet Bain; W. Barclay Squire, M.A., F.S.A., F.R.G.S.; John Abraham J. de Villiers; Lawrence H. E. Taylor; Robert F. Sharp, B.A.; R. A. Streatfeild, B.A.; B. H. Soulsby, B.A., F.S.A.; F. D. Sladen, B.A.; H. Symons, B.A. ..... £300 to £500
Assistants, 2nd Class, P. Wilson, M.A.; L. C. Wharton, B.A.; G. D. R. Tucker, B.A.; W. A. Marsden, B.A.; H. Thomas, M.A.; A. J. K. Esdaile, B.A.; J. V. Scholderer, M.A.; F. W. Jekyll, B.A.; A. Forbes Johnson, B.A.; P. C. W. Hiley, M.A. ..... £150 to £300
Keeper of Manuscripts and Egerton Librarian, G. F. Warner, D.Litt. ..... £700 to £800
Assistant Keepers of MSS., F. G. Kenyon, D.Litt.; I. H. Jeayes ..... £520 to £650
Assistants, 1st Class, Henry John Ellis; John A. Herbert, B.A.; A. Hughes-Hughes; D. T. Baird Wood, M.A.; J. P. Gilson, M.A. ..... £300 to £500
Assistants, 2nd Class, H. Idris Bell, M.A.; R. E. W. Flower, B.A. ..... £150 to £300
Keeper of Oriental Printed Books and MSS., Lionel D. Barnett, Litt.D. ..... £700 to £800
Assistants, 1st Class, Rev. G. Margoliouth, M.A.; Alex. Geo. Ellis, M.A. ..... £300 to £500
Assistants, 2nd Class, Lionel Giles, M.A.; Edward Edwards, B.A. ..... £150 to £300
Keeper of Prints and Drawings, Sidney Colvin, D.Litt. ..... £700 to £800
Assist. do., Freeman M. O'Donoghue, F.S.A. ..... £520 to £650
Assistants, 1st Class, Campbell Dodgson, M.A.; R. L. Binyon, B.A. ..... £300 to £500
Assistant, 2nd Class, A. Mayger Hind, B.A. ..... £150 to £300
Keeper of Egyptian and Assyrian Antiquities, Ernest A. Wallis Budge, Litt.D. ..... £700 to £800
Assistants, 1st Class, W. King, M.A., F.S.A.; H. R. H. Hall, M.A. ..... £300 to £500
Assistants, 2nd Class, P. D. Scott-Moncrieff, B.A.; P. S. P. Handcock, B.A. ..... £150 to £300
Keeper of Greek and Roman Antiquities, Cecil H. Smith, LL.D. ..... £700 to £800
Assist. Keeper, Arthur H. Smith, M.A., F.S.A. ..... £520 to £650
Assistant, 1st Class, H. B. Walters, M.A., F.S.A. ..... £300 to £500
Assistants, 2nd Class, F. H. Marshall, M.A.; E. J. Forsdyke, B.A. ..... £150 to £300
Keeper of British and Mediæval Antiquities and Ethnography, C. H. Read, LL.D., F.S.A. ..... £700 to £800
Assistants, 1st Class, O. M. Dalton, M.A., F.S.A.; R. L. Hobson, B.A.; R. A. Smith, B.A., F.S.A. ..... £300 to £500
Assistant, 2nd Class, T. A. Joyce, M.A. ..... £150 to £300
Keeper of Coins and Medals, H. A. Grueber, F.S.A. ..... £700 to £800
Assist. Keeper, W. W. Wroth ..... £520 to £650
Assistant, 1st Class, G. F. Hill, M.A. ..... £300 to £500
Assistants, 2nd Class, John Allan, M.A.; G. C. Brooke, B.A. ..... £150 to £300
Solicitors, Messrs. Warrens, 99 Gt. Russell Street.

MUSEUM, THE NATURAL HISTORY, Cromwell Road, S.W.

The Natural History Collections in the British Museum were removed to South Kensington in 1881, the new museum being opened in the same year. The hours of opening, &c., will be found under "Places of Interest." The administrative expenses were estimated at £57,480 in 1908-9.

Director (Vacant).
Assistant Secretary, Charles E. Fagan £750
Clerks, J. F. Isaac; W. H. R. Holl; W. J. Anderson ..... £95 to £350
Assistant, 1st Class (Library), B. B. Woodward £500
Keeper of Zoology (Vacant).
Assistant Keepers, Edgar A. Smith, I.S.O.; Dr. R. Bowdler Sharpe; Charles Owen Waterhouse ..... £520 to £650
Assistants, 1st Class, George A. Boulenger, F.R.S.; Oldfield Thomas, F.R.S.; Fras. Jeffrey Bell, M.A.; W. R. Ogilvie Grant; William Fersell Kirby; Sir George Francis Hampson, Bart.; Charles J. Gahan, M.A.; Randolph Kirkpatrick; Francis A. Heron, B.A.; Dr. W. T. Calman; Ernest E. Austen; C. T. Regan, M.A. ..... £300 to £500
Assistants, 2nd Class, G. J. Arrow; A. S. Hirst; J. G. Dollman; W. P. Pycraft ..... £150 to £300
Keeper of Geology, Dr. A. S. Woodward, F.R.S. ..... £700 to £800
Assistant do., Dr. F. A. Bather ..... £520 to £650
Assistants, 1st Class, R. B. Newton; Dr. C. W. Andrews, F.R.S.; G. C. Crick ..... £300 to £500
Assistant, 2nd Class, W. D. Lang ..... £150 to £300
Keeper of Mineralogy, L. Fletcher, M.A., F.R.S. ..... £700 to £800
Assistants, 1st Class, Dr. Geo. T. Prior, M.A.; L. J. Spencer, M.A.; Dr. G. F. H. Smith, M.A. ..... £300 to £500
Keeper of Botany, Dr. A. B. Rendle ..... £700 to £800
Assistants, 1st Class, J. Britten; A. Gepp, M.A.; E. G. Baker ..... £300 to £500
Assistant, 2nd Class, W. E. Brooks, B.A. ..... £150 to £300

NATIONAL DEBT OFFICE, 19 Old Jewry, E.C.

The National Debt Commissioners were appointed under 26 Geo. III., c. 31 (1786), by which a permanent Sinking Fund was to be established, and a sum of £250,000 issued quarterly to be applied towards the reduction of the National Debt, being commonly spoken of as "Mr. Pitt's Sinking Fund." In 1829 this was superseded by appropriating the surplus income of the year as the Sinking Fund, and this is commonly known as "The Old Sinking Fund." In 1875 "The New Sinking Fund" was set up by Sir Stafford Northcote (38 Vic., c. 45), and this, with the Old Sinking Fund, now mainly operates in reducing the Debt. The Commissioners are at the present time the Speaker, the Chancellor of the Exchequer, the Master of the Rolls, the Lord Chief Justice, the Paymaster-General, and the Governor and Deputy-Governor of the Bank of England. The administrative expenses of the Board were estimated at £14,420 in 1908-9.

Comptroller-General, Sir George Hervey, K.C.B. £1,500
Private Secretary, J. J. Broe £100
Assistant Comptroller, W. G. Turpin ..... £800 to £1,000
Actuary, James Blakey, I.S.O. £1,250
Chief Clerk, A. T. King, I.S.O. £800
Principal Clerks, J. Blakey; F. M. Ashley; C. von Borg; A. Manwaring ..... £600 to £700
Assistant do., T. Gowland ..... £400 to £500; G. F. Ansell; E. R. Kennedy; H. Weatherill; W. F. Donat ..... £350 to £450
Brokers, Messrs. Mullens, Marshall & Co. £1,500

NATIONAL GALLERY, Trafalgar Square, S.W.

The National Gallery is the result of a Parliamentary grant of £57,000 in 1824 for the purchase of the Angerstein

collection of pictures, the present building being opened in 1838 and enlarged in 1865, 1876 and 1887.
Director, Sir Charles Holroyd £1,000
Keeper and Secretary, Hawes Turner £750

NATIONAL GALLERY, BRITISH ART (The Tate Gallery), Millbank, S.W.

The National Gallery of British Art, better known as "The Tate Gallery," was opened in 1897 on the site of Millbank Gaol, the cost of erection (£80,000) being borne by Sir Henry Tate, who also contributed the nucleus of the present collection.
Director, Sir Charles Holroyd ..... *(see above)*
Keeper, D. S. MacColl ..... £350 to £500

NATIONAL PHYSICAL LABORATORY, Bushy House, Teddington.

The National Physical Laboratory, founded in 1899 for standardising and verifying instruments, for testing materials and for the determination of physical constants, is controlled by a Board representing the Royal Society and the great Technical Societies. In addition to capital sums, an annual grant of £7,000 is contributed by H. M. Treasury; and subscriptions from the Technical Societies and other sources amount to about £1,850 a year. The Kew Observatory now constitutes one department of the Laboratory; there are also departments for Physics, Engineering, and Metallurgy. The Physics Department comprises Thermometric, Electrical, Metrological, and Optical Divisions.
Chairman, The President of the Royal Society.
Do. of Executive Committee, Lord Rayleigh, O.M., F.R.S.
Director, R. T. Glazebrook, D.SC., F.R.S.
Supt. Observatory Dept., Richmond, Charles Chree, LL.D., F.R.S.
Chief Assist. Observatory Dept., T. W. Baker.
Supt. Engineering Dept., T. E. Stanton, D.SC.
Supt. Metallurgical Dept., W. Rosenhain, B.A.
Senior Asst., Physics Dept., J. A. Harker, D.SC.

NATIONAL PORTRAIT GALLERY, St. Martin's Place, Charing Cross, W.C.

The National Portrait Gallery was opened in 1896, having previously been housed in Great George Street, Westminster, in South Kensington, and in Bethnal Green. The first grant to the institution was made in 1857.
Director, Keeper, and Secretary, Lionel Henry Cust, M.V.O., F.S.A. £600

NAUTICAL ALMANAC OFFICE, 3 Verulam Buildings, Gray's Inn, W.C.

The "Nautical Almanac" was first published in 1767, by H.M. Admiralty, under whose control the office now remains. The administrative expenses were estimated at £3,36a in 1908-9.
Superintendent, A. M. W. Downing, D.SC., F.R.S. ... £700
Chief Assistant, P. L. Davis, F.R.A.S. ..... £400 to £500
Assistants, J. H. Bell, F.R.A.S.; W. H. Walmsley, B.SC., F.R.A.S.; B. F. Bawtree; J. A. Sprigge; W. F. Doak, M.A., F.R.A.S.; T. C. Hudson, B.A., F.R.A.S. ..... £200 to £400

OBSERVATORIES.

Royal Observatory, Greenwich.

The Royal Observatory was founded by Charles II. in 1675, the building, designed by Moore and Wren, being opened in 1676. The pursuit of Astronomy would seem to be conducive to longevity, the average tenure of office by the eight Astronomers Royal since 1675 being nearly thirty years. The administrative expenses of the Observatory were estimated at £10,697 in 1908-9.
Astronomer Royal, Sir William Henry Mahoney Christie, K.C.B., D.SC., F.R.S., F.R.A.S. £1,000
Chief Assistants, P. H. Cowell, M.A., F.R.S., F.R.A.S.; A. S. Eddington, M.SC., F.R.A.S. ..... £500 to £600
Assistants, Edward W. Maunder, F.R.A.S.; Thomas Lewis, SEC.R.A.S.; H. F. Collins, B.A., F.R.A.S.; H. P. Hollis, B.A., F.R.A.S.; Andrew C. D. Crommelin, B.A., F.R.A.S.; W. W. Bryant, B.A., F.R.A.S. *(Magnetic and Meteorological)* ..... £320 to £450
Clerical Assistant, H. Outhwaite ..... £250 to £350

Royal Observatory, Cape of Good Hope.—£9,067.

Astronomer, S. S. Hough, M.A., F.R.S. ... £900 to £1,000
Chief Assist., J. Halm, PH.D., F.R.A.S. ..... £700 to £800
Assistants, W. H. Cox; J. Lunt, B.SC.; R. T. Pett; J. Power ..... £350 to £500
Clerical Assistant, Arnold Pilling ..... £350 to £450

PATENT OFFICE (Hours 10 to 5),

25 Southampton Buildings, W.C.

The prerogative of the Crown to grant monopolies was limited by 21 James I. c. 3 to the grant of Letters Patent for New Inventions, and the control of such grants was transferred to the Board of Trade by 46 & 47 Vict. c. 57. The duties are performed by a Comptroller-General with a staff of officials. The administrative expenses were estimated at £122,663 in 1908-9.
Comptroller-General (vacant) £1,800
Registrar of Designs and Trade Marks, R. Griffin £1,200
Chief Examiner, H. Hatfield, I.S.O. £1,200
Chief Clerk, P. G. L. Webb £900
Supervising Examiners, A. Cliff; W. Martin; A. E. Wright; W. H. D. Clark ..... £700 to £800
Principals, F. W. Hodges; R. P. Chope; A. Neeves ..... £650 to £750
Librarian, E. W. Hulme £650
Examiners, H. J. Adams; F. Ogden; P. H. Cathcart; W. Groves; J. E. Needham; A. S. A. Ormsby; F. M. Sexton; J. Gray; A. Sutton; A. F. Ravenshear; F. Gossling; G. Rutherford; H. F. Lowe; H. O. Mirv; T. E. Lones; H. Newton; W. A. Stiven; R. Jenkins; L. Bolton; A. Whitwell; J. H. Tomlinson; R. Sandon; A. W. Marfleet; W. Martin; C. H. Powell; T. H. Muras; J. Reeves; J. Layzell; F. J. Cheshire *(temp.)* ..... £550 to £700
Deputy Examiners, G. Gibbens; C. C. Starling; D. Mescal; I. T. Walls; A. E. Chipperfield; W. Sackfield; T. H. Denning; A. G. Page; R. Adams; W. S. Jarratt; H. C. Haycraft; G. F. Hambly; R. W. Simmonds; F. Fisher; F. W. Dunn; W. A. Taylor; E. A. Gore; S. A. Willmott; T. T. Bedford; A. Nicholls; R. J. Sowter; A. McDougall; F. Charlesworth; A. S. Cox; D. Robinson; R. G. French; J. W. Barker; F. H. Johns; M. F. Levey; G. J. Wilson; D. Walton; A. Wilson; F. G. Smith ..... £400 to £550
Acting Deputy Examiner, V. Gough £400
Assistant Examiners, F. Ackroyd; J. J. Lee; H. J. Wickham; V. G. Alexander; B. Moss; H. W. Heath; J. A. Parker; A. E. Dodridge; L. Pheasey; C. J. Stewart; R. C. Wale; F. G. Woodford; A. G. Bell; F. Keeper of Cotton Marks (Manchester Branch), J. W. Madders £555

Assistant Keeper of Cotton Marks (Manchester Branch), W. H. Quinn £320

2nd Div. Clerks, Higher Grade, H. E. D. Jones; J. H. H. Peake; H. Lennane; H. Clements; W. H. Davies; W. H. Crossley; J. J. Kaye; F. Usher; S. Sasserath; W. S. Snell; A. Holmes; A.H. Bennett; G. H. Norris; H. J. E. Easton; W. Crittenden .....£250 to £350

PAYMASTER-GENERAL'S DEPARTMENT, Whitehall, S.W.

The duties of the Paymaster-General, whose office dates from the Restoration and was consolidated with several other offices in 1835 and 1848, are to make the payments required by the several departments of the Government out of sums placed to his account for that purpose by order of the Lords of the Treasury, and authorised by the Comptroller and Auditor-General. The administrative expenses of the office were estimated at £17,185 in 1908-9.

Paymaster-General, Rt. Hon. R. K. Causton, M.P. *unp.*

Assist. Paym.-Gen., Charles J. Maude.....£1,200

Principal Clerks, J. Whitfield-Jackson, I.S.O.; H. Tomlinson .....£700 to £800

1st Class Clerks, J. C. Aubourg; J. L. F. H. Godfrey; H. E. Ward; A. P. Badcock; R. E. Brine; H. Kearns; H. W. Warburton; A. Willcock .....£400 to £600

POST OFFICE.

Chief Office, St. Martin s-le-Grand, E.C.

A House of Commons report in 1844 states: "It is uncertain at what precise period the Crown undertook to be the regular carrier of letters for its subjects." The first "Master of the Posts" was appointed in 1516, but the duty was not then undertaken as a remunerative department of Government. The Post Office is now one of the three great revenue-collecting departments, and, while efficiently discharging its multifarious duties, shows an annual profit of about £4,000,000, and also collects a large sum for the Inland Revenue Department. The Penny Post was inaugurated in 1840, the Book Post in 1845, the Post Office Savings Bank in 1861, the Post Office Telegraphs in 1868, the Money Order Office in 1792, Postal Orders in 1881, the Parcel Post in 1883, and the Telephone Service in 1892. The administrative expenses of the Post Office were estimated at £18,321,531 in 1908-9, viz.: Postal Services, £12,227,070; Packet Services, £733,069; Telegraph Services, £3,831,992; and Telephone Services, £1,529,400.

Postmaster-General, Rt. Hon. Sydney Buxton, M.P. £2,500

Minister assisting the Postmaster-General, Rt. Hon. the Earl of Granard .....*unp.*

Private Secs., Hon. Richard D. Denman, £250; W. Price, C.M.G., £150; Hon. A. Lyulph Stanley...*unp.*

Secretary to the Post Office, Sir H. Babington Smith, K.C.B., C.S.I. .....£1,750 to £2,000

Private Sec., E. A. Francis £120

Second Secs., A. F. King, C.B. .....£1,250 to £1,400

Assist. Secs., E. Crabb; H. S. Carey; E. W. Farnall; G. A. Oakeshott; A. M. J. Ogilvie; and A. H. Norway .....£1,000 to £1,200

Secretary's Office.

Principal Clerks, L. A. Marshall; A.B. Walkley; W. G. C. Kirkwood; A. G. Ferard; B. Hoskyns-Abrahall; R. J. Mackay; L. Richards; L. T. Horne; F. J. Beckley .....£700 to £900

Clerks (1st Class), G. S. Edwards; P. G. Burrell; A. G. Leonard; E. Udny; V. H. Stephens; P. Z. Round; F. J. Brown; H. F. McClintock; E. Raven; H. L. Kingsford; F. H. Williamson; J. Y. Bell; R. M. Stewart; *A. R. Kidner*; W. T. Leech .....£550 to £650

Clerks (2nd Class), C. Eden; G. McLaren; H.W. Cardew; W. Price, C.M.G.; E. A. Francis; F. G. Milne; W. E. Parsons; L. Simon; K. Kerr; H. D. Wakely; L. G. S. Reynolds; F. H. S. Grant; C. W. Kempe; J. W. Jay; L. A. Jones; A. H. Barry; D. J. Lidbury ..... £250 to £400

PRIVY COUNCIL OFFICE, Whitehall, S.W.

The origin of the Privy Council is somewhat obscure. At the present time it consists of certain eminent persons whose names are given on p. xxi. The Council is summoned as such to act "with others" upon the demise of the Crown, and many matters are referred by the Sovereign to Committees of the Council, some of which are standing Committees, and others constituted to deal with particular cases, *e.g.*, the Judicial Committee, the Board of Trade, *e.c.* The Lord President of the Council is the Fourth Great Officer of State, and as such is always a prominent member of the Cabinet.

Lord President of the Council, Viscount Wolverhampton, G.C.S.I. £2,000
Private Sec., H. J. Stanley £300
Clerk of the Council, Almeric W. FitzRoy, C.V.O. £1,500
Deputy do. & Chief Clerk, J. H. Harrison, M.V.O. £1,200
Senior Clerk, Chas. J. Dalrymple Hay ..... £600 to £800
Staff Clerk, H. E. Moon, I.S.O. ..... £300 to £400

PUBLIC WORKS LOAN BOARD,
Old Jewry, E.C.

The Public Works Loan Board was created in 1817 for the purpose of advancing money to Municipal Authorities for Public Works. The total amount thus borrowed in 1907-8 amounted to £2,116,000.

Chairman, Sir Herbert Barnard ..... *unp.*
Deputy Chairman, E. Norman ..... *unp.*

Secretary, R. Philpot, C.B. £1,500
Chief Clerk, B. Allen, I.S.O. ..... £600 to £800
Solicitor, Chas. Hy. Davis ..... £1,200 to £1,500
Chief Clerk to do., C. L. Nicholson ..... £400 to £700
Principal Clerk (in charge of accounts), F. W. B. Godrich ..... £500 to £600

QUEEN ANNE'S BOUNTY, 3 Dean's Yard, S.W.

Incorporated in 1704, when Queen Anne, with the consent of Parliament, transferred to the Governors the annual income of the "first fruits" and "tenths" derived from the sees, dignities, and benefices, with a view to the augmentation of insufficiently endowed livings. These charges were originally levied on all clerical incomes and paid to the Pope, but were made part of the Crown revenue by Henry VIII. More than half of the benefices in England and Wales are free from these charges, having either been exempted from them by statute or formed since the charges were imposed. "First fruits" represent one year's income of a benefice in the time of Henry VIII.; the "tenths" an annual sum of a tenth part of that income. The income from this source amounts to about £15,000 per year, which, with the surplus income from capital held by the Governors, is distributed in grants to meet benefactions awarded to benefices not exceeding £200 in net annual value. The total amount distributed in 1907 was about £25,780. The Governors act as trustees for endowments and many descriptions of Church funds. They are also empowered to lend money upon mortgage of benefices for improvements to parsonage houses and farm buildings, in certain cases for rebuilding chancels, and for dilapidations.

Secretary & Treasurer, William R. Le Fanu.
Chief Clerk, Wm. Lipscomb.
Senior Clerks, George Simpson; Henry Groves; John F. Sapsford; V. Gonville Bromhead; R. G. Rowland.
Junior Clerks (*Upper Division*), E. Jump; M. Rogers; W. Russell; D. Smeaton; W. Holford; W. J. P. Smith; A. G. Spencer; S. D. Knight.
Solicitor, F. G. Hughes
Asst. Solicitor, W. G. Hannah.
Architect, William Alfred Hughes.
Auditor, H. C. Garlant, 33 Nicholas Lane, E.C.
Counsel, J. Bradley Dyne, 4 Stone Buildings, W.C.

RECORD OFFICE, THE PUBLIC, Chancery Lane, W.C.

The Public Record Office as it now stands was completed in 1900 for the safe custody of the Public Records, which were first ordered to be kept by Henry I. at the beginning of the twelfth century. The administrative expenses were estimated at £54,820 in 1908-9. (For hours see p. 400.)

Chief Examiner of Engineers, A. Boyle ..... £520 to £600
Principal Officer for London District, J. B. Park £650

TREASURY, Whitehall, S.W.

The Lord High Treasurer of England is the Third Great Officer of State, the office having been "in commission" (with certain intervals) since 1612. The Commissioners for executing the office of Treasurer of the Exchequer of Great Britain and Lord High Treasurer of Ireland consist of the First Lord, who, if a Commoner, is, *ex officio*, Leader of the House of Commons, the Chancellor of the Exchequer, and some Junior Lords, with certain Secretaries and a staff of officials. The duties of the First Lord are mainly political and are those of the Patronage Secretary and the Junior Lords; the duties of the Chancellor of the Exchequer are mainly financial, in that he performs the ancient duties of the Under-Treasurer and, after agreement with the heads of the great spending departments, arranges for the great collecting departments to provide sufficient moneys to meet the needs of the year. The papers are laid before Parliament in the form of a Budget, which the Chancellor expounds to the House, these plans being accepted, modified, or rejected by the House.

FIRST LORD OF THE TREASURY—
The Rt. Hon. Herbert Henry Asquith, K.C., M.P. (*Prime Minister*) £5,000
Private Secs. to Prime Minister, V. Nash, £500; R. S. Meiklejohn, £300; M. Sturgis, £200; and Hon. E. S. Montagu, M.P. ..... *unp.*

CHANCELLOR OF THE EXCHEQUER—
Rt. Hon. David Lloyd George, M.P. £5,000
Private Secs., W. H. Clark, C.M.G., £300; John Rowland, £250; M. H. Sands, £200; and H. D. Maclaren, M.P. ..... *unp.*

JUNIOR LORDS—
John Herbert Lewis, M.P. £1,000
Capt. Cecil William Norton, M.P. £1,000
John Henry Whitley, M.P. £1,000

JOINT SECRETARIES—
Financial, C. E. H. Hobhouse, M.P. £2,000
Private Sec., N. E. Behrens £150

and Div. Clerk, Upper Grade, W. A. Walker £350

Fines and Penalties, 30 Abingdon Street, S.W.
Receiver, Thomas Edward Kebbel, M.A.

TRINITY HOUSE, Tower Hill, E.C.

Trinity House, the first General Lighthouse and Pilotage authority in the Kingdom, was a body of importance when Henry VIII. granted the Institution its first charter in 1514, *inter alia* "for the relief, increase and augmentation of the Shipping of this Realm of England." Since that period the duty of erecting and maintaining lighthouses and other marks and signs of the sea has by Royal Charter and Acts of Parliament been entrusted to this Corporation. Until 1854 all light dues were collected by Trinity House, and until 1874 Masters of the Navy were examined by the Elder Brethren. The present duties of the Elder Brethren have reference to Pilotage, Lighthouses, Buoys, Beacons, &c., and attendance at the Admiralty Court to act as assessors, also to advise the Board of Trade in nautical matters. There are 13 Acting Elder Brethren, of whom 2 are elected from the Royal Navy and 11 from the Merchant Service; there are also 11 Honorary Elder Brethren. The income of the Corporation derived from light dues levied on shipping entering and leaving British ports amounts to £300,000 per annum, which is expended in the maintenance of the Lighthouse and coast-marking system of England and Wales, under the financial control of the Board of Trade. The Corporation also administers certain charitable trusts specifically dedicated to the relief of decayed master mariners and their widows, the accounts in respect of which are rendered to the Charity Commissioners.

Master, Admiral H.R.H. the Prince of Wales, K.G.
Deputy Master, Capt. Sir G. R. Vyvyan, K.C.M.G., R.N.R.
Secretary, Arthur Owen.
Principals, H. G. Willett; H. A. Mercer.

Engineer-in-Chief, Thomas Matthews, M.Inst.C.E.
Principal Pilotage Clerk, A. T. H. Scott.
Principal Clerk of Estates, &c., H. S. Liesching.

TRUSTEE SAVINGS BANKS,

Inspection Committee, 9 Serle Street, W.C.

Trustee Savings Banks were first made the subject of legislation in 1816, and an Inspection Committee was appointed in 1891. The funds deposited with the Government amounted in 1907 to £54,962,487 (cash and stock) held on behalf of 1,780,214 depositors—an increase during the year of 20,985 depositors.

Chairman, Sir Albert K. Rollit, D.C.L.
Vice-Chairman, Thomas A. Welton, F.C.A.
Secretary, W. S. Cameron.

WALLACE COLLECTION,

Hertford House, Manchester Square, W.

The Wallace Collection was bequeathed to the nation by the widow of Sir Richard Wallace, Bt., K.C.B., M.P., in 1897, and Hertford House was subsequently acquired by the Government. The expenses were estimated at £7,783 in 1908-9.

Keeper & Secretary, Claude Phillips £600
Inspector of Armouries, Guy F. Laking, M.V.O. ..... *hon.*
Clerk, S. J. Camp ..... £150 to £250

WAR OFFICE, Whitehall, S.W.

A Secretary of State for War was first appointed in 1794, the control of the Land Forces of the Crown having been previously exercised by a Secretary at War, who was responsible to Parliament through the Home Secretary. In 1801 the Secretary of State for War was also given the business of the Colonies, of which he was relieved in 1854 by the appointment of a Secretary of State for that purpose. In 1904 an Army Council was created by Letters Patent, and to this Council were thereby transferred all the powers exercised under the Royal prerogative by the Secretary of State for War and the Commander-in-Chief. An Order in Council of the same year fixed the distribution of duties among the members of the Army Council.

Army Council.

Secretary of State for War, Rt. Hon. Richard Burdon Haldane, K.C., LL.D., M.P. £5,000

MEMBERS OF CONVOCATION.

In theory the Church of England is governed by means of its Convocations of Bishops and Clergy: there is a House of Convocation for each province, Canterbury and York. Each Convocation consists of two Houses, the upper confined to the Archbishops and bishops, the lower composed of the dean of every cathedral, the archdeacons, with proctors elected from every cathedral chapter, and two more elected by the clergy of every diocese in the province of Canterbury, and by every archdeaconry in the province of York. A fresh election is made with every new Parliament.

PROVINCE OF CANTERBURY.

Upper House.

President.—The Most Rev. the Lord Archbishop.
The Right Rev. the Lords Bishops of London; Winchester; Bangor; Bath and Wells; Birmingham; Chichester; Ely; Exeter; Gloucester; Bristol; Hereford; Lichfield; Lincoln; Llandaff; Norwich; Oxford; Peterborough; Rochester; Salisbury; Southwark; Southwell; St. Albans; St. Asaph; St. Davids; Truro; Worcester.
Registrar, Harry Wilmot Lee, 3 Creed Lane, Ludgate Hill, E.C.

Lower House.

Prolocutor, The Very Rev. the Dean of Windsor.

THE HOUSES OF LAYMEN.

The House of Laymen for the Province of Canterbury, as also for that of York, consists of members elected by the various Diocesan Conferences, who are themselves elected by the Laity of their respective Parishes or Rural Deaneries. The members are elected with every fresh Parliament.

St. Patrick's National Cathedral, Dublin.

Dean and Ordinary, Very Rev. John Henry Bernard, D.D., D.C.L.

GENERAL SYNOD.

Consisting of House of Bishops (13) and House of Representatives (viz., 208 clerical and 416 lay).

Honorary Secretaries, Ven. Wm. Colquhoun, B.D.; Ven. I. K. Latham, D.D.; Sir J. C. Meredith, LL.D.; Capt. R. Wade Thompson.

Secretary to the Representative Church Body (Incorporated 1870), Thomas Greene, M.A., 52 St. Stephen's Green E., Dublin.

By the Act of Union, 1800, the Church of Ireland was united with the Church of England, and the Sovereign, as one of its members, supreme Governor on earth. By the Act of 1869 this union was severed, and on Jan. 1, 1871, the Church of Ireland resumed her independent position. The Act of 1869 not only disestablished the Irish Church, but also took away her endowments, nothing being left but the right to the life services of the Annuitant Bishops and Clergy (which were commuted for a capital sum), the right to claim churches in use for divine service, the right to buy the See and Glebe Houses (with garden and curtilage), and £500,000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the General Synod, which meets annually.

Subject to the General Synod are 23 *Diocesan Synods*, which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese is chosen by the clerical and lay members of the *Diocesan Synod*. The Primate is chosen by the House of Bishops from amongst their own number.

The incumbent of the Parish is appointed by a *Board of Nomination*, consisting of 7 persons, viz.:—The Bishop, 3 diocesan nominators (2 clerical and 1 lay) appointed by the Diocesan Synod, and 3 parochial nominators (lay) appointed by the registered vestrymen of the parish.

The financial trustees of the Church are the Representative Body, composed of the Archbishops and Bishops, 13 clergymen and 26 laymen, chosen by the Diocesan Representatives in the General Synod, with 13 co-opted members (clerical or lay). This body holds the property of the Church, and administers its funds, subject to the General Synod.

The first property it held was the capital sum £7,581,075, representing the life annuities of the Bishops and Clergy paid over as commutation money by the Church Commissioners, and also £500,000 compensation for private endowments. The commutation capital now amounts only to £556,324, charged with annuities to 126 annuitants. The funds, however, in the custody of the Representative Body amount in all to £8,878,274, made up of *Commutation* £556,324, *Parochial Sustentation* £5,484,004, *Episcopal Sustentation* £562,944, *Glebes purchase* £351,036, *Miscellaneous purposes* £1,867,750, and *Balances* £55,213.

Since 1869, members of the Church have paid in to the Representative Body a total sum of £6,715,557. The interest of the Parochial Sustentation Fund is approximately £205,650. The total amount of *assessment* for stipend paid by parishes, 1907, was £100,616, and the total amount paid for *stipends* under Diocesan Schemes was £269,946.

The number of members of the Church of Ireland, by the Census of 1901, was 581,089, or 13·0 per cent. of the entire population.

The Church of Scotland.

THE CHURCH OF SCOTLAND by law established is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries, and also from the universities and royal burghs. It is presided over by a Moderator (chosen annually by the Assembly), to whom the King has granted precedence in Scotland, during his term of office, next after the Lord Chancellor of Great Britain. The Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives the sum of £2,000 for his services. The country, for Church purposes, is divided into 16 synods and 84 presbyteries, and there are over 1,800 ministers and licentiates engaged in ministerial work. The Church population exceeds the aggregate of all the other Presbyterian bodies, and is estimated at about half the whole population of Scotland; th number of communicants in 1907 was 702,075 The sum of £520,997 was raised in 1907 for churcl and missionary purposes. Within the last 50 year 451 chapels, at a cost of £1,673,330, have bee endowed and erected into parishes *quoad sacra* The original parishes were 924, in addition t which there are 451 new and 42 Parliamentary parishes, a total of 1,417; besides a large num ber of churches and mission stations. The Presbyterian form of Church government a first set up in Scotland was superseded in 166 by the Episcopal Church under the Stuarts but at the Revolution in 1688, Presbyterianism regained the legal establishment, which it still preserves. LORD HIGH COMMISSIONER, Lord Kinnaird.

MODERATOR, 1908, Right Rev. Theodore Marshall, D.D. *Agent*, A. L. Menzies, W.S., 54, Castle St., Edinburgh.

OTHER PRESBYTERIAN CHURCHES.

PRESBYTERIANISM HAS SEVERAL SUBDIVISIONS.

(1) *The United Free Church of Scotland* was formed by the Union on October 31st, 1900, of the *Free Church of Scotland* and the *United Presbyterian Church*. The United Church, by rearrangement of the Synods and Presbyteries, has 12 Synods and 64 Presbyteries. The Supreme Court is the General Assembly, which meets every year at the same time as that of the Established Church. In the year ending 31 Dec., 1907, there were 1,631 congregations and 28 preaching stations. The total membership exceeded 506,000, and there were 2,369 Sunday Schools, with 241,160 scholars and 25,385 teachers. In 15 Foreign Mission Fields there are 331 European Mission Agents and 4,063 native pastors, evangelists, and teachers, including in both cases those of the Women's Foreign Mission. The income of the Church at the close of last financial year amounted to £1,044,093 13s. 2d. *Offices*, 1 Castle Terrace, Edinburgh.

(2) *The Presbyterian Church in Ireland.* — According to the Census of 1901, the members of the various Presbyterian churches in Ireland were 443,494. The largest of these, under the superintendence of the General Assembly, consists of 36 presbyteries, 657 ministers, 568 congregations, with 105,982 communicants, 84,698 families, 8,240 Sabbath-school teachers, and 94,735 scholars. During the year 1907-1908 this branch contributed by congregational effort £205,078 for religious, charitable, and missionary purposes. The total income for the year for all purposes was £265,662. It possesses two Colleges, with power to confer Theological Degrees, comprising a staff of 14 professors, and has 31 ministerial with 6 medical missionaries in foreign parts. *Clerk*, Rev. W. J. Lowe, D.D., Londonderry.

(3) *The Presbyterian Church of England* has 12 presbyteries, 345 congregations, 15 preaching stations, and 85,755 members. It has a Theological College (Westminster College, Cambridge), and supports 78 missionaries abroad, including 32 women. In 1906 the amount raised for all purposes was £204,774. *General Secretary*, Rev. W. M. Macphail, M.A. *Financial Sec.*, John Leggat, 7 E. India Avenue, E.C. *Publications Office*, 21 Warwick Lane, Paternoster Row, E.C.

(4) The less numerous divisions are: The *Free Church of Scotland*, consisting of those members who did not unite with the U.P. Church; the Reformed Presbyterian Synod, the Eastern Reformed Synod, the United Original Seceders, the Secession Presbytery in Ireland, and the Synod of the Church of Scotland in England.

The Methodist Churches.

UNDER the general designation of METHODISTS are included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revds. John and Charles Wesley. The most numerous and influential of them are—

Wesleyan Methodists, the original body founded in 1739 by these two brothers. The first *Conference*, consisting of six clergymen and four laymen, was held in 1744. The conference is now composed in its Representative Session of 300 ministers and 300 laymen, with a ministerial president and secretary at its head, elected year by year. The Wesleyans are governed primarily by the Conference, secondarily by the Synods, which are semi-annual meetings of the ministers and selected laymen in each district, over which a chairman is appointed by the Conference, and by quarterly meetings of the ministers and lay officers of each circuit. The authority of both these last meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism. When Wesley died the number of members was 76,968, and since then the increase has been so great that about 18,000,000 people are now receiving Methodist instruction in various parts of the world. At Washington, in October, 1891, it was reported that there were more than 30,000,000 Methodists. This statement has been recently repeated by leading Wesleyans; but no evidence is forthcoming to establish its accuracy, which is more than doubtful. *Pres.*, Rev. J. Scott Lidgett, M.A.; *Sec.*, Rev. J. Hornabrook.

Various distinct bodies of Methodists have been formed, the most important being—

1 *The Primitive Methodists*, who sprang up in Staffordshire, in 1810, under the leadership of Hugh Bourne and William Clowes. Owing to the excesses attending certain outdoor services called "camp meetings" the Wesleyan Conference prohibited the continuance of the practice. Bourne and Clowes refused to comply with this decision, and were in consequence expelled. They and their sympathisers banded together in a new body, with enlarged powers for the laity. Next to the Wesleyans they are the most numerous of

ll the denominations which have arisen out of he Methodist movement. — *President*, Rev. . Pickett.

2. *The Methodist New Connexion*, which was ormed in 1797 by the Rev. Alexander Kilham, one of the early itinerating Wesleyan preachers. He demanded that the members of the societies, and not the Conference, should be constituted the source of all power in Methodism ; and that the Conference should consist of lay as well as ministerial members, all of whom should be elected by the members of the various societies as their delegates. He was expelled by the Conference and at once founded a new community.

3. *The Bible Christians*, founded in 1815 by William O'Bryan, a Wesleyan lay preacher in Cornwall. They exist principally in the West of England.

4. *The United Methodist Free Churches*, which are an amalgamation of three different secessions —the Protestant Methodist, formed in 1828 ; the Wesleyan-Methodist Association, which sprang out of a controversy in 1834, concerning the training of ministers ; and the Wesleyan Reform Association, founded in 1849, during a great agitation. A strong opposition to leading Wesleyan officials was organised, which found expression in the Conference debates, but more strongly in anonymous pamphlets, on suspicion of being the authors and circulators of which three ministers were expelled. They found so many sympathisers that over 100,000 members seceded to found a new denomination.

United Methodist Church.—The three latter denominations—the Methodist New Connexion, the Bible Christians, and the United Methodist Free Churches—secured an Act of Parliament in 1907 to authorise their union into one denomination, to be called the United Methodist Church, and to provide for the government of the Church by a Conference consisting of an equal number of ministers and laymen, elected by districts. The act of union took place in London on September 17, 1907, when the first united Conference was held. About 700 delegates were present. A deed was adopted and signed, declaring the terms of union, defining the constitution and doctrinal tenets, and containing provisions for government and discipline. A fund of 100,000 guineas has been raised to commemorate the union.—*President*, Rev. W. J. Townsend, D.D. ; *Secretary*, Rev. J. Packer.

Finances.—The *Wesleyans* raised in 1907–1908 £200,671 to sustain their very extensive missionary operations. At the same time their Home missionary income was £39,404 ; and £13,716 was expended for the training of candidates for the ministry, of whom there are 253 in the four theological colleges. The *Primitive Methodists* raised £56,076 for new chapels, and the *United Methodist Church* £16,642 for their missions.

The number of Members is for the United Kingdom ; of Chapel and Scholars, Great Britain only.	Ministers	Lay Preachrs	Members	On Probation.	Chapels.	Sunday Scholars

Wesleyan Reformers	21	527	8,077	412	196	22,312

Other Religious Denominations.

The INDEPENDENTS, or CONGREGATIONALISTS, in England come next to the Methodists ; they are the most ancient community of Dissenters. They maintain that each church is its own ruler, and thus dispense with both episcopacy and presbyteries. They first appeared in the time of Elizabeth, under whom they were very harshly treated ; in consequence great numbers repaired to North America ; but their principles triumphed under the Commonwealth. In 1831 the majority of their churches were formed into the Congregational Union of England and Wales, incorporated in 1902. There are 51 county and other Associations in England and Wales, with 4,661 churches and preaching stations containing 1,694,879 sittings ; the number of ministers in the British Isles is 3,197. Of these 238 are temporarily without pastoral charge, 79 are engaged in collegiate and tutorial duties, 44 are occupied in secretarial work, and 378 by reason of age or ill-health have retired from pastoral duty. *Chairman of the Congregational Union of England and Wales*, 1908–9, Rev. R. W. Thompson, D.D. *Secretary*, Rev. Richard J. Wells. *Office*, Memorial Hall, Farringdon Street.

The *Countess of Huntingdon's Connexion*, with 44 chapels and mission stations, is governed by nine trustees assisted by an annual conference of ministers and delegates. *Sec.*, E. Dolby Shelton. *Offices*, 38 Eldon Street House, London, E.C.

The BAPTISTS are, in all respects but one, similar to the Independents ; they have the same form of Church government, and differ but in one point of practice—viz., the Baptism by immersion of believers only. Like the Congregationalists, they are for the most part grouped in Associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1813. In the British Isles there were, in 1907, 4,069 chapels and 2,133 pastors. The members numbered 429,877, Sunday-school teachers 58,802, and Sunday scholars 587,160. In the U.S. they form one of the most numerous religious bodies, the "members" alone numbering over 6,000,000. Their missionaries are employed in India, Ceylon, China, Palestine, the West Indies, Africa, Brittany, and Italy. *Office*, Baptist Church House, Southampton Row, London W.C.

The WELSH CALVINISTIC METHODIST CONNEXION is the only Church of purely Welsh origin, and embraces a very large section of the Welsh-speaking population. The form of Church government is presbyterian, and the Church is in federation with the United Free Church of Scotland and with the Presbyterian Church of England, *q.v.* At the present time the body numbers—churches, 1,442 ; chapels and places of worship, 1,661 ; ministers and preachers, 1,293 ; deacons, 6,281 ; communicants, 185,935 ; on probation, 2,152 ; Sunday-school teachers, 28,451 ; scholars and teachers, 219,639 ; number belonging to the congregations (including communicants), 342,804. A sum amounting to £301,762 was col-

lected for various religious purposes in 1907. One of the features of the Welsh churches is the Sunday-school, which is attended by adults as well as children; the vernacular is the language generally used in these schools There are 301 English congregations with 27,557 communicants; all the rest are Welsh. *Moderator of General Assembly*, 1908-1909, Rev. William Evans, M.A. *Sec.*, Rev. R. J. Rees, M.A., Aberystwyth. *Statistical Secs.*, Rev. J. Evans, Denbigh; and Rev. T. J. Morgan, Garn, near Aberystwith.

The SALVATION ARMY is one of the most recent religious denominations, and one of the most successful. In Sept., 1908, the number of *Officers, Cadets* and *Employés* was 21,186, of *Corps* and *Outposts* 8,224. *Local Officers* 52,789. The number of countries occupied was 53, and of languages used 28. Connected with the Salvation Army are numerous philanthropic institutions, including 118 Rescue Homes for Fallen Women, 139 Slum Posts, 17 Prison-Gate Homes, 207 Shelters and Cheap Food Depôts for the Homeless, 130 Workshops and Factories, 60 Labour Bureaux, 18 Farms, &c. GENERAL, William Booth.

MINOR RELIGIOUS DENOMINATIONS.—The chief are the Unitarians, with about 350 ministers, 345 chapels, and other places of worship. The Society of Friends, which consists of 18,860 members in Great Britain and Australasia, and 2,471 in Ireland, has 420 recorded ministers, including over 150 women; their places of worship, in 1907, numbered 420. The Friends support their own poor. *Central Office for Great Britain*, 12 Bishopsgate St. Without, E.C. Ireland has a separate organization, with *Office*, 6 Eustace Street, Dublin. The Churches of Christ have 14,277 members and 186 churches in the British Isles, with 159 Sunday Schools, 1,719 teachers and 16,811 scholars. The Moravians (*Offices*, 32 Fetter Lane, E.C.) have about 60 congregations and preaching stations. The Catholic Apostolic Church have above 80 churches; the New Church (Swedenborgians), 75 societies, with 1,714 registered members; the Latter-Day Saints (Mormons) have 82 churches. Among the inhabitants of the United Kingdom are about 220,000 Jews, mainly in London and other large towns, who possess 200 synagogues, with about 200 ministers and readers (*Chief Rabbi*, Dr. Hermann Adler, Chief Rabbi's Office, Finsbury Square, E.C.). The Jews support their own poor, and raise about £150,000 annually for religious and benevolent purposes. Their number throughout the world is computed at eleven millions. The Brethren, or Plymouth Brethren, have 23 places of worship in London and the suburbs. The Greeks have churches in London, Manchester, and Liverpool. The Armenians have churches in London and Manchester; the French, Dutch, Swedes, and Swiss in London, Norwich, and Canterbury; and a mosque has been opened for Moslems.

The Roman Catholic Church.

IN *England*, from 1623 to 1850, Catholics were under Bishops, as Vicars-Apostolic, with first 1, then 4, and afterwards 8 Districts or Vicariates; in 1850 the Hierarchy was restored, by the erection of 1 Archiepiscopal and 12 (now increased to 15) Episcopal Sees. In *Scotland* Catholics were under Bishops, as Vicars-Apostolic, from 1694 to 1878, with first 1, then 2, and afterwards 3 Districts or Vicariates; in 1878 the Hierarchy was restored, by the erection of 2 Archiepiscopal and 4 Episcopal Sees. In *Ireland* the Hierarchy consists of 4 Archiepiscopal and 23 Episcopal Sees.—Besides the United Kingdom, Hierarchies are established in British America, India, and Australasia. There are now in the British Empire 30 Archiepiscopal and 108 Episcopal Sees, and 34 Vicariates and 12 Prefectures Apostolic. Including 2 Delegates Apostolic, 6 Coadjutors and 8 Bishops Auxiliary, the Archbishops and Bishops now holding office in the British Empire are 184, distributed as follows:—

ENGLAND AND WALES.

	Archbishop.	Cons.	Clergy.
Westminster	Francis Bourne (*translated from* Southwark 1903) ...	1895	516
	Patrick Fenton, Bishop Auxiliary...	1904	
	W. A. Johnson, Bp. Auxiliary	1906	
	Bishops.		
Birmingham	Edward Ilsley	1879	285
Clifton	George A. Burton ...	1902	136
Hexham and Newcastle	Thomas W. Wilkinson	1888	217
	Richard Collins, Asx.	1905	
Leeds	William Gordon	1890	160
	J. E. Cowgill, Coadj.	1905	
Liverpool ...	Thomas Whiteside ...	1894	442
Middlesbrough	Richard Lacy.....	1879	105
Newport	John C. Hedley	1873	88
Northampton	Fredk. Wm. Keating	1908	86
Nottingham .	Robert Brindle, D.S.O.	1889	127
Plymouth ...	Charles Graham	1891	129
Portsmouth .	John Baptist Cahill...	1900	250
	Wm. T. Cotter, Asx.	1905	
Salford	Louis Chas. Casartelli	1903	319
Shrewsbury ..	Hugh Singleton	1908	88
Southwark ...	Peter E. Amigo	1904	507
Wales, Menevia,	Francis Mostyn	1895	79

SCOTLAND.—*Archbishops.*

St. Andrews & Edinburgh	James A. Smith (*trans. from* Dunkeld 1900)	1890	86

THE UNIVERSITY OF LONDON, South Kensington, S.W. 1836 and 1900.

THE University was reconstituted in 1900, and as now an "Academic" Department for the organisation and control of higher education in its various constituent "Schools" and other institutions throughout London, as well as an "External" Department for the continuation of its old functions of examining and conferring degrees upon students throughout the country and in all parts of the Empire.

Number entered by matriculation or otherwise in 1907–8, 3,277. Internal students at present time, 3,648.

Visitor, H.M. the King in Council.
Chancellor, Rt. Hon. Earl of Rosebery, K.G., K.T., D.C.L., LL.D., F.R.S.
Vice-Chancellor, Sir William Job Collins, M.D., M.P.
Chairman of Convocation, Sir Edward Henry Busk, LL.B.
Principal, Henry Alexander Miers, D.Sc., F.R.S.
Registrars: (*Academic Council*) P. J. Hartog, B.Sc.; (*External Council*) A. Milnes, M.A.; (*University Extension*) R. D. Roberts, D.Sc.
Secretary to the Senate, P. M. Wallace, M.A.
Sec. to Finance Committee, W. K. Hill, B.A.
Clerk of Committees, C. F. Trenerry, D.Sc.
Asst. of Examinations, W. H. Sampson, B.A.
Goldsmiths' Librarian, R. A. Rye.
Clerk of Convocation, H. E. Allen, LL.B.
Esquire Bedell, G. H. B. Kenrick, LL.D.
Accountant, E. Brewer.

Representative in Parliament, Sir Philip Magnus, B.Sc.
Representative on General Medical Council, Philip Henry Pye-Smith, M.D., F.R.S.

THE SENATE.

The Chancellor, The Vice-Chancellor, The Chairman of Convocation. *By the Crown*, Sir Francis Mowatt, Hon. W. P. Reeves, Sir Henry Roscoe, Sir John Wolfe-Barry. *By Convocation* — (*Divinity*), Rev. J. A. Douglas; (*Arts*), R. C. B. Kerin, Prof. S. L. Loney, Dr. T. L. Mears, Lord Justice Fletcher Moulton, Sir Albert Rollit; (*Laws*), The Master of the Rolls (Sir Herbert Cozens-Hardy); (*Music*), C. B. Edgar; (*Medicine*), Prof. Sir Thomas Barlow, Dr. E. G. G. Little; (*Science*), Dr. C. W. Kimmins, Sir Philip Magnus, Sir Walter Palmer, Dr. J. Wade, Dr. R. M. Walmsley, Dr. S. R. Wells. *By Royal College of Physicians*, Dr. P. H. Pye-Smith, Dr. F. Taylor. *By Royal College of Surgeons*, H. H. Clutton, A. P. Gould. *Representing University College*, Dr. T. Gregory Foster, Lord Reay. *By King's College*, Dr. T. Buzzard, Rev. Dr. A. C. Headlam. *By Lincoln's Inn*, Lord Macnaghten. *By Inner Temple*, Arthur Cohen. *By Middle Temple*, Sir Marshall Warmington. *By Gray's Inn*, C. A. Russell. *By Law Society*, H. J. Johnson, R. Pennington. *By Corporation of London*, Ald. Sir Thomas B. Crosby. *By London County Council*, Sir Wm. Collins, Sidney Webb. *By City and Guilds of London Institute*, Sir Owen Roberts. *By the Faculties* — (*Theology*), Rev. Prof. W. H. Bennett; (*Arts*), Rev. Prof. A. Caldecott, Miss B. Edgell, Prof. C. A. Gardner, Prof. M. J. M. Hill; (*Laws*), Prof. J. Cutler; (*Music*), Prof. Sir Frederick Bridge; (*Medicine*), Dr. H. A. Caley, Dr. L. E. Hill, Prof. E. H. Starling; (*Science*), Prof. J. B. Farmer, J. L. S. Hatton, Prof. Sir Wm. Ramsay, Dr. A. D. Waller; (*Engineering*), Prof. D. S. Capper; (*Economics*), H. J. Mackinder.

ORGANISATION OF TEACHING.

The Teaching of the University is organised under three categories:—(1) That conducted by the University itself; (2) that conducted by the several "Schools of the University"; (3) that conducted at the other Institutions at which there are "Recognised Teachers of the University."

The University.

On January 1, 1907, University College, which was by the Statutes of 1900 made a "School of the University" in the Faculties of Arts, Laws, Medicine, Science, Engineering, and Economics, was transferred to the University, of which it now forms an integral part. Matriculated students working at the College in any of these Faculties are "Internal Students of the University." Other Institutions maintained directly by the University are the Physiological Laboratory in the University buildings at South Kensington, and Goldsmiths' College at New Cross.

UNIVERSITY COLLEGE, Gower Street, W.C. (1826).

Chairman, The Rt. Hon. Lord Reay, G.C.S.I., LL.D.
Treasurer, Sir Felix Schuster, Bart.
Provost, T. Gregory Foster, Ph.D.
Lady Superintendent of Women Students, Rosa Morison.
Chief Librarian, R. W. Chambers, M.A.
Secretary, Walter W. Seton, M.A.

GOLDSMITHS' COLLEGE, New Cross, S.E.

Warden, William Loring, M.A.
Principal of Day Training Dept., The Warden.
Vice-Principals, do., T. Raymont, M.A.; Miss Caroline Graveson, B.A.

PROFESSORS AND OTHER TEACHERS.

The Teaching Staff of the University is organised under two categories:—(1) "Appointed Teachers," *i.e.*, such as have been appointed by the University with the express designation of "Appointed Teachers"; (2) "Recognised Teachers," *i.e.*, such as have been appointed either by the University itself or by one of its "Schools" or by one of the other Institutions at which instruction is given under its auspices, and have been recognised by the Senate as conducting work of University standard.

DEANS OF THE FACULTIES, 1908–10.

Theology, Rev. Prof. Albert William Greenup, D.D.
Arts, Prof. Israel Gollancz, Lit.D.
Laws, William Nembhard Hibbert, LL.D.
Music, Charles William Pearce, Mus. Doc.
Medicine, Prof. Sidney Harris Cox Martin, M.D., F.R.S.
Science, Prof. John Millar Thomson, LL.D., F.R.S.
Engineering, Prof. William Ernest Dalby, M.A.
Economics, Arthur Lyon Bowley, M.A.

APPOINTED TEACHERS.

Professors.

Anatomy, G. D. Thane, LL.D
Applied Mathematics (*Goldsmid*), Karl Pearson, M.A., F.R.S.

Archæology (*Yates*), E. A. Gardner, M.A.
Architecture, F. M. Simpson, F.R.I.B.A.
Botany (*Quain*), F. W. Oliver, D.Sc., F.R.S.
Chemistry, General, Sir William Ramsay, K.C.B., LL.D., F.R.S.
Do., Organic, J. Norman Collie, LL.D., F.R.S.
Comparative Law (*Quain*), Sir John Macdonell, C.B., LL.D.
Comparative Philology, J. P. Postgate, Litt.D.
Education, John Adams, M.A.
Egyptology (*Edwards*), W. M. Flinders Petrie, D.C.L., F.R.S.
Electrical Engineering (*Pender*), J. A. Fleming, D.Sc., F.R.S.
Engineering, D. S. Capper, M.A.; W. E. Dalby, M.A.
English History, A. F. Pollard, M.A.
English Lang. and Lit. (*Quain*), W. P. Ker, LL.D.
French & Romance Philology (*Fielden*), L. M. Brandin, Ph.D.
Geology (*Yates-Goldsmid*), E. J. Garwood, M.A.
German, R. C. Priebsch, Ph.D.; J. G. Robertson, Ph.D.
Greek, J. A. Platt, M.A.
Hygiene (*Chadwick*), H. R. Kenwood, C.M.
Latin, A. E. Housman, M.A.
Mathematics (*Astor*), M. J. M. Hill, Sc.D., F.R.S.
Mechanical Engineering, J. D. Cormack, B.Sc.
Music (*King Edward*), Sir Frederick Bridge, M.V.O., Mus.Doc.
Pharmacology, A. R. Cushny, M.D., F.R.S.
Philosophy (*Grote*), Carveth Read, M.A.
Physics (*Quain*), F. T. Trouton, D.Sc., F.R.S.
Physiology (*Jodrell*), E. H. Starling, M.D., F.R.S.
Political Economy, Edwin Cannan, LL.D.
Protozoology, E. A. Minchin, M.A.
Sociology (*Martin White*), L. T. Hobhouse, M.A.; E. A. Westermarck, Ph.D.
Zoology & Comparative Anatomy (*Jodrell*), J. P. Hill, D.Sc.

Professor-Superintendent of the Brown Animal Sanatory Institution, T. G. Brodie, M.D., F.R.S.
Director of the Physiological Laboratory, A. D. Waller, M.D.

Readers.

Ancient History, M. O. B. Caspari, M.A.
Economic History, Mrs. Knowles, Litt.D.
Experimental Psychology, C. Spearman, Ph.D.
Foreign Trade, A. J. Sergeant M.A.
Geography, H. J. Mackinder, M.A.
German, H. G. Atkins, M.A.; W. Perrett, Ph.D.; J. Steppat, Ph.D.
Greek, J. M. MacGregor, M.A.
Meteorology, W. N. Shaw, Sc.D., F.R.S.
Palæography & Economic History, H. Hall, F.S.A.
Statistics, A. L. Bowley, M.A.
Tibetan Language, F. W. Thomas, M.A.

Lecturer on Ethnology (*Martin White*), A. C. Haddon, Sc.D., F.R.S.

RECOGNISED TEACHERS.

The number of "Recognised Teachers" in the several Faculties is as follows:—

Theology, 20; *Arts*, 143; *Laws*, 14; *Music*, 22; *Medicine*, 354; *Science*, 203; *Engineering*, 54; *Economics*, 16. There is also a number of "Temporarily Recognised Teachers," who deliver Special Lectures in *Physiology*, *Botany*, *Zoology*, *Geology*, and *Sociology*, under the direct control of the University.

SCHOOLS OF THE UNIVERSITY.

In the Faculties of Theology, Arts, Laws, Medicine, Science, Engineering, and Economics:—

King's College, Strand, W.C., 1828.
Principal of College, Rev. A. C. Headlam, D.D.
Vice-Principal, J. M. Thomson, LL.D., F.R.S.
Vice-Principal, Ladies' Dept., Miss H. Oakeley, M.A.
Secretary, Walter Smith.
Librarian, F. W. Walton, M.A.

In the Faculty of Theology:—

St. John's Hall, Highbury (The London College of Divinity, Church of England).
Principal, Rev. A. W. Greemup, D.D.

Hackney College, Hampstead (Congregational).
Principal, Rev. P. T. Forsyth, D.D.

New College, Hampstead (Congregational).
Principal, Rev. A. E. Garvie, D.D.

Regent's Park College, N.W. (Baptist).
Principal, Rev. G. P. Gould, M.A.

Wesleyan College, Richmond (Wesl. Methodist).
Governor, Rev. G. Fletcher.

In the Faculties of Arts, Science, and Engineering:—

The East London College, Mile End Road, E.
Principal, John L. S. Hatton, M.A.
Registrar, T. C. Hodson.

In the Faculties of Arts and Science:—

Royal Holloway College, Englefield Green.
Principal, Miss Ellen C. Higgins, B.A.
Vice-Principal (vacant).
Secretary, Miss E. M. Boyd.

Bedford College for Women, York Place, Baker Street, W.
Principal, Miss M. J. Tuke, M.A.
Secretary of Council, Miss E. T. McKnight, M.A.

In the Faculty of Arts:—

Westfield College, Hampstead, N.W.
Resident Mistress, Miss C. L. Maynard.
Secretary, Miss S. M. Smee.

In the Faculty of Medicine:—

The Medical Schools of certain Hospitals, &c. (*see* pp. 279–280.)

In the Faculties of Science and Engineering:—

Imperial College of Science and Technology, South Kensington, S.W.
Rector, Henry Taylor Bovey, LL.D., F.R.S.
Secretary, Alexander Gow, M.A.

In the Faculty of Economics and Political Science:—

London School of Economics and Political Science, Clare Market, Kingsway, W.C.
President, Lord Rothschild.
Chairman, Sidney Webb, LL.B.
Director, Hon. W. P. Reeves.

Faculty of Science—In Agriculture only:—

South-Eastern Agricultural College, Wye, Kent. (Under the County Councils of Kent and Surrey.)
TERMS COMMENCE: Jan. 18, May 1, and Oct. 1.
Chairman, Rt. Hon. Lord Ashcombe.
Clerk to the Governors, J. T. Welldon, B.A. (Ashford).
Principal, M. J. R. Dunstan, M.A., F.R.S.E.
Vice-Principal, F. V. Theobald, M.A.
Secretary & Bursar, H. W. Kersey.

In the Faculty of Engineering :—

entral Technical College, Exhibition Road, S.W.
rofessors, O. Henrici, PH.D., F.R.S., *Mechanics and Mathematics; Emeritus Professor*, W. C. Unwin, F.R.S.; W. E. Dalby, B.Sc., *Civil and Mech. Eng.* (*Dean*); W. E. Ayrton, F.R.S., *Elect. Eng.*; H. E. Armstrong, Ph.D., F.R.S., *Chemistry; Secy. Board of Studies*, A. L. Soper; *Registrar*, John Jones.

THE UNIVERSITY OF DURHAM. 1831.

TERMS (1909).—*Epiph.*, Jan. 15 to March 16.
aster, Apr. 23 to June 22. *Mich.*, Oct. 8 to Dec. 7.
overnors, The Dean and Chapter of Durham.
'arden, Very Rev. the Dean of Durham.
ub-Warden, F. B. Jevons, D.Litt.

PROFESSORS.

ivinity & Eccles. Hist., Rev. R. J. Knowling, D.D.
reek and Classical Lit., Rev. H. Kynaston, D.D.
athematics, R. A. Sampson, D.Sc.
ebrew, Ven. H. W. Watkins, D.D.
edicine, Sir G. H. Philipson, D.C.L.
irgery, F. Page, M.D.
hysiology, T. Oliver, M.D.
natomy, R. Howden, M.B.
omparative Pathology, H. J. Hutchens.
usic, J. C. Bridge, D.Mus.
utors, Rev. H. Gee, D.D.; F. B. Jevons, D.Litt.; Rev. D. Walker, D.D.
egistrar, W. K. Hilton, M.A.
ffiliated Colleges — Codrington, Barbados; Fourah Bay, Sierra Leone.]

Pathology, R. F. C. Leith, F.R.C.P.
Lunacy & Mental Dis., E. B. Whitcombe, M.B.
Operative Surgery, Jordan Lloyd, F.R.C.S.
Ophthalmology, Priestley Smith, F.R.C.S.
Dental School, J. Humphreys, M.D.S. (*Hon. Sec.*).

DAY TRAINING COLLEGES.
Head Mistress (women), Miss A. H. Joyce, B.A.
Master of Method (men), Frank Roscoe.

THE UNIVERSITY OF LIVERPOOL.
Liverpool, 1903. (£2,000.)

TERMS (1908).—Oct. 6 to Dec. 18.
,, (1909).—Jan. 12 to March 26; April 27 to July 10.

Chancellor (vacant).
Vice-Chancellor, A. W. W. Dale, LL.D.
Registrar, P. Hebblethwaite, M.A.
Librarian, John Sampson, M.A.

PROFESSORS.

Faculties of Arts, Science, Medicine, Law and Engineering.
Greek, J. L. Myres, M.A.
Latin, Herbert A. Strong, LL.D.
Classical Literature, A. W. W. Dale, LL.D.
French, C. Bonnier, Ph.D.
Spanish (vacant).
Teutonic Languages, Kuno Meyer, Ph.D.
Celtic, Kuno Meyer, Ph.D.
English Lang. & Philol., H. C. Wyld, B.Litt.
English Literature, Oliver Elton, M.A.
Economic Science, E. C. K. Gonner, M.A.
History, J. M. Mackay, LL.D.
Modern History, Ramsay Muir, M.A.
Philosophy, John MacCunn, LL.D.
Education, E. T. Campagnac, M.A.
Classical Archæology, R. C. Bosanquet, M.A.
Methods and Practice of Archæology, J. Garstang, B.Litt.
Egyptian Archæology, Percy E. Newberry.
Mediæval Archæology, F. P. Barnard, M.A.
Social Anthropology, J. G. Frazer, D.C.L.
Law, G. H. Emmott, LL.M. (*Dean, Law*).
Commercial Law, W. J. Sparrow, LL.D.
Architecture, C. H. Reilly, M.A.
Physiology, C. S. Sherrington, M.D., F.R.S.
Mathematics, F. S. Carey, M.A.
Physics, L. R. Wilberforce, M.A.
Chemistry, James Campbell Brown, D.Sc.
Physical Chemistry, F. G. Donnan, Ph.D.
Natural History, William A. Herdman, D.Sc., F.R.S.
Botany, R. J. H. Gibson, M.A. (*Dean, Science*).
Engineering, W. H. Watkinson, M.Eng.
Civil Engineering, S. W. Perrott, M.A.I.
Electrical Engineering, E. W. Marchant, D.Sc.
Anatomy, A. Melville Paterson, M.D.
Medicine, T. Robinson Glynn, M.D.
Surgery, Rushton Parker, F.R.C.S.
Pathology, Sir Rubert Boyce, M.B., F.R.S.
Midwifery and Gynæcology, H. Briggs, M.D
Therapeutics, J. Hill Abram, M.D.
Hygiene, E. W. Hope, D.Sc.
Tropical Med., Maj. Ronald Ross, C.B., F.R.S.
Bio-Chemistry, B. Moore, D.Sc.
Comparative Pathology, H. E. Annett, M.D.
Veterinary Medicine and Surgery, W. Owen Williams, F.R.C.V.S.
Dean, Arts, A. Mair, M.A.
Dean, Medicine, K. W. Monsarrat, F.R.C.S.
Dean, Engineering, J. Wemyss Anderson, M.Eng.

HALL OF RESIDENCE FOR WOMEN.
Warden, Miss G. M. Butler.

DAY TRAINING COLLEGE (Men and Women).
Principal, J. H. Gettins, B.A.
Mistress of Method, Miss S. Melhuish, M.A.
Warden, F. T. Sharpe, M.A.

THE UNIVERSITY OF LEEDS.
Leeds, 1904. (£2,000.)

TERMS (1908).—Oct. 5 to Dec. 22.
,, (1909).—Jan. 12 to March 24; April 21 to July 3 (Medicine, to July 17).

Chancellor, The Marquess of Ripon, K.G., LL.D.
Vice-Chancellor, N. Bodington, LL.D.
Registrar, W. F. Husband, LL.B.

PROFESSORS.

Faculties of Arts (including Commerce & Law), Science & Technology.
Classics, W. Rhys Roberts, Litt.D.; B. M. Connal, M.A. (*Dean, Arts*).
English Lang. and Lit., C. E. Vaughan, M.A.
French, Paul Barbier fils, M.A.
German, A. W. Schüddekopf, Ph.D.
History, Arthur J. Grant, M.A.
Economics, D. H. Macgregor, M.A.
Education, J. Welton, M.A.
Law, W. R. Phillips, LL.M.
Mathematics, L. J. Rogers, M.A.
Physics, W. Stroud, D.Sc.
Chemistry, A. Smithells, B.Sc., F.R.S. (*Dean, Science*).

rganic Chemistry, J. B. Cohen, B.Sc.
ology, W. Garstang, D.Sc.
otany, V. H. Blackman, M.A.
eology, P. F. Kendall, M.Sc.
ngineering, J. Goodman, M.Sc.
ining, G. R. Thompson, B.Sc. (*Dean, Technology*).
extile Industries, Roberts Beaumont, M.Sc.
eeing, A. G. Green, M.Sc.
eather Industries, H. R. Procter, M.Sc.
uel & Metallurgy, W. A. Bone, D.Sc., F.R.S.
griculture, R. S. Seton, B.Sc.

School of Medicine.

natomy, T. Wardrop Griffith, M.D.
hysiology and Histology, De Burgh Birch, M.D.
athology, A. S. Grünbaum, F.R.C.P. (*Dean Medicine*).
edicine, A. G. Barrs, M.D.
urgery, H. Littlewood, M.Sc.
bstetrics, J. B. Hellier, M.D.
herapeutics, Pharmacy, and Materia Medica, H. J. Campbell, M.D.
ublic Health, J. S. Cameron, M.D.
orensic Medicine (vacant).

HEFFIELD UNIVERSITY. 1905. (£2,000.)

ERMS (1907).—Oct. 2 to Dec. 18.
,, (1908).—Jan. 8 to Apr. 1; Apr. 29 to June 25.
ancellor, The Duke of Norfolk, E.M., K.G., Litt.D.
ro-Chancellors, Sir F. T. Mappin, Bt.; G. Franklin, Litt.D., J.P.
ice-Chancellor, Sir Charles Eliot, K.C.M.G., LL.D.
reasurer, H. K. Stephenson, J.P.
egistrar, W. M. Gibbons, M.A.
utor for Women Students, Miss M. J. Sorby.

PROFESSORS.

athematics, A. H. Leahy, M.A. (*Dean, Pure Science*).
hysics, W. M. Hicks, Sc.D., F.R.S.
hemistry, W. Palmer Wynne, D.Sc., F.R.S.
ology, Alfred Denny, M.Sc.
otany, B. H. Bentley, M.A.
eology, A. McWilliam, M.Met.
eography, R. N. Rudmose Brown, B.Sc.
nglish Lang. & Lit., G. C. Moore Smith, Litt.D.
istory, H. W. Appleton, M.A.
assics, W. C. Summers, M.A. (*Dean, Arts*).
rench, A. T. Baker, Ph.D.
erman, Julius Freund, Ph.D.
ducation, J. A. Green, M.A.
aw, W. F. Trotter, LL.M.
ngineering, W. Ripper, M.INST.C.E. (*Dean, Applied Science*).
ining Engineering, F. W. Hardwick, M.A.
vil Engineering, J. Husband, B.Eng.
lectrical Engineering, E. H. Crapper, B.Eng.
pplied Chemistry, L. T. O'Shea, B.Sc.
etallurgy, J. O. Arnold, D.Met.
natomy, C. J. Patten, M.D.
hysiology, J. S. Macdonald, B.A.
edicine, W. Dyson, M.D.; D. Burgess, F.R.C.P.
ateria Medica, &c., W. T. Cocking, M.D.
urgery, R. J. Pye-Smith, F.R.C.S.
., Operative, Arthur Connell, F.R.C.S.
athology, J. M. Beattie, M.D. (*Dean, Medicine*).
idwifery, R. Favell, Ch.M.
orensic Medicine, Archibald Young, M.B.
phthalmology, Simeon Snell, D.Sc.
ublic Health, R. P. Williams, M.D.
fectious Diseases, E. H. Williams, M.D.
ental Diseases, W. S. Kay, M.D.
ental Surgery, &c., F. Harrison, L.D.S.

TRAINING COLLEGE.

istress of Method, Katherine L. Johnston, B.A.

ENGLISH COLLEGES.

GRESHAM COLLEGE, Basinghall St., E.C.

Clerk to the Joint Gresham Committee, Mercers' Hall, London, E.C.—G. H. Blakesley.

BRISTOL—UNIVERSITY COLLEGE. 1876.

President, The Bishop of Hereford.
Principal, C. Lloyd Morgan, LL.D., F.R.S.
Dean, Faculty of Medicine, E. Fawcett, M.D.
Tutor, Women Students, Miss M. C. Staveley, M.A.
Mistress of Method, Miss M. F. Pease.
Registrar & Secretary, James Rafter.

PROFESSORS.

Faculty of Arts and Science.

Chemistry, F. Francis, D.Sc.; *Mathematics*, Frank R. Barrell, M.A.; *Experimental Physics*, A. P. Chattock, M.I.E.E.; *Engineering*, R. M. Ferrier, M.Sc.; *Geology & Zool.*, S. H. Reynolds, M.A.; *Psychology*, The Principal; *Modern History*, G. H. Leonard, M.A.; *Eng. Lit. and Language*, R. P. Cowl, M.A.; *Public Administration and Economics*, H. B. Lees Smith, M.A.; *Greek and Latin*, Francis Brooks, M.A.

Faculty of Medicine.

Medicine, F. H. Edgeworth, M.B., J. Michell Clarke, M.D.; *Surgery*, C. A. Morton, F.R.C.S.; J. Swain, F.R.C.S.; *Anatomy*, Edward Fawcett, M.D.; *Physiology and Histology*, A. F. Stanley Kent, M.A.; *Midwifery*, W. C. Swayne, M.D.; *Pathology*, I. Walker Hall, M.D.

DAY TRAINING COLLEGE.—(Women) *Mistress of Method*, Miss M. F. Pease; (Men) *Master of Method*, T. S. Foster, M.A.; (Women's Hostel) *Lady Supt.*, Miss A. Cook.

EXETER—ROYAL ALBERT MEMORIAL, UNIVERSITY COLLEGE.

Principal, A. W. Clayden, M.A.
Sec. and Registrar, A. Woodbridge.
PROFESSORS.—*Physics & Geology*, The Principal; *Chemistry and Biology*, W. H. Lewis, M.A.; *History and Literature*, W. J. Harte, M.A.; *Mathematics*, H. F. Lunn, M.A.; *Education*, Rev. A. W. Parry, B.Sc.
DAY TRAINING COLLEGE (Men and Women).—*Professor of Education*, Prof. Parry; *Lady Tutor*, Miss A. J. Walker, M.A.

NEWCASTLE-UPON-TYNE—ARMSTRONG COLLEGE. (*See* University of Durham.)

NEWCASTLE-UPON-TYNE—RUTHERFORD COLLEGE. 1878.

Chairman, Councillor George Lunn, J.P.
Principal, J. B. Gaunt, B.Sc.
Registrar, R. Thomson.

NOTTINGHAM—UNIVERSITY COLL. 1880.

Principal, Rev. J. E. Symes, M.A.
Registrar, P. H. Stevenson, F.C.I.S.
PROFESSORS.—*History, Literature, and Pol. Econ*, The Principal; *Classics and Philosophy*, F. S. Granger, Litt.D.; *Modern Languages*, E. Weekley, M.A.; *Chemistry*, F. S. Kipping, D.Sc., F.R.S.; *Natural Sciences*, J. W. Carr, M.A.; *Mathematics and Physics*, W. H. Heaton, M.A.; *Engineering*, W. Robinson, M.E.; *Education*, A. Henderson, B.A.; *Experimental Physics*, E. H. Barton, D.Sc.; *Mechanical Engineering*, A. Morley, M.Sc.
DAY TRAINING COLLEGE.—*Normal Master*, Prof. Henderson, B.A.; *Normal Mistress*, Miss Bird, L.L.A.

READING—UNIVERSITY COLLEGE.

Principal, W. M. Childs, M.A.
Registrar, F. H. Wright, M.A.
PROFESSORS.—*Geography and Geol.*, H. N. Dickson, D.Sc.; *Hist.*, The Principal; *Classics*, W. G. de Burgh, M.A.; *Math.*, A. L. Bowley, M.A.; *Chemistry*, J. K. H. Inglis, D.Sc.; *Physics*, G. J. Burch, D.Sc., F.R.S.; *Botany*, F. Keeble, D.Sc.; *Zoology*, F. J. Cole, B.Sc.; *Agric.*, J. Percival, M.A.; *Fine Art*, W. G. Collingwood, M.A., F.S.A.; *Music*, H. P. Allen, D.Mus.; *Educ.*, H. S. Cooke, M.A.; *Eng. Lit.*, Miss E. J. Morley; *French*, A. V. Salmon, B. ès L.

SOUTHAMPTON—HARTLEY UNIV. COLL.

Principal, S. W. Richardson, D.Sc.
Registrar, D. Kiddle.
PROFESSORS.—*Classics and English*, W. F. Masom, M.A.; *French and German*, P. Studer, M.A.; *Mathematics*, E. L. Watkin, M.A.; *Physics & Appld. Electricity*, The Principal; *Chemistry*, D. R. Boyd, D.Sc.; *Biology and Geology*, F. Cavers, D.Sc.; *Engineering*, J. Eustice, B.Sc.; *History*, F. J. C. Hearnshaw, LL.D.; *Education*, F. Clarke, M.A.

Wales.

THE UNIVERSITY OF WALES, 1893. (£4,000.)

"PRIFYSGOL CYMRU."

Protector, H.M. The King.
Chancellor, H.R.H. The Prince of Wales, K.G.
Do. Senior Deputy, Sir Isambard Owen, D.C.L., M.D.
Do. Junior Deputy and Standing Counsel, Sir D. Brynmor Jones, K.C., M.P.
Vice-Chancellor, Principal Roberts, LL.D.
Warden, Guild of Graduates, Prof. E. Edwards, M.A.
Treas., Lt.-Gen. Sir J. Hills-Johnes, *V.C.*, G.C.B.
Registrar, J. M. Angus (Cathays Park, Cardiff).
Treas., Guild of Graduates, Edgar Jones, M.A.
Clerk, Guild of Graduates, J. G. Davies, M.A.

I. UNIVERSITY COLLEGE OF WALES—Aberystwyth (1872). (£4,000.)

TERMS (1908).—15 Sept. to 18 Dec.
" (1909).—12 Jan. to 2 Ap.; 20 Ap. to 22 June.
Principal, Thomas Francis Roberts, LL.D.
Registrar, J. H. Davies, M.A.
Librarian, J. D. Williams, B.A.
Do., Welsh Library, R. Ellis, M.A.

PROFESSORS.

Greek, The Principal; J. W. Marshall, M.A.
Latin, E. Bensly, M.A.
Oriental, German, & Italian Languages, H. Ethé, PH.D.
English Lang. and Lit., J. W. H. Atkins, M.A.
History, Edward Edwards, M.A.
Math., Nat. Philos., & Astron., R. W. Genese, M.A.
Logic and Philosophy, J. Brough, LL.D.
Political Science, W. Jenkyn Jones, M.A.
Chemistry, J. J. Sudborough, D.Sc.
Physics, D. Morgan Lewis, M.A.
Zoology and Geology, H. J. Fleure, D.Sc.
Botany, R. H. Yapp, M.A.
Welsh & Comparative Philology, Edwd. Anwyl, M.A.
French, L. E. Kastner, M.A.
Education, Foster Watson, M.A.
Law, T. Arthur Levi, B.C.L.
Music, David Jenkins, Mus.Bac.
Agriculture, C. Bryner Jones, M.Sc.
Do. (Chemistry). J. J. Griffith, B.Sc.

HALL OF RESIDENCE FOR WOMEN.

Warden, Miss E. A. Fewings.

MEN STUDENTS' HOSTEL.

Warden, Prof. J. W. Marshall, M.A.

II. UNIVERSITY COLLEGE OF NORTH WALES—Bangor (1884). (£4,000.)

TERMS (1908).—29 Sept. to 16 Dec.
" (1909).—7 Jan. to 24 March; 15 April to [29 June.
Principal, Sir Harry Reichel, LL.D.
Secretary and Registrar, J. E. Lloyd, M.A.

PROFESSORS.

Constitutional History, The Principal.
History, J. E. Lloyd, M.A.
Greek, T. Hudson Williams, M.A.
Latin, E. V. Arnold, Litt.D.
French, O. H. Fynes-Clinton, M.A.
German, Thomas Rea, M.A.
English Language & Lit., W. Lewis Jones, M.A.
Semitic Languages, T. Witton Davies, PH.D.
Logic, Philosophy and Pol. Econ., J. Gibson, M.A.
Mathematics, G. H. Bryan, SC.D., F.R.S.
Physics, E. T. Jones, D.Sc.
Chemistry, K. J. P. Orton, PH.D.
Botany, R. W. Phillips, D.Sc.
Welsh, J. Morris Jones, M.A.
Agriculture, T. Winter, M.A.
Zoology, P. J. White, M.B., F.R.S.E.
Education, R. L. Archer, M.A.
Forestry, Fraser Story, F.R.S.E.

HALL OF RESIDENCE FOR WOMEN.

Warden, Miss H. M. M. Lane.

III. UNIVERSITY COLL. OF SOUTH WALES AND MONMOUTHSHIRE—Cardiff (1883). (£4,000.)

TERMS (1908).—6 Oct. to 18 Dec.
" (1909).—5 Jan. to 18 Mar.; 13 Ap. to 25 June.
Principal, Ernest Howard Griffiths, SC.D., F.R.S.
Registrar, J. Austin Jenkins, B.A.

PROFESSORS.

Greek, G. Norwood, M.A.
Latin, D. A. Slater, M.A.
Logic and Philosophy, J. S. Mackenzie, Litt.D.
English Lang. & Literature, H. Littledale, M.A.
French Lang. & Literature, Paul Barbier.
Education, W. Phillips, M.A.; H. M. Mackenzie.
Mathematics & Astron., H. W. Lloyd Tanner, D.SC., F.R.S.; R. H. Pinkerton, M.A.
Celtic, Thomas Powel, M.A.
Experimental Philosophy, The Principal.
Physics, A. L. Selby, M.A.
Chemistry, C. M. Thompson, D.Sc.
Engineering, A. C. Elliott, D.Sc.
Zoology, W. N. Parker, PH.D.
Botany, A. H. Trow, D.Sc.
Geology, W. S. Boulton, B.Sc.
History, H. Bruce, M.A.
Metallurgy, A. A. Read, M.Met.

Faculty of Medicine.

Anatomy, David Hepburn, M.D., F.R.S.E.
Physiology, J. B. Haycraft, M.D., F.R.S.E.

ABERDARE HALL.

Lady Principal, Miss Kate Hurlbatt.

LAMPETER—ST. DAVID'S COLLEGE. 1827.

TERMS (1908).—*Michaelmas*, 15 Oct. to 17 Dec.
" (1909).—*Lent*, 21 Jan. to 25 March.
Easter, 29 April to 1 July.
Principal & Sen. Bursar, Rev. Ll. J. M. Bebb, D.D.

PROFESSORS.

Theology and Greek, The Principal.
Math. & Phys. Science, A. W. Scott, M.A.
English & Philos., H. Walker, LL.D., *Jr. Bursar.*

atin, Rev. G. W. Wade, D.D., *Librarian.*
Hebrew & Theology, Rev. E. T. Green, M.A., *Censor.*
Welsh & Classics, Rev. E. L. Thomas, M.A., *Steward.*
Theology (Lect.), Rev. C. Cryer, M.A.
Mathematics (Lect.), Rev. B. Davies, M.A.
History (Lect.), Rev. W. W. Longford, M.A.

[Lampeter possesses by Charter the privileg[e] of conferring degrees B.A. and B.D., and is affiliated to Oxford and Cambridge.]

Scotland.

UNIVERSITY OF ST. ANDREWS. 1411.

(£10,800.)

Number of Students (1907–1908), 548.

Winter Session (1908–1909), 8 Oct. to 17 March.
Summer Session (1909), 21 April to 29 June.

Chancellor, Rt. Hon. Lord Balfour of Burleigh, K.T.
Vice-Chancellor, Principal Sir James Donaldson, LL.D.
Rector, Rt. Hon. Lord Avebury, LL.D.
Principal, Sir James Donaldson, LL.D.
Representative in Parliament, Sir J. B. Tuke, D.Sc.
Registrar & Secretary, Andrew Bennett.
Librarian, J. M. Anderson. *Factor*, W. Wilkie.

UNITED COLLEGE OF ST. SALVATOR AND ST. LEONARD.

Principal, Sir James Donaldson, LL.D. £900

PROFESSORS.

Humanity, Wallace M. Lindsay, M.A.	£750
Logic & Metaphysics, G. F. Stout, LL.D.	600
Greek, John Burnet, M.A.	750
Mathematics, P. R. Scott Lang, M.A. (*Dean, Science*)	750
Moral Philosophy, Alfred E. Taylor, M.A.	600
Nat. Philos., A. S. Butler, M.A.	750
Natural History, W. C. McIntosh, M.D.	650
Chemistry, Thos. Purdie, B.Sc.	650
Education, John Edgar, M.A.	500
Engl. Literature, A. Lawson, M.A. (*Dean, Arts*)	600
Anatomy, James Musgrove, M.D.	566
Physiology, Percy T. Herring, M.D.	425

COLLEGE OF ST. MARY.

Warden, Very Rev. A. Stewart, D.D. (*Dean, Theol.*).

PROFESSORS.

Primarius Prof. of Divinity, The Principal	£688
Biblical Criticism, Rev. Allan Menzies, D.D.	600
Ecclesiastical Hist., Rev. John Herkless, D.D.	616
Oriental Languages, Rev. D. M. Kay, D.D.	600

UNIVERSITY COLLEGE, DUNDEE (1880).

Principal, John Yule Mackay, LL.D. £764
Secretary, W. Arnot Watterston.

PROFESSORS.

Mathematics, J. E. A. Steggall, M.A.	£524
Natural Philosophy, William Peddie, D.Sc.	520
Chemistry, Hugh Marshall, D.Sc.	577
Natural History, D'Arcy W. Thompson, B.A.	511
Botany (White's), Patrick Geddes, F.R.S.E.	279
Anatomy (Cox's), J. Yule Mackay, LL.D. (*supra*)	
Physiology, E. W. Reid, B.A.	
Engin. and Drawing, T. C. Fidler, M.I.C.E.	537
Pathology, L. R. Sutherland	486
Surgery, D. MacEwan, M.D.	173
Medicine, Alex. M. Stalker	155
Midwifery, Jno. A. C. Kynoch	161
Materia Medica, Chas. R. Marshall (*Dean, Medicine*)	489

UNIVERSITY OF GLASGOW. 1450.

(£20,880.)

Number of Students (1907–8), 2,557.

TERMS (1908).—12 Oct. to 18 Mar.
„ (1909).—13 April to 29 June.

Chancellor, Lord Rosebery, K.G., K.T., LL.D.
Vice-Chancellor, The Principal.
Rector, Rt. Hon. Lord Curzon of Kedleston.
Principal, Donald MacAlister, D.C.L. *£1,100
Representative in Parliament, Sir Henry Craik, K.C.B., LL.D.

PROFESSORS.

Humanity, J. S. Phillimore, M.A.	*£1,000
Greek, Gilbert A. Davies, M.A.	*1,000
Civ. Engineering & Mechanics, Archibald Barr, D.Sc.	900
Logic & Rhetoric, Robert Latta, D.Ph.	*800
Moral Philosophy, Hy. Jones, LL.D.	*800
Natural Philosophy, A. Gray, LL.D., F.R.S.	*1,000
Mathematics, Wm. Jack, LL.D.	*1,440
English Lang. & Lit., Wm. M. Dixon, Litt.D.	900
History, Dudley J. Medley, M.A. (*Dean, Arts*)	900
Astronomy, Ludwig Becker, Ph.D.	600
Naval Architecture, J. Harvard Biles, LL.D.	800
Divinity, Rev. H. M. B. Reid, D.D.	*521
Church History, James Cooper, D.D.	*437
Biblical Criticism, W. Stewart, D.D. (*Dean, Theology*)	558
Hebrew & Semitic Lang., W. B. Stevenson, B.D.	*700
Law, William M. Gloag, B.A. (*Dean, Law*)	*800
Conveyancing, James Moir, LL.D.	600
Materia Medica, R. Stockman, M.D.	700
Chemistry, John Ferguson, LL.D.	1,200
Surgery, Sir William Macewen, M.D., F.R.S.	800
Practice of Medicine, S. Gemmell, M.D.	*800
Midwifery, Murdoch Cameron, M.D.	700
Anatomy, John Cleland, M.D., F.R.S.	*1,645
Zoology, John G. Kerr, M.A. (*Dean, Science*)	800
Geology, John W. Gregory, D.Sc., F.R.S.	700
Mining, Chas. Latham, M.INST.M.E.	600
Botany, Frederick O. Bower, D.Sc., F.R.S.	830
Physiology, D. Noel Paton, M.D.	1,100
Forensic Medicine, John Glaister, M.D. (*Dean, Medicine*)	600
Clinical Surgery, Sir H. C. Cameron, M.D.	216
Clinical Medicine (vacant)	305
Pathology, Robert Muir, M.D.	1,100
Political Economy, W. Smart, LL.D.	600

Clerk of Senatus, Professor W. Stewart, D.D.
Assistant do., W. I. Addison; A. Morrison.
Librarian, James L. Galbraith.
Registrar of Gen. Council, W. I. Addison.
Clerk to Gen. Council, Archibald Craig, LL.B.
Sec. to Univ. Court, A. E. Clapperton, B.L.

UNIVERSITY OF ABERDEEN. 1494.

(£14,400.)

Number of Matriculated Students (1907–8), 932.
Winter Session (1908), 13 October to 17 March;
Summer Session (1909), 27 April to 9 July.

Chancellor, Lord Strathcona and Mount Royal, G.C.M.G., D.C.L. 1903
Rector, Rt. Hon. H. H. Asquith, M.P. 1908
Vice-Chancellor and Principal, The Very Rev. John Marshall Lang, C.V.O., D.D. *£800
Represent. in Parlt., Sir Henry Craik, K.C.B., LL.D.
Secretary of the University, Donaldson R. Thom, M.A.
Registrar, R. Walker, LL.D.
Librarian and Clerk of the General Council, P. J. Anderson, LL.B.

* The sums appended to the various Chairs are the amounts received in the year 1906–1907; each of those marked has an official residence in addition.

PROFESSORS.

Greek, John Harrower, M.A. *£800
Humanity, Sir Wm. M. Ramsay, D.C.L. *800
English, Herbert J. C. Grierson, M.A. 700
Hist. & Archæology, Chas. Sanford Terry, M.A. ‡680
Logic, William Leslie Davidson, LL.D. 700
Mathematics, Hector M. Macdonald, M.A., F.R.S. *800
Moral Philosophy, Jas. Black Baillie, D.Ph. 700

METROPOLITAN ASYLUMS BOARD, *Exmouth* (p. 311).

TECHNICAL EDUCATION.

I.—UNDER LONDON COUNTY COUNCIL.

The Education (London) Act, 1903, which applies the provisions of the Education Act, 1902 with certain modifications, to London, came in force May 1, 1904.

The principal technical institutes maintained or aided by the L.C.C. are the following:—

Institutes entirely maintained by the L.C.C.

CAMBERWELL SCHOOL OF ARTS AND CRAFTS, Peckham Road, S.E.—*Principal*, W. B. Dalton; *Sec.*, C. H. Johnson, B.A.
CAMDEN SCHOOL OF ART, Dalmeny Avenue, N.—*Principal*, Francis Black, B.E.A., A.R.C.A.
CENTRAL SCHOOL OF ARTS AND CRAFTS, Southampton Row, W.C.—*Principal*, W. R. Lethaby; *Secretary*, C. W. Beckett.
CLAPHAM SCHOOL OF ART, Edgely Road, High Street, Clapham, S.W.—*Principal*, L. C. Nightingale.
HAMMERSMITH SCHOOL OF ARTS AND CRAFTS, Lime Grove, Shepherd's Bush, W.—*Headmaster*, Francis Hawkes.
NORWOOD TECHNICAL INSTITUTE, Knight's Hill, West Norwood, S.E.—*Principal*, W. Hunting ton, B.Sc.
PADDINGTON TECHNICAL INSTITUTE, Saltram Crescent, W.—*Principal*, A. G. Cooke, M.A. *Secretary*, J. E. Leak.
PUTNEY SCHOOL OF ART, Oxford Road, Putney.—*Headmaster*, J. Bowyer.
SCHOOL OF BUILDING, Ferndale Road, Brixton, S.W.—*Principal*, H. W. Richards; *Secretary*, W. A. Andrews.
SCHOOL OF ENGINEERING AND NAVIGATION, High Street, Poplar, E.—*Principal*, H. A. Garratt, M.I.N.A., Assoc.M.Inst.C.E.; *Secretary*, A. R. Forbes.
SCHOOL OF PHOTO-ENGRAVING AND LITHOGRAPHY, Bolt Court, Fleet Street.—*Principal*, A. J. Newton.
SHOREDITCH TECHNICAL INSTITUTE, Pitfield Street, Hoxton, N.—*Director*, S. Hicks; *Sec.*, J. E. Tapley.
WESTMINSTER TECHNICAL INSTITUTE, Vincent Square, S.W., with which is incorporated the WESTMINSTER SCHOOL OF ART.—*Principal*, J. Stuart Ker, B.Sc.; *Sec.*, Miss K. O. Helmore. *Headmaster*, School of Art, Monat Loudan.
L.C.C. TRADE SCHOOL FOR GIRLS (Temporary premises, Westminster Technical Institute, Vincent Square, S.W.).—*Lady Superintendent*, Miss B. M. Cunnington.

Polytechnics aided by the L.C.C.

BATTERSEA POLYTECHNIC, Battersea Park Road, S.W.—*Principal*, S. G. Rawson, D.Sc.; *Sec.*, J. Harwood.

KBECK COLLEGE, Bream's Buildings, Chancery Lane.—*Principal*, G. Armitage Smith, M.Lit. ; *Sec.*, H. Wells-Eames.

ROUGH POLYTECHNIC, Borough Road, S.E.—*Principal*, C. T. Millis, M.I.MECH.E. ; *Sec.*, W. M. Richardson.

TY OF LONDON COLLEGE, White Street, Moorfields.—*Principal*, Sidney Humphries, LL.B. ; *Sec.*, D. Savage.

RTHAMPTON POLYTECHNIC INSTITUTE, Clerkenwell.—*Principal*, R. M. Walmsley, D.SC., F.R.S.E. ; *Sec.*, W. K. Davis.

RTHERN POLYTECHNIC, Holloway Rd., N.—*Prin.*, R. S. Clay, D.SC. ; *Sec.*, W. M. Macbeth.

GENT STREET POLYTECHNIC, 309 Regent Street, W.—*Director of Education*, Robert Mitchell ; *Sec.*, L. Harris.

R JOHN CASS TECHNICAL INSTITUTE, Aldgate.—*Principal*, C. A. Keane, PH.D. ; *Sec.*, W. H. Davison, M.A.

UTH-WESTERN POLYTECHNIC, Manresa Road, Chelsea, S.W.—*Principal*, S. Skinner, M.A. ; *Sec.*, H. B. Harper.

OOLWICH POLYTECHNIC, William Street, Woolwich.—*Principal*, W. Gannon, M.A. ; *Sec.*, A. J. Naylor.

Technical Institutes, &c., aided by the L.C.C.

LDENHAM INSTITUTE, Pancras Road, N.W.—*Hon. Sec.*, H. S. Mingard.

RMONDSEY SETTLEMENT, Farncombe Street, Jamaica Road, S.E.—*Warden*, Rev. J. Scott Lidgett.

URCH INSTITUTE, Wiseton Rd., Upper Tooting. *Hon. Secretary*, C. H. Baker.

AFT SCHOOL, 37–39 Stepney Green, E.—*Principal*, Gilbert C. Cooke.

VAS INSTITUTE, New Road, Battersea, S.W.—*Secretary*, W. F. Holmes.

LDSMITHS' COLLEGE, New Cross, S.E.—*Warden*, W. Loring, M.A.

CKNEY INSTITUTE.—*Principal*, Percy R. Kirk, M.A. ; *Clerk to the Governors*, A. Crew.

(a) *Hackney Technical Institute*, Dalston Lane, N.E.

(b) *Sir John Cass Hackney Institute*, Cassland Road, N.E.

ERALD'S INSTITUTE, Drummond Road, Bermondsey (for Leather Trades).—*Principal*, Dr. T. Gordon Parker.

RLEY COLLEGE, Waterloo Road, S.E.—*Principal*, C. R. Buxton, M.A. ; *Vice-Principal*, Miss Sheepshanks.

YAL SCHOOL OF ART NEEDLEWORK, Exhibition Road, S.W.—*Secretary*, Miss M. ffennell.

LORS' HOME, Dock Street, E. (School of Nautical Cookery).—*Secretary*, A. E. Loder.

BRIDE FOUNDATION INSTITUTE, Bride Lane, Fleet Street, E.C. (for Printing Trades).—*Manager*, C. Harrap.

OOL OF ART WOOD-CARVING, Exhibition Road, S.W.—*Secretary*, C. McEnroe.

NDSWORTH TECHNICAL INSTITUTE, High Street, Wandsworth, S.W.—*Principal*, G. F. Goodchild, M.A. ; *Hon. Sec.*, William Hicks.

RKING MEN'S COLLEGE, Crowndale Rd., N.W. —*Superintendent*, E. C. Duchesne.

Schools of Art aided by the L.C.C.

CKHEATH, LEE, LEWISHAM AND GREENWICH, ee Road, Blackheath.—*Headmaster*, J. H. ale.

CLAPTON AND STAMFORD HILL, 81 Clapton Common.—*Headmistress*, Miss F. Edith Giles.

LAMBETH, St. Oswald's Place, Upper Kennington Lane.—*Headmaster*, T. McKeggie.

ST. MARTIN'S, Castle St., Endell St., Long Acre. —*Headmaster*, J. E. Allen.

In addition to the above schools there are Art Schools or Classes attached to all the Polytechnics, except the Northern Polytechnic. Schools of Art are also conducted by the City and Guilds of London Institute at Finsbury Technical College and at the South London Technical Art School, 122–124 Kennington Park Road (see below).

II.—OTHER LONDON INSTITUTIONS.

City and Guilds of London Institute, Gresham College, E.C.

Patron, H.M. The King.
Chairman of Council, The Earl of Halsbury.
Treasurer, S. Steuart Gladstone.
Chairman Executive Committee, Sir John Wolfe Barry, K.C.B., F.R.S.
Hon. Secretary, Sir John Watney.
Assistant Secretary, A. L. Soper.

Schools, Colleges and Departments.

(1) CENTRAL TECHNICAL COLLEGE, Exhibition Road, S.W.—*Professors*, W. E. Ayrton, F.R.S., *Electr. Engr.* ; W. E. Dalby, M.A., *Civ. & Mech. Engr.* ; H. E. Armstrong, F.R.S., *Chemistry* ; O. Henrici, F.R.S., *Math. & Mech.* ; *Reg.*, J. Jones.

(2) TECHNICAL COLLEGE, Leonard St., Finsbury, E.C.—*Professors*, S. P. Thompson, D.SC., F.R.S., *Electr. Engineering and Principal* ; E. G. Coker, D.SC., *Mechan. Eng.* ; R. Meldola, F.R.S., *Chemistry* ; A. R. Brophy, *Head Master of Applied Art* ; *Registrar*, K. Dove.

(3) TECHNICAL ART SCHOOL, 122 & 124 Kennington Park Road, S.E.—*Supt. of Studies*, J. C. L. Sparkes.

(4) DEPARTMENT OF TECHNOLOGY, Exhibition Road, S.W.—*Supt.*, Sir Philip Magnus ; *Asst.*, G. Udny Yule.

CITY AND GUILDS LEATHER TRADES' SCHOOL, 42 Bethnal Green Road, E.—*Headmaster*, F. Y. Golding.

TRADES' TRAINING SCHOOLS, 153 Great Titchfield St., W.—*Director*, H. Phillips Fletcher, F.R.I.B.A.

WILLESDEN POLYTECHNIC, Priory Park Road, N.W.—*Secretary*, William Houston, B.A.

PROVINCIAL TECHNICAL COLLEGES.

CITY OF BRADFORD TECHNICAL COLLEGE.—*Principal*, Prof. W. M. Gardner, M.SC. (*Chemistry and Dyeing*) ; *Textile Industries*, Prof. A. F. Barker ; *Civil, Mechanical and Electrical Engineering*, Prof. G. F. Charnock, A.M.I.C.E. ; *Secretary Education Committee*, Thos. Garbutt, Manor Row, Bradford.

BIRMINGHAM (Vittoria Street—For Jewellers and Silversmiths).—*Headmaster*, Arthur J. Gaskin ; *Sec.*, A. H. Leaney.

BRIGHTON MUNICIPAL TECHNICAL COLLEGE.—*Principal*, C. H. Draper, D.SC.

BRISTOL MERCHANT VENTURERS' TECHNICAL COLLEGE.—*Principal*, Prof. J. Wertheimer, B.SC. ; *Secretary*, G. H. Pope, M.A. ; *Treasurer*, P. L. King ; *Registrar*, L. Ford ; *Librarian*, A. M. Westphal ; *Professors*—*Appl. Physics and Elect. Eng.*, D. Robertson, B.SC. ; *Chemistry*, The Principal ; *Organic Chemistry*, F. W. Rixon, PH.D. ; *Civil and Mech. Eng.*, John Munro, M.I.MECH.E. ; *Math.*, E. S. Boulton, M.A.

• Branch of the Borough Polytechnic.

DERBY TECHNICAL COLLEGE.—*Principal*, F. W. Shurlock, B.Sc.; *Biology*, W. B. Randles, B.Sc.; *Chemistry*, A. J. Walker, Ph.D.; *Engineering*, R. D. Whitehead, A.I.MECH.E.; *Physics*, The Principal; *Electrical Engineering*, R. M. Archer, B.Sc.; *Modern Languages*, B. Tacchella, B.A.; *Mathematics*, J. M. Child, B.A.; *English*, W. P. Goudie, B.A.; *Registrar*, J. L. Rees.

GLASGOW AND WEST OF SCOTLAND TECHNICAL COLLEGE, 1796 (George Street, Glasgow).
Secretary and Director, H. F. Stockdale, F.R.S.E.

Professors.

Mathematics, George A. Gibson, LL.D.
Natural Philosophy, James Muir, D.Sc.
Chemistry, G. G. Henderson, D.Sc.
Technical Chemistry, Thomas Gray, D.Sc.
Metallurgy, A. H. Sexton, F.C.S.
Mechanics, J. G. Longbottom, A.R.C.S.
Electrical Engineering, Magnus Maclean, D.Sc.
Motive Power Eng., A. L. Mellanby, D.Sc.
Architecture, Charles Gourlay, B.Sc., A.R.I.B.A.
Librarian, Peter Bennett.

HUDDERSFIELD TECHNICAL COLLEGE.
Principal, J. F. Hudson, M.A.
Secretary, Thomas Thorp.

LONGTON (Staffs.), Sutherland Technical Institute.—*Headmaster*, W. Harris, Ph.D.; *Secretary*, W. T. Cope.

MANCHESTER MUNICIPAL SCHOOL OF TECHNOLOGY.—*Principal*, J. H. Reynolds, M.Sc.; *Asst. Do.*, J. P. Wrapson, M.Sc.; *Registrar*, H. Williams.

NORTHAMPTON AND COUNTY TECHNICAL AND ART SCHOOL, Northampton.—*Organising Sec.*, Alfred O. Eamer.

SALFORD ROYAL TECHNICAL INSTITUTE, Salford.—*Principal*, H. B. Knowles, M.A.

SOCIOLOGY, &c.

RUSKIN COLLEGE, Worcester Place, Oxford.—*Principal*, Dennis Hird, M.A., J.P.

THEOLOGICAL, &c.

Church of England.

BIRKENHEAD (St. Aidan's).—*Principal*, Rev. Frederic Sumpter Guy Warman, B.D.
BURGH (St. Paul's Missionary Coll.).—*Principal*, Rev. Canon Dodson, M.A.

Secondary Education.

THE HEAD MASTERS' CONFERENCE (*Secy.*, W. A. Evans, 12 King's Bench Walk, Temple, E.C.).—The object of the Conference is the discussion of educational questions which affect such schools as are in close connection with the Universities of Oxford and Cambridge. The annual meetings are, as a rule, held in December, alternately (*a*) at some school represented on the Conference, (*b*) at London or some University town. The admission of schools to the Conference is decided by the committee, and in considering applications the committee has regard to the scheme or other instrument under which the school is administered, the numbers in the school, and the number of resident undergraduates of Oxford and Cambridge educated at the school. As a general rule there should be 100 boys at least in any school represented at the Conference, and about ten resident undergraduates at the Universities who have gone direct from the school. The Universities Joint Committee meets terminally to consider matters of joint interest to the Universities and Public Schools.

THE INCORPORATED ASSOCIATION OF HEAD MASTERS (*Asst. Secy.*, H. Bendall, M.A., 37 Norfolk Street, Strand, W.C.).—The qualification for membership is the holding of the head mastership of a day school for boys, the school being (*a*) recognised by the Board of Education as Secondary; (*b*) administered under a definite form of public or corporate control (*e.g.*, Board of Education Scheme); (*c*) managed by a governing body which has powers both to control the school finances and to appoint and dismiss the head master.

THE SCHOOLMASTERS' ASSOCIATION, IRELAND (*Pres.*, W. G. Connolly, LL.D., Waterford; *Secy.*, H. S. McIntosh, M.A., Belfast) is similar to the H.M.A. in aims and objects.

A LIST OF THE SECONDARY SCHOOLS OF GREAT BRITAIN AND IRELAND, WITH THE NAMES OF THE HEAD MASTERS.

*The * denotes membership of the Head Masters' Conference; the §, of the Incorporated Association of Head Masters.*

Lady Principal, Mrs. Burrows.
Vice-Principal, Miss Burrows.

ST. HUGH'S HALL, Oxford.

Principal, Miss C. A. E. Moberly.
Vice-Principal, Miss Eleanor Jourdain.
Librarian, Miss Dencke.

SOMERVILLE COLLEGE, Oxford.

Principal, Miss Penrose, M.A.
Vice-Principal, Hon. Alice Bruce, M.A.
Resident Tutors, Miss Lees, Miss M. Pope, Miss Lorimer, Miss H. Darbyshire, Miss E. Överend.
Librarian, Miss L. Kempson, M.A.
Bursar, Mrs. Ralph.

SOCIETY OF OXFORD HOME-STUDENTS.

Chairman of Committee, Arthur Sidgwick, M.A.
Principal, Mrs. A. H. Johnson, 5 South Parks Rd.

GIRLS' SECONDARY SCHOOLS.

THE ASSOCIATION OF HEAD MISTRESSES was founded in 1874 and incorporated in 1896, its objects being to support and protect the status and interests of women engaged in education generally, and secondary education in particular. Head mistresses of Public Secondary Schools with at least 50 pupils are eligible for election. The Conference is held annually in June. *President* (1907–1909), Mrs. Woodhouse, Clapham High School. *Secretary*, Miss R. Young, 92 Victoria Street, Westminster, S.W. Members of the Association are marked § in the following lists.

THE ASSOCIATION OF ASSISTANT MISTRESSES was founded in 1884 and Incorporated in 1897, its aims being to improve the status of Assistant Mistresses and to provide a medium for the expression of their views upon educational questions. Two Conferences are held annually, one in London in January and one in summer at some provincial centre. *President*, Miss M. Bancroft, Redland High School, Bristol. *Secretary*, Miss M. A. Haig-Brown, Blackheath High School, London, S.E.

Hospital Funds.

KING EDWARD'S HOSPITAL FUND.

King Edward's Hospital Fund for London was inaugurated on Feb. 5, 1897, to commemorate the 60th anniversary of the accession of Queen Victoria, and the receipts for the first year (Feb. 6 to Dec. 31, 1897) amounted to £227,552, of which £167,021 was carried forward as capital and the remainder distributed. In the year ending Dec. 31, 1907, the total receipts were £484,069; expenses amounted to £3,836; grants to hospitals and homes, £123,750; funds in hand (including gifts to capital), £1,304,176. *Offices*, 2, Walbrook, E.C. *President*, H.R.H. Prince of Wales, K.G. *Hon. Secs.*, Rt. Hon. Sir Savile Crossley, Bt.; Frederick M. Fry. *Sec.*, H. R. Maynard.

METROPOLITAN HOSPITAL SUNDAY FUND.

The Metropolitan Hospital Sunday Fund was inaugurated at the Mansion House on Jan. 31, 1873, and the first Sunday was June 15 of that year, when £27,700 was collected. In the year ending Oct. 31, 1908, a total of £80,180 was received (£40,238 from places of worship, and £39,942 from donations, legacies, and investments). Awards were made in 1908 to 150 hospitals, 13 institutions, 60 dispensaries, and 29 nursing associations. *Offices*, Mansion House, E.C., and 18, Queen Victoria Street, E.C. *President*, The Lord Mayor. *Sec.*, Sir E. Hay Currie.

HOSPITAL SATURDAY FUND.

The Hospital Saturday Fund was started in 1873, and in twelve months £6,141 was collected in London. In the year ending Jan. 6, 1908, £27,140 was collected, and awards amounting to £24,437 were made to 124 hospitals, 29 dispensaries, 23 convalescent homes, and 32 miscellaneous institutions. *Offices*, 54 Gray's Inn Road, W.C. *Sec.*, A. W. Davis.

LIFE-BOATS.

THE ROYAL NATIONAL LIFE-BOAT INSTITUTION was founded in 1824, and during the year 1907 the receipts in subscriptions and donations amounted to £10,196; in contributions from branches, £20,300; Life-boat Saturday Fund, £20,687; and in dividends and interest on capital invested, £23,985; a gross total of £75,168. The expenditure of the year reached a total of £90,238. The total number of lives saved by the life-boats of the Institution and by special efforts for which it has awarded grants since its foundation in 1824 amounts to 47,345, the number of lives saved in 1907 being 1,156. In 1906 forty-six vessels were also saved. The rewards granted by the Institution since 1824 include 100 gold medals and clasps, 1,247 silver medals and clasps, besides aneroids, binocular glasses, addresses, and £278,896 in money. Two hundred and seventy-nine life-boats are maintained under the auspices of the Institution on the coasts of the United Kingdom. *Patron*, H.M. the King; *President*, H.R.H. the Prince of Wales. *Offices*, 22 Charing Cross Road, W.C.; *Secretary*, Charles Dibdin.

ROYAL HUMANE SOCIETY.

THE income of the Society (which was instituted in 1774) was £1,813, and the expenditure £1,679, in 1907. During the year 1907, 772 persons were rewarded by the R.H.S. for saving 814 lives, and attempting to save the lives of 71 others. The Stanhope Gold Medal was awarded in 1907 to William H. Parr, seaman on the Aberdeen Line of Direct Steamers for a rescue on the East Coast of Africa. The other rewards include 3 silver medals, 128 bronze medals, 1 bronze clasp (which is usually given for a second act of bravery, to those already in possession of the medal), 512 testimonials, and 93 pecuniary rewards. Fifty-one awards went to the Royal Navy, Coast Guard and Royal Naval Reserve, 27 to the Army, 43 to the Police Force, and 29 were made on the recommendation of the Indian and Colonial Offices.

The recipients of the Stanhope Gold Medal since its institution are:—

Allen, V.	1900	McRae, Col. H. N., C.B.	1886
Battison, Boy	1887	Meyer, W.	1889
Chainey, G.	1897	Montgomerie, Rr.-Adm. R. A. J., C.B., C.M.G.	1877
Chatterbutty, K.C.	1878	Mugford, W.	1894
Cleverley, W.	1883	Noble, Lt. D. J.	
Collin, J. H.	1896	D., R.N.	1906
Collins, A.	1884	O'Neill, F.	1898
Cooper, A. J.	1890	Parr, W. H.	1907
De Hoghton, Sir J.	1874	Rogers, Sub-Lt. F.	
Fremantle, Adm. the Hon. Sir E. R., G.C.B.	1880	H., R.N.	1874
Hall, W. P.	1898	Scrase-Dickins, Col.	
Hatton, E. A.	1895	S. W.	1893
Henderson, A. C.	1902	Senior, Col. H. W. J.	1881
Hill, H.	1887	Shearme, J.	1902
Huddleston, Comr. W. B.	1890	Simpson, W.	1883
Jenkins, J.	1882	Stockton, J.	1905
Lowry, Lt. A. C., R.N.	1900	Storey, G. W. B.	1875
McDermott, T.	1892	Webb, Matthew	1873
Mackenzie, Capt. T. C., D.S.O.	1904	Wintz, Rr.-Adm. L. E.	1877

In addition to boats and ice-boats for the protection of bathers, life-buoys and drags, &c., are maintained at the cost of the Society in nearly 300 places in and around the Metropolis. *Patron*, H.M. the King; *President*, H.R.H. the Prince of Wales. *Offices*, 4 Trafalgar Square, Charing Cross; *Secretary*, Major F. A. C. Claughton.

COMMISSIONAIRES.

THE Corps of Commissionaires was founded by the late Captain Sir Edward Walter in 1859 for the employment of pensioned soldiers. *Headquarters*, Exchange Court, 419 Strand. *Outquarters*, Donegal St., Belfast; Corporation St., Birmingham; 5 Lower College Green, Bristol; Shandwick Place, Edinburgh; W. Regent St., Glasgow; Gt. George St., Leeds; N. John St., Liverpool; Cooper Street, Manchester; Higham Place, Newcastle-on-Tyne; King's Walk, Nottingham. Discharged soldiers and sailors of good character can be obtained for almost any employment. *Commanding Officer*, Maj. F. E. Walter, M.V.O.

THE LEAGUE OF MERCY.

THE League of Mercy, for the support of King Edward's Hospital Fund, was founded in 1899. *Offices*, 29 Southampton St., Strand, W.C. *Patron of the League and Sovereign of the Order*, His Majesty The King; *Grand President and Lady Grand President*, T.R.H. Prince and Princess of Wales; *Hon. Secs.*, Lord Wolverton, Sir W. J. Collins, M.D., M.P., J. Harrison, M.V.O.; *Sec.*, Colonel Kempster, D.S.O.

BRITISH RED CROSS SOCIETY.

Patron, H.M. the King; *President*, H.M. Queen Alexandra.

Founded 1905; incorporated by Royal Charter 1908.

The primary object of the British Red Cross Society is to furnish aid to the sick and wounded in time of war supplementary to that furnished by the medical departments of the Navy and Army.

The Society offers such additional comforts and such general help as may be beyond the reasonable scope of the official bodies. It further examines, systematises, and co-ordinates all offers of aid, and so prevents waste and overlapping.

The Admiralty and War Office have accorded their official recognition to the British Red Cross Society as the organisation responsible for the Red Cross movement throughout the Empire. *Offices*, 9 Victoria St., London, S.W.; *Chairman of the Council:* The Right Hon. Lord Rothschild, G.C.V.O., C.B.; *Chairman of the Executive Committee:* Sir Frederick Treves, Bart., G.C.V.O., C.B.; *Secretary*, Frank Hastings, Esq.

THE VICTORIA LEAGUE.

THE Victoria League, Millbank House, 2 Wood St., Westminster, S.W., is a non-political Association of British men and women pledged to use every effort to promote a close understanding between British subjects throughout the world. By means of special sub-committees at the central office, by branch committees in the towns and villages of Great Britain, and in the States of the Over-seas Dominions, the League carries out its work of education and of personal intercourse. The membership is 7,000, not including the many thousand children in the schools affiliated to the League. *Secretary*, Miss Talbot.

SOCIETIES AND INSTITUTIONS—*(contd.)*.

ACADEMY, ROYAL, Burlington House, W.—*President*, Sir Edward John Poynter, Bt., 1896. *Keeper*, E. Crofts. *Treasurer*, T. G. Jackson. *Librarian*, W. F. Yeames. *Sec.*, Fred. A. Eaton. *Reg.*, E. F. Dixon.

The Bankers' Clearing-House.

THE BANKERS' CLEARING-HOUSE, in Post Office Court, Lombard Street, is the medium through which Bankers obtain the amount of Cheques and Bills in their hands for collection from other Bankers. The amount passing through this channel is enormous. The total for the year ending December 31st, 1907, was £12,730,393,000, an increase of £19,059,000 as compared with the year 1906, and the largest amount yet recorded. On Stock Exchange days the payments were £1,822,273,000, a decrease of £209,309,000 on the year 1906. The payments on Consols account days for the same period amounted to £631,893,000, a decrease of £12,641,000 as compared with 1906, and on the 4ths of the months the payments for 1907 amounted to £542,513,000, an increase of £17,697,000 as compared with 1906. The establishment is managed by a Committee of Bankers—*Chairman*, The Rt. Hon. Lord Avebury, F.R.S.; *Deputy Chairman*, Sir Felix Schuster, Bart.; *Hon. Sec.*, R. Martin Holland; *Acting Managers*, P.W. Matthews (*Chief Inspector*); A. E. Salt (*Deputy Inspector*).
